Plants and People Alexandre Chevalier, Elena Marinova, Leonor Pena-Chocarro, 2014-04-30 This first monograph in the EARTH series The dynamics of non industrial agriculture 8 000 years of resilience and innovation approaches the great variety of agricultural practices in human terms It focuses on the relationship between plants and people the complexity of agricultural processes and their organisation within particular communities and societies Collaborative European research among archaeologists archaeobotanists ethnographers historians and agronomists using a broad analytical scale of investigation seeks to establish new common ground for integrating different approaches By means of interdisciplinary examples this book showcases the relationship between people and plants across wide ranging and diverse spatial and temporal milieus including crop diversity the use of wild foodstuffs social context status and choices of food plants

Plants and People Robert M. Lloyd, 1993 *Plants, People, and Culture* Michael J Balick, Paul Alan Cox, 2020-08-19 Is it possible that plants have shaped the very trajectory of human cultures Using riveting stories of fieldwork in remote villages two of the world s leading ethnobotanists argue that our past and our future are deeply intertwined with plants Creating massive sea craft from plants indigenous shipwrights spurred the navigation of the world s oceans Today indigenous agricultural innovations continue to feed clothe and heal the world s population One out of four prescription drugs for example were discovered from plants used by traditional healers Objects as common as baskets for winnowing or wooden boxes to store feathers were ornamented with traditional designs demonstrating the human ability to understand our environment and to perceive the cosmos Throughout the world the human body has been used as the ultimate canvas for plant based adornment as well as indelible design using tattoo inks

Plants also garnered religious significance both as offerings to the gods and as a doorway into the other world Indigenous claims that plants themselves are sacred is leading to a startling reformulation of conservation The authors argue that conservation goals can best be achieved by learning from rather than opposing indigenous peoples and their beliefs KEY FEATURES An engrossing narrative that invites the reader to personally engage with the relationship between plants people and culture Full color illustrations throughout including many original photographs captured by the authors during fieldwork New to this edition Plants That Harm a chapter that examines the dangers of poisonous plants and the promise that their study holds for novel treatments for some of our most serious diseases including Alzheimer s and substance addiction Additional readings at the end of each chapter to encourage further exploration Boxed features on selected topics that offer further insight Provocative questions to facilitate group discussion Designed for the college classroom as well as for lay readers this update of Plants People and Culture entices the reader with firsthand stories of fieldwork spectacular

Sandra Knapp,2022-11-02 A vividly illustrated meeting with thirty plants and their inspiring namesakes Shakespeare famously asserted that a rose by any other name would smell as sweet and that s as true for common garden roses as it is for the Megacorax a genus of evening primroses Though it may not sound like it the Megacorax was actually christened in honor of famed American botanist Peter Raven its name a play on the Latin words for great raven In this lush and lively book celebrated botanist Sandra Knapp explores the people whose names have been immortalized in plant genera presenting little known stories about both the featured plants and their eponyms alongside photographs and botanical drawings from the collections of London s Natural History Museum Readers will see familiar plants in a new light after learning the tales of heroism inspiration and notoriety that led to their naming Take for example nineteenth century American botanist Alice Eastwood after whom the yellow aster Eastwoodia elegans is named Eastwood was a pioneering plant collector who also singlehandedly saved irreplaceable specimens from the California Academy of Sciences during the 1906 San Francisco earthquake Or more recently the fern genus Gaga named for the pop star and actress Lady Gaga whose verdant heart shaped ensemble at the 2010 Grammy Awards bore a striking resemblance to a giant fern gametophyte Knapp s subjects range from Charles Darwin s grandfather Erasmus Darwin Darwinia and legendary French botanist Pierre Magnol who lends his name to the magnolia tree to US founding figures like George Washington Washingtonia and Benjamin Franklin Franklinia Including granular details on the taxonomy and habitats for thirty plants alongside its vibrant illustrations this book is sure to entertain and enlighten any plant fan **Plants, People and Practices** Jay Sanderson,2017-05-18 Article 14 Protection Independent

of Measures Regulating Production Certification and Marketing The Functions of Sterling F.V. Meyer,2021-10-29 Why is sterling under pressure Why was the devaluation in 1967 followed by stagnation of British economy What do the 1971 monetary reforms mean for sterling in the 1970s First published in 1973 The Functions of Sterling discusses these vital

questions and challenges the received wisdom of those who tells us it is beneficial that our money should be worth less. It also examines critically the internal and external performance of sterling throughout the twentieth century. The book argues that the credit control policy offers a real possibility of improved economic growth and encourage the revaluation of sterling. To a large extent the book is in line with Sir Ralph Hawtrey's reasoning and also integrates monetary economics with real problems of comparative costs innovations and growth. This book is an essential read for scholars of British economy public policy political economy and economics in general.

Migration, Participation and the Making of Homes Susanne Berliner, 2025-07-31. This book is an ethnographic inquiry into the socio ecological relationalities in an intercultural community garden in Germany created in 2015 as a Refugees Welcome project. It explores this quietly political space of civic everyday which seeks to foster care for both people and planet. In three narrations the book offers power critical reflections on social encounters participation in equalities and home making. In innovative ways the narrations also shed light on how people's doings are entangled with the more than human plants soils animals water and more. Migration Participation and the Making of Homes increases our understanding of how communities navigate social heterogeneity and how people with refugee biographies shape their surroundings as active agents. The narrations show that a cosmopolitan spirit is alive in this garden and the plants play a significant part in its expression. Yet while the garden works as a retreat from hostilities that people may experience outside it also remains a racialised space. Power relations work in complex ways positioning individuals as not belonging where conflicts occur. At the same time in instances less shaped by the local habitus new dynamics develop between guest and host. The narrations demonstrate how all people in the garden are engaged in unique home making processes and in the making of the shared home which is the garden. The gardeners connect in the joy of tending and watching life grow as the plants speak in their own way about vital continuity. Contributing to the social scientific exploration of the dynamics of migration belonging and community making in pluralistic societies this book takes a transdisciplinary shape entering into dialogue with literature from various fields. As such it will be of interest for researchers and university students of all levels in the areas of sociology education social work anthropology environmental studies political science and related fields. This book will also be useful for civil organisations working in refugee support and or integration policymakers and local governments.

Plant and Human Health, Volume 1 Munir Ozturk, Khalid Rehman Hakeem, 2018-10-02 Early anthropological evidence for plant use as medicine is 60 000 years old as reported from the Neanderthal grave in Iraq The importance of plants as medicine is further supported by archeological evidence from Asia and the Middle East Today around 1.4 billion people in South Asia alone have no access to modern health care and rely instead on traditional medicine to alleviate various symptoms On a global basis approximately 50 to 80 thousand plant species are used either natively or as pharmaceutical derivatives for life threatening conditions that include diabetes hypertension and cancers As the demand for plant based medicine rises there is an unmet need to investigate the quality safety and efficacy of these herbals by the scientific methods Current research on drug discovery from medicinal plants involves a multifaceted approach combining botanical phytochemical analytical and molecular techniques For instance high throughput robotic screens have been developed by industry it is now possible to carry out 50 000 tests per day in the search for compounds which act on a key enzyme or a subset of receptors This and other bioassays thus offer hope that one may eventually identify compounds for treating a variety of diseases or conditions However drug development from natural products is not without its problems Frequent challenges encountered include the procurement of raw materials the selection and implementation of appropriate high throughput bioassays and the scaling up of preparative procedures Research scientists should therefore arm themselves with the right tools and knowledge in order to harness the vast potentials of plant based therapeutics The main objective of Plant and Human Health is to serve as a comprehensive guide for this endeavor Volume 1 highlights how humans from specific areas or cultures use indigenous plants Despite technological developments herbal drugs still occupy a preferential place in a majority of the population in the third world and have slowly taken roots as alternative medicine in the West The integration of modern science with traditional uses of herbal drugs is important for our understanding of this ethnobotanical relationship Volume 2 deals with the phytochemical and molecular characterization of herbal medicine Specifically it focusses on the secondary metabolic compounds which afford protection against diseases Lastly Volume 3 discusses the physiological mechanisms by which the active ingredients of medicinal plants serve to improve human health Together this three volume collection intends to bridge

the gap for herbalists traditional and modern medical practitioners and students and researchers in botany and horticulture

Significance of Indian Medicinal Plants and Mushrooms Dr. Ved Prakash, **The Importance of Plants to Life on Earth** Yea Jee Bae, 2018-07-15 Without plants life as we know it could not survive Plants provide humans and animals

with air shelter food and more They harness the sun's power to supply energy to other organisms protect and nurture environments and yield endless resources for humans from clothes to medicine Readers will learn of the invaluable uses and benefits of plants as well as the threats they face They will grow to appreciate the necessity of improving our planet through understanding and caring for plant life and why it's important now more than ever *Food Plants of the Sonoran Desert*

Wendy C. Hodgson, 2022-02-08 The seemingly inhospitable Sonoran Desert has provided sustenance to indigenous peoples for centuries Although it is to all appearances a land bereft of useful plants fully one fifth of the desert's flora are edible This volume presents information on nearly 540 edible plants used by people of more than fifty traditional cultures of the Sonoran Desert and peripheral areas Drawing on thirty years of research Wendy Hodgson has synthesized the widely scattered literature and added her own experiences to create an exhaustive catalog of desert plants and their many and varied uses *Food Plants of the Sonoran Desert* includes not only plants such as gourds and legumes but also unexpected food sources such as palms lilies and cattails all of which provided nutrition to desert peoples Each species entry lists recorded names and describes indigenous uses which often include nonfood therapeutic and commodity applications The agave for example is cited for its use as food and for alcoholic and nonalcoholic beverages syrup fiber cordage clothing sandals nets blankets lances fire hearths musical instruments hedgerows soap and medicine and for ceremonial purposes The agave entry includes information on harvesting roasting and consumption and on distinguishing between edible and inedible varieties No other source provides such a vast amount of information on traditional plant uses for this region Written to be easily accessible to general readers the book is an invaluable compendium for anyone interested in the desert's hidden bounty *Ecology and*

Evolution of Plants under Domestication in the Neotropics Alejandro Casas, Ana H. Ladio, Charles R. Clement, 2019-09-25 The Neotropical area is a main setting of the earliest experiences of domestication of plants and evolutionary processes guided by humans which continue being active in the area Studies comprised in this Research Topic show a general panorama about similarities and particularities of processes of domestication for different plant groups and regions some of them illustrate how the domestication processes originated and diffused how landscape domestication has operated and continues being practiced and others discuss some of the main challenges for designing policies for biosafety and conservation of plant genetic resources It is an attempt to identify main topics for research on evolution under domestication and opportunities that researchers can find in the Neotropics to understand how and why these processes occurred in the past and present **The**

African Roots of Marijuana Chris S. Duvall, 2019-05-09 After arriving from South Asia approximately a thousand years ago cannabis quickly spread throughout the African continent European accounts of cannabis in Africa often fictionalized and

reliant upon racial stereotypes shaped widespread myths about the plant and were used to depict the continent as a cultural backwater and Africans as predisposed to drug use These myths continue to influence contemporary thinking about cannabis In *The African Roots of Marijuana* Chris S Duvall corrects common misconceptions while providing an authoritative history of cannabis as it flowed into throughout and out of Africa Duvall shows how preexisting smoking cultures in Africa transformed the plant into a fast acting and easily dosed drug and how it later became linked with global capitalism and the slave trade People often used cannabis to cope with oppressive working conditions under colonialism as a recreational drug and in religious and political movements This expansive look at Africa s importance to the development of human knowledge about marijuana will challenge everything readers thought they knew about one of the world s most ubiquitous plants
