**Odors and Deodorization in the Environment** G. E. Martin, P. Laffort, 1994-12-15 The majority of animal species are equipped with a highly developed sense of smell The animal is guided by this sense of smell in accomplishing all its biological functions to be warned of danger to feed itself to find a sexual partner or organize itself in hierarchal societies This sense is more dull in the human species who favor visual and audio oral communication Nevertheless the sense of smell is not as insignificant as all that For humans olfactory perception is an integral part of the salt of life For us odors are essentially either a matter of pleasure or displeasure Because of their waste production industrial communities are unfortunately at the origin of a certain number of odorous nuisances How can they be prevented How can they be fought Such is the subject of this book in its various scientific technological and regulatory aspects It includes the most recent synthesis on physiological olfaction mechanisms sensorial interactions of odorous mixtures the measurement of odorous pollution levels and different physical chemical and biological deodorization techniques **Books in Print** ,1991 [Subject Guide to Books in Print](#) ,1991

**The Routledge History of the Senses** Andrew Kettler, Will Tullett, 2025-06-26 The Routledge History of the Senses presents readers with an overview of the field As well as pointing to directions for the future of the discipline it illustrates the extent to which the subject offers a considerable space for the exploration of diverse historical topics through the lens of sensory experience The handbook brings together essays and case studies from some of the leading academics on the history of the senses Together they not only chart topics and arguments in existing scholarship but introduce fresh methodologies for future analyses Specifically the chapters collectively show that the senses of the historical body often portray the intensity of the invasion of capital upon the functions of the mind throughout global history As a global history this work arrives at a time when many sensory historians are looking for a touchstone for moving beyond the often heavily Western frameworks that dominate the existing literature on the historical senses Not only will this book appeal to students and scholars of the history of senses visual studies art history food studies and many of the social sciences but individual chapters also offer useful reading material for a wide range of history modules and contemporary topics **Reading Green in Early Modern England** Leah Knight, 2016-04-08 Green in early modern England did not mean what it does today but what did it mean Unveiling various versions and interpretations of green this book offers a cultural history of a color that illuminates the distinctive valences greenness possessed in early modern culture While treating green as a panacea for anything from sore eyes to sick minds early moderns also perceived verdure as responsive to their verse sympathetic to their sufferings and endowed with surprising powers of animation Author Leah Knight explores the physical and figurative potentials of green as they were understood in Renaissance England including some that foreshadow our paradoxical dependence on and sacrifice of the green world Ranging across contexts from early modern optics and olfaction to horticulture and herbal health care this study explores a host of human encounters with the green world both the

impressions we make upon it and those it leaves with us The first two chapters consider the value placed on two ways of taking green into early modern bodies and minds by seeing it and breathing it in while the next two address the manipulation of greenery by Orphic poets and medicinal herbalists as well as grafters and graffiti artists A final chapter suggests that early modern modes of treating green wounds might point toward a new kind of intertextual ecology of reading and writing Reading Green in Early Modern England mines many pages from the period not literally but tropically metaphorically green that cultivate a variety of unexpected meanings of green and the atmosphere and powers it exuded in the early modern world

**Smells, Well-being, and the Built Environment** Jieliang Xiao, Francesco Aletta, Antonella Radicchi, 2022-05-09 *Air Pollution Abstracts*, 1972 The Smell of Risk Hsuan L. Hsu, 2020-12-15 A timely exploration of how odor seeps into structural inequality Our sense of smell is a uniquely visceral and personal form of experience As Hsuan L. Hsu points out smell has long been spurned by Western aesthetics as a lesser sense for its qualities of subjectivity volatility and materiality But it is these very qualities that make olfaction a vital tool for sensing and staging environmental risk and inequality Unlike the other senses smell extends across space and reaches into our bodies Hsu traces how writers artists and activists have deployed these embodied biochemical qualities of smell in their efforts to critique and reshape modernity's olfactory disparities The Smell of Risk outlines the many ways that our differentiated atmospheres unevenly distribute environmental risk Reading everything from nineteenth century detective fiction and naturalist novels to contemporary performance art and memoir Hsu takes up modernity's differentiated atmospheres as a subject worth sniffing out From the industrial revolution to current day environmental crises Hsu uses ecocriticism geography and critical race studies to for example explore Latinx communities exposed to freeway exhaust and pesticides Asian diasporic artists response to racialized discourse about Asiatic odors and the devastation settler colonialism has reaped on Indigenous smellscape In each instance Hsu demonstrates the violence that air maintenance control and conditioning enacts on the poor and the marginalized From nineteenth century miasma theory theory to the synthetic chemicals that pervade twenty first century air Hsu takes smell at face value to offer an evocative retelling of urbanization public health and environmental violence The Smell of Slavery Andrew Kettler, 2020-05-28 Slavery capitalism and colonialism were understood as racially justified through false olfactory perceptions of African bodies throughout the Atlantic World *Official Gazette of the United States Patent and Trademark Office*, 2002 *The Middle Sort of People in Provincial England, 1600-1750* H.R. French, 2007-07-05 This title will appeal to scholars and students of early modern social and economic history in England *Cultural Capitals* Karen Newman, 2021-06-08 Social theories of modernity focus on the nineteenth century as the period when Western Europe was transformed by urbanization Cities became thriving metropolitan centers as a result of economic political and social changes wrought by the industrial revolution In Cultural Capitals Karen Newman demonstrates that speculation and capital the commodity the crowd traffic and the street often thought to be historically specific to nineteenth century urban culture were

in fact already at work in early modern London and Paris Newman challenges the notion of a rupture between premodern and modern societies and shows how London and Paris became cultural capitals Drawing upon poetry plays and prose by writers such as Shakespeare Scud ry Boileau and Donne as well as popular materials including pamphlets ballads and broadsides she examines the impact of rapid urbanization on cultural production Newman shows how changing demographics and technological development altered these two emerging urban centers in which new forms of cultural capital were produced and new modes of sociability and representation were articulated Cultural Capitals is a fascinating work of literary and cultural history that redefines our conception of when the modern city came to be and brings early modern London and Paris alive in all their splendor squalor and richness *Literature and the Senses* Annette Kern-Stähler, Elizabeth Robertson, 2023 This collection of essays breaks new ground in the field of sensory studies Organized around the five traditional senses followed by a section on multisensoriality the collection facilitates a dialogue between scholars working on literature written from the Middle Ages to the present day **The Complete Language of Herbs** S. Theresa Dietz, 2024-02-06 The Complete Language of Herbs is a comprehensive and definitive dictionary reference presenting the history symbolic meaning and visual depiction of over 500 herbs and spices from around the world in one volume now in a pocket size edition for easy on the go reference **A Sensory History Manifesto** Mark M. Smith, 2021-05-10 A Sensory History Manifesto is a brief and timely meditation on the state of the field It invites historians who are unfamiliar with sensory history to adopt some of its insights and practices and it urges current practitioners to think in new ways about writing histories of the senses Starting from the premise that the sensorium is a historical formation Mark M Smith traces the origins of historical work on the senses long before the emergence of the field now called sensory history interrogating exploring and in some cases recovering pioneering work on the topic Smith argues that we are at an important moment in the writing of the history of the senses and he explains the potential that this field holds for the study of history generally In addition to highlighting the strengths of current work in sensory history Smith also identifies some of its shortcomings If sensory history provides historians of all persuasions times and places a useful and incisive way to write about the past it also challenges current practitioners to think more carefully about the historicity of the senses and the desirability even the urgency of engaged and sustained debate among themselves In this way A Sensory History Manifesto invites scholars to think about how their field needs to evolve if the real interpretive dividends of sensory history are to be realized Concise and convincing A Sensory History Manifesto is a must read for historians of all specializations **Scents of China** Xuelei Huang, 2023-08-10 A pioneering cultural history of smell in China from the High Qing to the Mao period Smell in Eighteenth-century England William Tullett, 2019 In England from the 1670s to the 1820s a transformation took place in how smell and the senses were viewed The role of smell in developing medical and scientific knowledge came under intense scrutiny and the equation of smell with disease was actively questioned Yet a new interest in smell s emotive and

idiosyncratic dimensions offered odour a new power in the sociable spaces of eighteenth century England Using a wide range of sources from diaries letters and sanitary records to satirical prints consumer objects and magazines William Tullett traces how individuals and communities perceived the smells around them from paint and perfume to onions and farts In doing so the study challenges a popular influential and often cited narrative Smell in Eighteenth Century England is not a tale of the medicalization and deodorization of English olfactory culture Instead Tullett demonstrates that it was a new recognition of smell s asocial sociability and its capacity to create atmospheres of uncomfortable intimacy that transformed the relationship between the senses and society **A.M.A. Archives of Industrial Hygiene and Occupational Medicine** ,1951

Authority and Consent in Tudor England George Bernard,Steven Gunn,2021-12-16 Brought together as a tribute to the distinguished Tudor historian C S L Davies the essays in this collection address key themes in the current historiography of the Tudor period These include the nature causes and consequences of change in English government society and religion the relationship of centre localities and peripheral areas in the Tudor state the regulation of belief and conduct and the dynamics of England s relations with her neighbours The contributors colleagues and students of Cliff Davies are all leading scholars who have provided fresh and interesting essays reflecting the wide ranging inquisitiveness characteristic of his own work They seek to cross as he has done the traditional boundaries between the medieval and early modern periods and between social political and religious history A coherent collection in their own right these essays by showing the many new directions open to those studying the Tudor period provide a fitting tribute to such an influential scholar *The Ephemeral History of Perfume* Holly Dugan,2011-11-01 In contrast to the other senses smell has long been thought of as too elusive too fleeting for traditional historical study Holly Dugan disagrees arguing that there are rich accounts documenting how men and women produced consumed and represented perfumes and their ephemeral effects She delves deeply into the cultural archive of olfaction to explore what a sense of smell reveals about everyday life in early modern England In this book Dugan focuses on six important scents incense rose sassafras rosemary ambergris and jasmine She links these smells to the unique spaces they inhabited churches courts contact zones plague ridden households luxury markets and pleasure gardens and the objects used to dispense them This original approach provides a rare opportunity to study how early modern men and women negotiated the environment in their everyday lives and the importance of smell to their daily actions Dugan defines perfume broadly to include spices flowers herbs animal parts trees resins and other ingredients used to produce artificial scents smokes fumes airs balms powders and liquids In researching these Renaissance aromas Dugan uncovers the extraordinary ways now largely lost that people at the time spoke and wrote about smell objects ambered civited expired fetored halited resented and smeeked or were described as breathful embathed endulced gracious halited incensial odorant pulvil redolent and suffite A unique contribution to early modern studies *The Ephemeral History of Perfume* is an unparalleled study of olfaction in the Renaissance a period in which new scents and important cultural theories about smell were developed Dugan
