Natures Keepers New Science Of Nature Ma:

Nature's Keepers Stephen Budiansky, 1995 Argues that man's intervention in nature is often necessary to maintain the balance

Nature's Keeper Peter Wenz, 2010-06-02 A thought provoking look at the value of not making separations between humans and nature

Sex and Death Kim Sterelny, Paul E. Griffiths, 2024-05-31 Is the history of life a series of accidents or a drama scripted by selfish genes Is there an essential human nature determined at birth or in a distant evolutionary past What should we conserve species ecosystems or something else Informed answers to questions like these critical to our understanding of ourselves and the world around us require both a knowledge of biology and a philosophical framework within which to make sense of its findings In this accessible introduction to philosophy of biology Kim Sterelny and Paul E Griffiths present both the science and the philosophical context necessary for a critical understanding of the most exciting debates shaping biology today The authors both of whom have published extensively in this field describe the range of competing views including their own on these fascinating topics With its clear explanations of both biological and philosophical concepts *Sex and Death* will appeal not only to undergraduates but also to the many general readers eager to think critically about the science of life

American Perceptions of Immigrant and Invasive Species Peter Coates, 2007-01-09 Sometimes by accident and sometimes on purpose humans have transported plants and animals to new habitats around the world Arriving in ever increasing numbers to American soil recent invaders have competed with preyed on hybridized with and carried diseases to native species transforming our ecosystems and creating anxiety among environmentalists and the general public But is American anxiety over this crisis of ecological identity a recent phenomenon Charting shifting attitudes to alien species since the 1850s Peter Coates brings to light the rich cultural and historical aspects of this story by situating the history of immigrant flora and fauna within the wider context of human immigration Through an illuminating series of particular invasions including the English sparrow and the eucalyptus tree what he finds is that we have always perceived plants and animals in relation to ourselves and the polities to which we belong Setting the saga of human relations with the environment in the broad context of scientific social and cultural history this thought provoking book demonstrates how profoundly notions of nationality and debates over race and immigration have shaped American understandings of the natural world

Inventing Global Ecology Michael L. Lewis, 2004 Table of contents

Being Human Anna L. Peterson, 2001-05-26 Being Human is one of the few books that begins to integrate theological narratives with scientific ones looking for a compelling correlation between them where modern and religious sensibilities might both be affirmed This is a unique work Bron Taylor Professor and Director of Environmental Studies University of Wisconsin Oshkosh and author of *Ecological Resistance Movements* The Global Emergence of Radical and Popular Environmentalism Being Human succeeds at accounting for people's conception of humanness and human's relationship with nature no easy task but one that is a crucial starting point for any discussion of environmental ethics Kay Read Associate

Professor of Comparative Ethics and Native American Religions DePaul University and author of *Time and Sacrifice in the Aztec Cosmos* Anna Peterson's *Being Human* is a stellar work of integration Peterson argues that the ideology of human exceptionalism and disconnection from the rest of nature is a major source of social and ecological harm She draws together cultural constructionist Asian Native American feminist and evolutionary thought to present a view of the human as both an integral part of nature and a creator of culture called to develop an ethic of interrelationality for the sake of the wellbeing of the whole earth community Rosemary Radford Ruether Garrett Theological Center author of *Gaia and God An Ecofeminist Theology of Earth Healing* In the postmodern academic climate of slice and dice take no prisoners analysis and critical theory Anna Peterson's book is a welcome breath of fresh air She positions her discussion as a development of rather than a deconstructive triumph over earlier work in the field of environmental philosophy Peterson takes up the themes that are absolutely central to the field the nature of nature human nature and the appropriate relationship between the two Her conclusions are well informed well reasoned reasonable and last but not least beautifully and engagingly expressed Baird Callicott Professor of Philosophy and Religion Studies University of North Texas and author of *Earth's Insights A Multicultural Survey of Ecological Ethics from the Mediterranean Basin to the Australian Outback* California 1997 In *Defense of the Land Essays in Environmental Philosophy and Beyond the Land Ethic More Essays in Environmental Philosophy* Peterson challenges us to think critically about the ideas about nature and humanity that shape our ethical behavior She also brings into critical dialogue insights from a wide variety of religious traditions Buddhist Taoist Navaho Koyukon Catholic and Protestant Peterson helps us think creatively and critically about the task of comparative ethics and the imperatives of environmental ethics This book is a must read for any one concerned with environmental ethics and with comparative ethics Sharon Welch Professor of Religious Studies at the University of Missouri Columbia and author of *A Feminist Ethic of Risk Sweet Dreams in America Making Ethics and Spirituality Work and Communities of Resistance and Solidarity A Feminist Theology of Liberation* *International Toxic Risk Management* Aynsley Kellow, 1999-10-13 This book is concerned with international regulation negotiation and policy making in the environmental realm [Hog Ties](#) Richard P. Horwitz, 2002 From Charlotte's Web to Porky Pig and Babe Americans betray a curiously deep regard for pigs *Hog Ties* looks at this phenomenon its relation to American culture and the way in which themes of life and death are played out in the care feeding slaughter and eating of pigs Intermingling silly asides with serious subjects existential concerns with environmental issues the book considers the ways that pigs might help Americans address powerful human concerns **Sponsoring Nature** Maano Ramutsindela, Marja Spierenburg, Harry Wels, 2013-11-05 Saving the world's flora and fauna especially high profile examples such as chimpanzees whales and the tropical rain forests is big business Individuals and companies channel their resources to the preservation of nature through various ways one of which is the funding of environmental non governmental organizations ENGOs and community based organizations CBOs This book is the first to comprehensively address this issue

and focus on a dominant theme in environmental philanthropy the links between ENGOs and CBOs and their sponsors especially the private sector It has been argued that donor support is based on recipient s perceived expertise and needs with no favouritism of flagship environmental organizations as recipients of donor funds A counterview holds that the private sector prefers to fund mainstream ENGOs for environmental research and policy reforms congenial to industrial capital The authors show that the debate about these arguments together with the empirical evidence on which they are based may shed light on certain aspects of the nature of environmental philanthropy The book evaluates practical examples of environmental philanthropy from Africa and elsewhere against philosophical questions about the material and geographical expressions of philanthropy and the North South connections among philanthropists and ENGOs and CBOs *Breaking the Environmental Policy Gridlock* , The contributions to this volume demonstrate how the principles of fiscal responsibility and individual accountability that have been applied to economic and social policies essentially free market principles can be applied successfully to environmental policy The authors offer ten commonsense reforms as a starting point all based on the compelling arguments that a new system of positive incentives can get us more environmental quality at lower cost These reforms include land lease programs for nontraditional commodity production long term transferable land permits landowner compensation for regulated endangered species property and performance based as opposed to technology based water and air pollution laws

Finding the Voice of the River Gary J. Brierley, 2019-09-27 This book addresses societal relationships to river systems highlighting many unexplored possibilities in how we know and manage our rivers Brierley contends that although we have good scientific understanding of rivers with remarkable prospect for profound improvements to river condition management applications greatly under deliver He conceptualizes approaches to river repair in two very different ways Medean competitive and Gaian cooperative Rather than managing rivers to achieve particular anthropogenic goals the former option this book adopts a more than human approach to living with living rivers the latter option applying a river rights framework that conceptualizes rivers as sentient entities Chapters build on significant experience across many parts of the world emphasizing the diverse array of river attributes and relationships to be protected and the wide range of problems to be addressed Although the book has an environmental focus it is framed as an argument in popular philosophy contemplating the agency of rivers as place beings It will be of great value to academics students and general readers interested in protecting river systems

The Philosophy of Ecology James Justus, 2021-06-10 Ecology is indispensable to understanding the biological world and addressing the environmental problems humanity faces Its philosophy has never been more important In this book James Justus introduces readers to the philosophically rich issues ecology poses Besides its crucial role in biological science generally climate change biodiversity loss and other looming environmental challenges make ecology s role in understanding such threats and identifying solutions to them all the more critical When ecology is applied and its insights marshalled to address these problems and guide policy formation interesting philosophical issues emerge

Justus sets them out in detail and explores the often ethically charged dimensions of applied ecological science using accessible language and a wealth of scientifically informed examples **The Environmental Case** Judith A.

Layzer,2015-09-18 Answers to environmental issues are not black and white Debates around policy are often among those with fundamentally different values and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy The Environmental Case captures the real world complexity of creating environmental policy and this much anticipated Fourth Edition contains fifteen carefully constructed cases Through her analysis Editor Judith Layzer systematically explores the background players contributing factors and outcomes of each case and gives readers insight into some of the most interesting and controversial issues in U S environmental policymaking Indigenous

Enviromental Knowledge and its Transformations Alan Bicker,Roy Ellen,Peter Parkes,2003-12-16 The first concerted critical examination of the uses and abuses of indigenous knowledge The contributors focus on a series of interrelated issues in their interrogation of indigenous knowledge and its specific applications within the localised contexts of particular Asian societies and regional cultures In particular they explore the problems of translation and mistranslation in the local global transference of traditional practices and representations of resources **The Beast in the Garden: A Modern Parable of**

Man and Nature David Baron,2010-10-04 The true tale of an edenic Rocky Mountain town and what transpired when a predatory species returned to its ancestral home When in the late 1980s residents of Boulder Colorado suddenly began to see mountain lions in their yards it became clear that the cats had repopulated the land after decades of persecution Here in a riveting environmental fable that recalls Peter Benchley s thriller Jaws journalist David Baron traces the history of the mountain lion and chronicles Boulder s effort to coexist with its new neighbors A parable for our times The Beast in the Garden is a scientific detective story and a real life drama a tragic tale of the struggle between two highly evolved predators man and beast **Nature's Keeper** Gary Ferguson,2025-09-08 Once hailed by Time magazine as the Johnny Appleseed of nature museums John Ripley Forbes arguably did as much as anyone in history to keep the wonders of nature alive for America s children Through seven decades of passionate tireless effort Forbes helped create outdoor based science and learning centers in more than 200 communities across the country Nature s Keeper chronicles the life of this extraordinary educator from his teen years with renowned conservationist William Hornaday to his celebrated animal lending libraries of the 1950s and 1960s to his final preservation victories at the end of the twentieth century Pandora's Garden Clinton

Crockett Peters,2018-05 Pandora s Garden profiles invasive or unwanted species in the natural world and examines how our treatment of these creatures sometimes parallels in surprising ways how we treat each other Part essay part nature writing part narrative nonfiction the chapters in Pandora s Garden are like the biospheres of the globe as the successive chapters unfold they blend together like ecotones creating a microcosm of the world in which we sustain nonhuman lives but also contain them There are many reasons particular flora and fauna may be unwanted from the physical to the psychological

Sometimes they may possess inherent qualities that when revealed help us to interrogate human perception and our relationship to an unwanted other Pandora's Garden is primarily about creatures that humans don't get along with such as rattlesnakes and sharks but the chapters also take on a range of other subjects including stolen children in Australia the treatment of illegal immigrants in Texas and the disgust function of the human limbic system Peters interweaves these diverse subjects into a whole that mirrors the evolving and interrelated world whose surprises and oddities he delights in revealing

The Philosophy of Biology Kostas Kampourakis, 2013-06-18 This book brings together for the first time philosophers of biology to write about some of the most central concepts and issues in their field from the perspective of biology education The chapters of the book cover a variety of topics ranging from traditional ones such as biological explanation biology and religion or biology and ethics to contemporary ones such as genomics systems biology or evolutionary developmental biology Each of the 30 chapters covers the respective philosophical literature in detail and makes specific suggestions for biology education The aim of this book is to inform biology educators undergraduate and graduate students in biology and related fields students in teacher training programs and curriculum developers about the current state of discussion on the major topics in the philosophy of biology and its implications for teaching biology In addition the book can be valuable to philosophers of biology as an introductory text in undergraduate and graduate courses

Urban Futures Tim Hall, Malcolm Miles, 2004-11-23 *Urban Futures* brings together commentaries from a wide range of contemporary disciplines and fields relevant to urban culture form and society The book concerns cities in the broadest sense not just as buildings and spaces but also as processes and events or sites of occupation in which meanings are constructed in many ways The contributors draw on their specialist areas of research to inform current debate but they also speculate as to how cities will be shaped in the 21st century Specific areas of research include homeless people's organisations and restoration ecology in brownfield sites in the USA post industrial urban landscapes post industrial economics tourism and cultural planning The book allows each writer to state their own conclusions but together they suggest that tomorrow's cities will while remaining locations of difference and contestation be rapidly evolving systems in which dwellers assume increasing responsibilities and power

The Liberal Way of War Michael Dillon, Julian Reid, 2009-02-20 The liberal way of war and the liberal way of rule are correlated this book traces that correlation to liberalism's original commitment to making life live Committed to making life live liberalism is committed to waging war on behalf of life specifically to promote the biopolitical life of species being what the book calls the biohuman Tracking the advent of the age of life as information complex adaptive and emergent while contrasting biopolitics with geopolitics the book details how and why the liberal way of rule wages war on the human in the cause of instituting the biohuman Contingent and emergent the biohuman is however continuously also becoming dangerous to itself It therefore requires constant surveillance to anticipate the threats it presents to its own flourishing The book explains how in making life live liberal rule finds its expression today in making the biohuman live the

emergency of its emergence Thus does liberal peace become the continuation of war by other means Just as the information and molecular revolutions have combined to transform liberal military strategic thinking so also has it contributed to the discourse of global danger through which global liberal governance currently legitimates the liberal way of war
