To which is prefixed a large ... history of the ... writings relating to those subjects, etc* Charles Hutton,1785 [The Living and the Dead](#) Toby Austin Locke,2016-10-18 The Living and the Dead examines the boundaries between the worlds of life and death The text draws upon philosophy ethnography literature and natural science to suggest that life and death are best understood not in opposition but as continuous tendencies acting upon one another Austin Locke argues that the failure to give nuanced consideration to the connections between the living and nonliving devalues both life and death In doing so he suggests that our ability to respond to the challenges of environmental degradation technological advancement and the dominance of economic logic depend in part on more fluid understandings of the relationship between life and death **The Journal of Speculative Philosophy** ,1872 *Curtain* ,1923 **Guide to the study of mathematics for the B.A. and B.Sc. examinations of the University of London** Arthur Lee Sparkes,1879 *Mathematical Tables* Charles Hutton,1801

Corey Brennan,2000 Brennan s book surveys the history of the Roman praetorship which was one of the most enduring Roman political institutions occupying the practical center of Roman Republican administrative life for over three centuries The study addresses political social military and legal history as well as Roman religion Volume I begins with a survey of Roman and modern views on the development of legitimate power from the kings through the early chief magistrates and down through the creation and early years of the praetorship Volume II discusses how the introduction in 122 of C Gracchus provincia repetundarum pushed the old city state system to its functional limits [A Dissertation on the Use of the Negative Sign in Algebra](#) Francis Maseres,1758 **Christian Advocate** ,1914 **Cartesian Questions III** Jean-Luc Marion,2025-08-05 In this masterful work Jean Luc Marion shows how some of Descartes most decisive points remain masked by the various Cartesianisms that historiography and convenient simplifications alike have constructed The book s first half shows how Descartes lines up against Cartesianism setting forth several closely argued attempts to free up the

positive status of skepticism in the Cartesian corpus the non substantial and non reflexive character of the ego cogito the complex elaboration of the idea of the infinite and the role of esteem as a mode of the cogitatio Marion then offers a second set of studies examining the work of Montaigne Hobbes and Spinoza and seeking to reconstitute some of the ways in which Cartesianism and non Cartesianism become opposed to Descartes Arising at the pivot point between these two paths of inquiry is a chapter dedicated to Descartes and phenomenology with particular focus on how Descartes can be understood to have practiced in his own way and by anticipation a genuine phenomenological reduction The final volume in Jean Luc Marion s erudite trilogy of Cartesian Questions this authoritative book demonstrates that rather than belonging strictly to the past Descartes continues to speak to our future History of Philosophy Erdmann, Johann Eduard, 2014-06-03 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **History Naturall and Experimentall, of Life and Death; or Of the prolongation of life.
