The Music of Frederick Delius Jeremy Dibble,2021 This book examines Delius s individual approaches to genre form harmony orchestration and literary texts which gave the composer s musical style such a unique voice Frederick Delius 1862 1934 music has proved impervious to analytical definition Delius s approaches to genre form harmony orchestration and literary texts are all highly individual not to say eccentric in their deliberate aim to avoid conformity Rarely does Delius follow a conventional line and though one can readily point to important influences the larger Gestalt of each work has a syntax and coherence for which conventional analytical methods are mostly inadequate Delius s musical style has also defied one of the most essential critical tools of his musical epoque that of national identity His style bears no relation either to the Victorian or Edwardian aesthetic of British music spearheaded by Parry Stanford and Elgar before the First World War nor to the more overtly nationalist folk song orientated pastoralism of post war Britain in such composers as Vaughan Williams and Holst In contrast Delius acknowledged himself a stateless individual and considered that his music refused to belong to any national school or movement To test these claims the book explores a number of important factors Delius s musical education at the Leipzig Conservatorium and the works he produced there Delius s musical voice notably his harmonic and melodic style and the close structural relationship between these two factors The book also explores the question of Delius and genre in which the investigation of form is central especially in opera the symphonic poem the choral work where words are seminal to the creation of structural design and the sonata and concerto to which

**Eye hEar The Visual in Music** Simon Shaw-Miller,2017-07-05 Eye hEar The Visual in Music employs the concept of the visual in proximate relation to music producing a tension is it not the case that there is a gulf between painting and music between the visible and the audible One is full of colour and light yet silent one is invisible and marvellously noisy Such a belief this book argues betrays an ideological constraint on music desiccating it to sound and art to vision The starting point of this study is more hybrid and hydrating that music is never employed without numerous and complex intersections with the visual By involving the concept of synaesthesia the book evokes music s multi sensory nature stops it from sounding alone and offers music as a subject for art historians Music bleeds into art and visuality in its graphic depiction in notation in the theatre of performance its sights and sites This book looks at music in its absolute guise as a model for art at notation and the conductor as the silent visual fulcrum around which music circulates at the music and image of Erik Satie at the concert hall as white cube at the symphonic film 2001 A Space Odyssey and at the liminality of John Cage and Andy Warhol **OCR**
