Octopus, Squid and Cuttlefish Roger Hanlon, 2018-07-25 A treasure trove of scientific fact and visual explanation offers a comprehensive review of these fascinating and mysterious marine invertebrates There are over 700 species of cephalopod and their existence proves that intelligence develops in very different ways it is not by accident that these creatures are favourite models for science fiction and fantasy While whale brains look somewhat similar to ours cephalopods carry a large percentage of their brains in their arms They are capable of learning and of retaining information They have eyes and other senses rivalling those of humans they change texture and body shape and they change colour faster than a chameleon From the lone inky hunting of the octopus to the social squid and the unusually large brained cuttlefish *Octopus Squid Cuttlefish* reveals the evolution anatomy life history behaviours and relationships of these spellbinding creatures
