## **Natures Grand Unifying Force Discovered:**

Nature's Grand Unifying Force Discovered! Robert Michael Kopke, 1991      **Old and New Forces of Nature** Antonio Zichichi, 2013-03-09 During August 1985 a group of 95 physicists from 61 laboratories in 24 countries met in Erice for the 23rd Course of the International School of Subnuclear Physics. The countries represented were Algeria, Austria, Belgium, Brazil, Bulgaria, Czechoslovakia, France, the Federal Republic of Germany, India, Italy, Japan, Morocco, Norway, Pakistan, the Peoples Republic of China, South Africa, South Korea, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States of America. The School was sponsored by the European Physical Society, EPS, the Italian Ministry of Public Education, MPI, the Italian Ministry of Scientific and Technological Research, MRST, the Sicilian Regional Government, ERS and the Weizmann Institute of Science. This year's programme was devoted to the key point of present times: do new substructures and therefore new forces of nature exist in addition to the well known ones? This key point was reviewed from the theoretical point of view, keeping both eyes open on the checking of theories versus experimental facts. This is why a large spectrum of basic experiments and theoretical works having their roots in the known fundamental forces have been discussed in great detail by world specialists. I hope the reader will enjoy the book as much as the students enjoyed the School and the most attractive part of it: the discussions sessions. Thanks to the scientific work, these discussions have been reproduced as closely as possible to the real event.

**Mathematical Solution Unifying the Four Fundamental Forces in Nature** Richard Lighthouse,2013-08-14 This technical note describes a simple mathematical geometrical solution for unifying the four fundamental forces in nature The fundamental forces of gravitation electromagnetism strong force and the weak force are actually different aspects of the same force In general the relationship between the four forces can be described using a form of the equation for Analog Quadrature Amplitude Modulation Analog QAM This equation form is developed utilizing the concept of a blinking or discrete physical universe The approach to develop the solution is described by minimizing the number of available dimensions zero which is in contrast to numerous efforts String theory M theory Quantum gravity that attempt to maximize the number of dimensions under consideration An Electrical Universe EU model is presented that provides sufficient conditions for a solution This mathematical solution should be tested against experimental data to confirm its validity however it is noted that discrete time forces will be measured differently than time averaged forces in a laboratory environment Confirmation of the theory is suggested through small discrete time interval measurements of the gravitational acceleration force and the electromagnetic force where they will be seen to vary continuously and yet also retain a time averaged value Each reader must comprehend that our universe literally blinks off and on more than 1 trillion times every second      **Energy and water**

*Islam and the West* Wagih H. Makky Ph.D.,2019-04-01 This is the third book in the series Islam and the West The West here is atheism as it currently represents Western high culture It is based on the premises that atheism is exclusively the legacy of Western Christianity and the Western fallacy out of sheer ignorance of considering Islam as a Christian heresy that suffers whatever shortcomings Christianity may have Atheism took center stage with the rise of European enlightenment that sent its ideals across the Atlantic to form the intellectual foundation of the founding fathers of the American republic Atheism dismantled Western Christianity avoiding all moral arguments while taking full advantage of the presumably absurd biblical

statements about material physical issues such as the age of the universe and instantaneous creation While this is patently an internal Western squabble atheists unabashedly drag Islam into the brawl Western self centeredness cannot shake off bigotry and innate historical hatred of Islam even after renouncing Christianity To make that point the book ascertains the historical fact that the celebrated Western Civilization is simply nothing more than a product of the Islamic Civilization in the sense that all civilizations produce their offspring without exception as none come from a void It does that through discussing Muslim scholars contributions to building an Islamic way of life and Westerners absorbing such massive structure at known geographical points of contact Atheistic arguments are analyzed vis a vis well established Islamic norms and are found wanting A rule of thumb is established that Islam alone can be discussed as a true representative of Religion as opposed to atheism Since atheism s newfound religion is Science its major foundations and breakthroughs till the present are discussed Islam s sacred statements are then shown to be emphatically reconcilable with all findings of modern science without exception These are the Fruits of Knowledge     Forces of Nature P. C. W. Davies, 1986-07-31 Since the first edition of the book appeared in 1979 major developments have occurred with the discovery of yet more particles and the emergence of novel theoretical ideas Most exciting is the recent progress towards a unified description of the forces of nature which received a major boost when the so called W and Z particles were found in 1983 Other promising advances include the study of grand unified theories GUTs with their predictions of magnetic monopoles and proton decay and their sweeping implications for our understanding of the very early stages of the universe Page 4 de la couverture
