Of Problematology Philosophy Science And Language:

Of Problematology Michel Meyer, 1995-08-15 Michel Meyer offers a new beginning for philosophy rooted in a theory of questioning that he calls problematology Meyer argues that a new beginning is necessary in order to resituate philosophy science and linguistic analysis and he proposes a global view of rationality by returning to the nature of questioning itself For Meyer philosophy does not solve problems or give answers but instead shows how propositions are related to a whole field of questions that give them meaning Reason is identified not with answers but with the question answer process Meyer pursues this new theory of reason and meaning in a critique of Western philosophy from Socrates Plato and Aristotle through Heidegger Wittgenstein and Foucault He provides a detailed analysis of Descartes notion of radical doubt and demonstrates its implications for the subsequent philosophical tradition that ignored the questioning process while pursuing an unshakable foundation for knowledge Meyer argues that recent work in rhetoric points toward a theory of radical questioning and claims that the methods of rhetoric and argumentation must be turned back on philosophy itself in order to recover the original significance of metaphysics as the science of ultimate questions

Philosophy and the Passions Michel Meyer, Robert F. Barsky, 2000 The subject of the passions has always haunted Western philosophy and more often than not aroused harsh judgments For the passions represent a force of excess and lawlessness in humanity that produces troubling confusing paradoxes In this book noted European philosopher Michel Meyer offers a wide ranging exegesis the first of its kind that systematically retraces the history of philosophic conceptions of the passions in the work of such thinkers as Plato Aristotle Augustine Spinoza Descartes Hobbes Rousseau Kant and Freud The great ruptures that led to passion s condemnation as sin and to its romantic exultation as the truth of existence are meticulously registered and the logic governing them astutely explicated Meyer thus provides new insight into an age old dilemma Does passion torture people because it blinds them or on the contrary does it permit

them to apprehend who and what we really are

All About Science: Philosophy, History, Sociology &

Communication Lui Lam, Maria Burguete, 2014-10-15 There is a lot of confusion and misconception concerning science The nature and contents of science is an unsettled problem For example Thales of 2 600 years ago is recognized as the father of science but the word science was introduced only in the 14th century the definition of science is often avoided in books about philosophy of science This book aims to clear up all these confusions and present new developments in the philosophy history sociology and communication of science It also aims to showcase the achievement of China s top scholars in these areas The 18 chapters divided into five parts are written by prominent scholars including the Nobel laureate Robin Warren sociologist Harry Collins and physicist turned historian Dietrich Stauffer

Michel Meyer's Problematology Nick Turnbull, 2014-04-10 In today s society everything is in question The reflexive questioning of modernity has fundamentally problematized society including philosophy which has experienced a crisis of metaphysics Michel Meyer s problematology answers this crisis by questioning questioning unfolding a new way of doing philosophy with special relevance for the study of society In this first ever extended treatment of Meyer s work Nick Turnbull examines the main features of problematology including the principle of questioning and the deduction of an original conception of difference based on the question answer relationship Turnbull shows how these concepts produce new perspectives in the philosophy of the emotions history meaning politics rhetoric and science He applies Meyer s ideas to key questions in the philosophy of social science showing how problematology offers important insights for understanding contemporary society The book compares problematology with the work of well known thinkers including Bourdieu Castoriadis Collingwood Derrida Dewey Gadamer Heidegger and Lyotard Turnbull uses problematology and rhetoric to explain how meaning is constructed through practice in the negotiation of social distance

Advancing Information Systems Theories, Volume II Leslie P. Willcocks, Nik R. Hassan, Suzanne Rivard, 2023-10-14 Information systems research IS is an exciting multidisciplinary area that links the rapidly changing technology of information or communications and information technology ICT to the business and social environment Lately the discourse surrounding information and systems has leaped into the consciousness of the public in unprecedented ways through the rise of social media the Internet of Things IoT fake news and the weaponization of information to name a few Unfortunately it has been felt that these developments are overtaking the ability of the IS field to address them in part because the field itself lacks its own native theories It is well known that the IS field undertakes its research using theories from its reference disciplines such as management social psychology economics communication and computer science but what this book offers is a clarification and implementation of the discipline s own foundational theory This book is the companion volume to *Advancing Information Systems Theories Volume I* and part of a three part series that aims to advance IS research This volume addresses the products of information systems theories examining design principles information practice principles for robotics and other concepts integral to developing theory The book will be of interest to academics

The Genres of Rhetorical Speeches in Greek and Roman Antiquity Cristina Pepe,2013-09-12 In The Genres of Rhetorical Speeches in Greek and Roman Antiquity Cristina Pepe offers a complete overview of the concept of speech genre within ancient rhetoric By analyzing sources dating from the 5th 4th century BC the author proves that the well known classification in three rhetorical genres deliberative judicial epideictic introduced by Aristotle was rooted in the debate concerning the forms and functions of the art of persuasion in classical Athens Genres play a leading role in Aristotle's Rhetoric and the analysis of considerable sections of the treatise shows profound links between the characterization of the rhetorical genres and Aristotelian philosophy as a whole Finally the volume explores the developments of the theory of genres in Hellenistic and Imperial rhetoric

Fundamentals of Argumentation Theory Frans H. van Eemeren,Rob Grootendorst,Ralph H. Johnson,Christian Plantin,Charles A. Willard,2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry It draws its data assumptions and methods from disciplines as disparate as formal logic and discourse analysis linguistics and forensic science philosophy and psychology political science and education sociology and law and rhetoric and artificial intelligence This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research Argument has been the subject of systematic inquiry for twenty five hundred years It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject It is precisely on this account that this volume is offered to all the constituent research communities and their students Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program Because the chapters are self contained they can be consulted in the order of a reader's interests or research requirements But there is value in reading the work in its entirety Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field

Difference is in many ways a curious book. It is a scholarly book but tests the boundaries of traditional academic methods. It is a philosophical book but bases its arguments on observational studies in classrooms where Danish, Russian, Spanish, and Chinese schoolchildren are taught in their native languages. It is a demanding book, one that assumes its readers think for themselves. Yes, it is also a generous book which draws on the author's own experience in researching and exploring what it means to be human across a variety of thoughts and behavioural patterns.

Arguing to Learn Jerry Andriessen, Michael Baker, Dan D. Suthers, 2013-04-17. *Arguing to Learn: Confronting Cognitions in Computer Supported Collaborative Learning Environments* focuses on how new pedagogical scenarios, task environments, and communication tools within Computer Supported Collaborative Learning (CSCL) environments can favour collaborative and productive confrontations of ideas, evidence, arguments, and explanations or arguing to learn. This book is the first that has assembled the work of internationally renowned scholars on argumentation-related CSCL research. All chapters present in-depth analyses of the processes by which the interactive confrontation of cognitions can lead to collaborative learning on the basis of a wide variety of theoretical models, empirical data, and Internet-based tools.

Jonathan Lethem James Peacock, 2013-07-19. Jonathan Lethem is the first full-length study dedicated to the work of an exciting genre-busting contemporary writer with an increasingly high profile in American literature. Examining all of Lethem's novels as well as a number of his short fictions, essays, and critical works, this study shows how the author's prolific output, his restlessness, and his desire always to be subverting literary forms and genres are consistent with his interest in subcultural identities. The human need to break off into small groupings, subcultures, or miniature utopias is mirrored in the critical tendency to enforce generic boundaries. To break down the boundaries between genres then is partly to make a nonsense of critical distinctions between high and low literature and partly to reflect the wider need to recognise difference, to appreciate that other people, no matter how outlandish and alien they may appear, share similar desires, experiences, and problems. With this in mind, James Peacock argues that Lethem's experiments with genre are not merely games or elaborate literary jokes but ethical necessities, particularly when viewed in the light of the losses and traumas that shadow all of his writing. Jonathan Lethem therefore makes an important contribution not just to Lethem studies but also to debates about genre and its position in postmodern or post-postmodern literature. It will be of interest to all scholars and students of contemporary American writing as well as those interested in genre fiction and literature's relationship with subcultures.

Homiletical Theology David Schnasa Jacobsen, 2015-02-13. Karl Barth famously argued that all theology is sermon preparation. But what if all sermon preparation is actually theology? This book pursues a thoroughgoing theological vision for the practice of preaching as a way of doing theology. The idea is not just that homiletics is the realm of theological application. That would leave preaching in the position of simply implementing a theology already arrived at. Instead, the vision in these pages is of a form of theology that begins with preaching itself, its practice, its theories, and its contexts. Homiletical theology is thus a unique way of doing theology, even a constructive

theological task in its own right Homiletics David Schnasa Jacobsen has assembled several of the leading lights of contemporary homiletics to help to see its task ever more deeply as theological yet in profoundly diverse ways Along the way readers will not only discover how homiletics do theology homiletically but will deepen the way in which they understand their own preaching as a theological task Contributors include Ronald J Allen Professor of Preaching and Gospels and Letters at Christian Theological Seminary John S McClure Charles G Finney Professor of Preaching and Worship at Vanderbilt Divinity School Alyce M McKenzie George W and Nell Ayers Le Van Professor of Preaching and Worship at Perkins School of Theology Southern Methodist University Michael Pasquarello III Granger E and Anna A Fisher Professor of Preaching at Asbury Theological Seminary Luke A Powery Dean of the Chapel and Associate Professor of the Practice of Homiletics at Duke University Teresa Stricklen Eisenlohr Ph D Associate for Worship Office of Theology and Worship at the Presbyterian Church U S A
