 the Mind, and the Person Within** Mark P. Cosgrove, 2018 The brain with its nearly one hundred billion neurons is the most
 complex structure in the universe and we are living in a period of revolutionary advancements in neuroscience Yet scientists
 and skeptics often frame these findings in ways that challenge the Christian worldview Many professionals and popularizers
 claim that human beings are their brains and that all human behavior and experience are merely by products of brain
 physiology In The Brain the Mind and the Person Within professor of psychology Mark Cosgrove not only explains what the
 brain is and what it does but also corrects common misinterpretations and demonstrates that what we know about the brain
 coheres with the teachings of Scripture He contends that humans are unities of soul and body in which both the spiritual and
 the physical interact From this perspective he presents informative overviews of contemporary debates about the brain
 including consciousness free will God spots personhood and life after death The better we understand the brain the better we
