## THE CASE OF MISTAKE

You're probably familiar with the term *Blackboard*, but you may not be familiar with the term *Blackboard System*. A Blackboard System is a software architecture that allows multiple knowledge sources to work together to solve a problem. The knowledge sources are called *agents* and they communicate with each other through a central database called the *blackboard*. The agents can be *independent* or *cooperative*. Independent agents work on their own, while cooperative agents work together to solve a problem. The Blackboard System is a powerful tool for building intelligent systems.
