OECD Economic Studies, 1995 **Lessons from the Economic Transition** Salvatore Zecchini, 2013-12-01 An attentive reader embarking on this book might wonder what the economic transition to which the title refers might be In this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition Definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 No other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems It is this transformation that has come to define the transition Early in the transformation process in November 1990 with the support of the Centre for Co operation with the Economies in Transition CCET I launched a conference to examine the challenges faced by these countries About six years have gone by and a new economic landscape has emerged in that part of the world The difficulties in transforming these economies have exceeded all expectations and economic

performances have varied considerably across countries The time has come therefore to make a first evaluation of progress and problems with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future *Welfare, Choice and Solidarity in Transition* János Kornai, Karen Eggleston, 2001-05-31 Reform of the welfare sector is an important yet difficult challenge for all countries in transition from socialist central planning to market oriented democracies Here a scholar of the economics of socialism and post socialist transition and a health economist take on this challenge This 2001 book offers health sector reform recommendations for ten countries of Eastern Europe drawn consistently from a set of explicit guiding principles After discussing sector specific characteristics lessons of international experience and the main set of initial conditions the authors advocate reforms based on organized public financing for basic care private financing for supplementary care pluralistic delivery of services and managed competition Policymakers need to achieve a balance both assuring social solidarity through universal access to basic health services and expanding individual choice and responsibility through voluntary supplemental insurance The authors also consider the problems that undermine effectiveness of market based competition in the health sector **OECD Economic Surveys: Hungary 1993**

OECD, 1993-01-01 OECD's 1993 Economic Survey of Hungary examines the macroeconomic situation and outlook macroeconomic policy strengthening the private sector industrial policy and financial sector issues Institutional Design in Post-Communist Societies Jon Elster, Claus Offe, Ulrich K. Preuss, 1998-03-28 The authors of this book have developed a new and stimulating approach to the analysis of the transitions of Bulgaria the Czech Republic Hungary and Slovakia to democracy and a market economy They integrate interdisciplinary theoretical work with elaborate empirical data on some of

the most challenging events of the twentieth century Three groups of phenomena and their causal interconnection are explored the material legacies constraints habits and cognitive frameworks inherited from the past the erratic configuration of new actors and new spaces for action and a new institutional order under which agency is institutionalized and the sustainability of institutions is achieved The book studies the interrelations of national identities economic interests and political institutions with the transformation process concentrating on issues of constitution making democratic infrastructure the market economy and social policy

The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker, 2006-01-01 Frank Bönker has done a masterful job This is probably the best book available on this

important subject and its significance is not limited to studies of postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy John L Campbell Slavic Review

East-Central European Economies in Transition John P. Hardt, Richard F. Kaufman, 2016-09-16 This volume makes JEC commissioned expert studies of economic developments in East Central Europe available to business people educators and students Coverage includes economic political and social reform issues regional relations and the impact of Western assistance programmes

Economic and Political Reform in Developing Countries Oliver Morrissey, Frances Stewart, 2016-07-27 This volume explores the interactions between economic and political reform in developing countries and eastern Europe Over the past decade there have been significant moves both towards economic reform essentially involving a greater role for the market and a lesser role for the state and political reform with important steps taken towards democratic forms of government In some areas political change preceded economic reform as in much of eastern Europe while elsewhere economic and political reform have gone hand in hand often as a result of external pressure The essays cover a wide range of experience of economic and political reforms from which some general lessons emerge The most important one is that political and economic reforms interact in complex ways with political reform often acting to slow down or even reverse economic reform Secondly it is shown that the state has an important role to play in guiding reform and preventing market excesses
