At the Dawn of Airpower Laurence M Burke, 2022-05-15 At the Dawn of Airpower The U S Army Navy and Marine Corps Approach to the Airplane 1907 1917 examines the development of aviation in the U S Army Navy and Marine Corps from their first official steps into aviation up to the United States declaration of war against Germany in April 1917 Burke explains why each of the services wanted airplanes and show how they developed their respective air arms and the doctrine that guided them His narrative follows aviation developments closely delving deep into the official and personal papers of those involved and teasing out the ideas and intents of the early pioneers who drove military aviation Burke also closely examines the consequences of both accidental and conscious decisions on the development of the nascent aviation arms Certainly the slow advancement of the technology of the airplane itself in the United States compared to Europe in this period affected the creation of doctrine in this period Likewise notions that the war that broke out in 1914 was strictly a European concern reinforced by President Woodrow Wilson's intentions to keep the United States out of that war meant that the U S military had no incentive to keep up with European military aviation Ultimately however he concludes that it was the respective services inability to create a strong durable network connecting those flying the airplanes regularly technology advocates with the senior officers exercising control over their budget and organization technology patrons that hindered military aviation during this period
