Of War And Wars Alarms Fiction And Politics In The Modern World:

South Asia's Nuclear Security Bhumitra Chakma, 2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region's nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue It also analyses the causes and consequences of nuclear arms race between India and Pakistan the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia's nuclear deterrence Second it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan The author holds that the debate on South Asia's nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists It is argued that while the risks of nuclear weapons are significant it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future Therefore what needs to happen is that while nuclear elimination should be the long term goal in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non state actors Security in 21st Century Europe Andrew Cottey, 2025-05-01 The nature of security in Europe has been transformed in recent years Security in 21st Century Europe argues that the defining feature of contemporary European security is the existence of a security community underpinned by the twin institutions of the EU and NATO but that today the European security community NATO and the EU face a growing array of external challenges and their ability to respond to those challenges is increasingly being called into question Offering a systematic assessment of security in contemporary Europe this third edition examines the changing character of European security and assesses the extent of the threats posed by recent challenges as well as the policy dilemmas involved in responding to these challenges It explores Europe's engagement with core thematic issues in European security including military intervention nuclear weapons terrorism and non military security Providing both a substantive contribution to academic thinking on European security and a overview of debates on contemporary European security this new edition offers 3 new chapters on migration climate change and cybersecurity Coverage of all recent major developments related to European security including the Syrian civil war and the regional destabilization arising from it Russia Ukraine crisis the rise of populism the migration crisis the acceleration of China's rise Security in 21st Century Europe combines theory and detailed empirical analysis exploring both how different theoretical perspectives can help us think about European security and concrete empirical developments in European security policies and institutions This text is the perfect companion for advanced undergraduate and Master's level courses on European security whether within courses in Security studies European studies or International Relations *The Routledge Handbook of European Security Law and*

Policy E. Conde, Zhaklin V. Yaneva, Marzia Scopelliti, 2019-10-11 The Handbook of European Security Law and Policy offers a holistic discussion of the contemporary challenges to the security of the European Union and emphasizes the complexity of dealing with these through legislation and policy. Considering security from a human perspective, the book opens with a general introduction to the key issues in European Security Law and Policy before delving into three main areas: Institutions, policies and mechanisms used by Security Defence Policy and Internal Affairs form the conceptual framework of the book; at the same time, an extensive analysis of the risks and challenges facing the EU, including threats to human rights and sustainability, as well as the European Union's legal and political response to these challenges is provided. This Handbook is essential reading for scholars and students of European law, security law, EU law and interdisciplinary legal and political studies.

International Security Studies Peter Hough, Andrew Moran, Bruce Pilbeam, 2025-08-11 Fully revised to incorporate recent developments, this third edition of *International Security Studies* provides students with a comprehensive and accessible textbook on security with a particular emphasis on the use of case studies to illustrate theoretical debates. In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics, including covering both traditional military and non-military security issues such as nuclear proliferation, humanitarian intervention, food security and environmental security. Unlike most standard textbooks, the volume also offers a wide range of case studies, including chapters on the US, China, the Middle East, Russia, East Africa and the Arctic, providing detailed analyses of important global security issues and the application of theoretical debates to major contemporary issues. The 36 chapters contain pedagogical features such as textboxes, summary points and recommended further reading and are divided into five thematic sections: Conceptual and theoretical, Military security, Non-military security, Institutions and security, and Case studies. This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy and International Relations in general.

Biopolitics of Security Michael Dillon, 2015-02-11 Taking its inspiration from Michel Foucault, this volume of essays integrates the analysis of security into the study of modern political and cultural theory. Explaining how both politics and security are differently problematised by changing accounts of time, the work shows how, during the course of the 17th century, the problematisation of government and rule became newly enframed by a novel account of time and human finitude, which it calls *factual finitude*. The correlate of *factual finitude* is the *infinite*, and the book explains how the problematisation of politics and security became that of securing the infinite government of finite things. It then explains how concrete political form was given to *factual finitude* by a combination of geopolitics and biopolitics. Modern sovereignty required the services of biopolitics from the very beginning. The essays explain how these politics of security arose at the same time, changed together and have remained closely allied ever since. In particular, the book explains how biopolitics of security changed in response to the molecularisation and digitalisation of Life and demonstrates how this has given rise to the dangers and

contradictions of 21st century security politics This book will be of much interest to students of political and cultural theory critical security studies and International Relations Quarterly Review of Military Literature ,1994 Review of Current Military Literature ,1991 **Security Webs and 21st Century Threats** Isaac M. Human Security Mary Kaldor, 2013-05-03 There is a real security gap in the world today Millions of people in regions like the Middle East or East and Central Africa or Central Asia where new wars are taking place live in daily fear of violence Moreover new wars are increasingly intertwined with other global risks the spread of disease vulnerability to natural disasters poverty and homelessness Yet our security conceptions drawn from the dominant experience of World War II and based on the use of conventional military force do not reduce that insecurity rather they make it worse This book is an exploration of this security gap It makes the case for a new approach to security based on a global conversation a public debate among civil society groups and individuals as well as states and international institutions The chapters follow on from Kaldors path breaking analysis of the character of new wars in places like the Balkans or Africa during the 1990s The first four chapters provide a context they cover the experience of humanitarian intervention the nature of American power the new nationalist and religious movements that are associated with globalization and how these various aspects of current security dilemmas have played out in the Balkans The last three chapters are more normative dealing with the evolution of the idea of global civil society the relevance of just war theory in a global era and the concept of human security and what it might mean to implement such a concept This book will appeal to all those interested in issues of peace and conflict in particular to students of politics and international relations

Department of the Army, 1976 **Security and Environment in the Mediterranean** Hans Günter Brauch, 2003 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century **Strategy in the Contemporary World** John Baylis, James J. Wirtz, Colin S. Gray, 2019 A complete introduction to strategy in the contemporary world which critically explores the enduring present and emerging issues dominating the field of strategy 4e de couv **Drones and Global Order** Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28 This book explores the implications of drone warfare for the legitimacy of global order The literature on drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal moral and ethical impacts These three waves of scholarship do not however address the implications of drone warfare for global order This book fills the gap by contributing to a fourth wave of literature concerned with the trade offs imposed by drone warfare for global order The book draws on the English School of International Relations Theory which is premised on the existence of a society of states bounded by common norms values and institutions to argue that drone warfare imposes contradictions on the structural and

normative pillars of global order These consist of the structure of international society and diffusion of military capabilities as well as the sovereign equality of states and laws of armed conflict The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored rigorously drone warfare can sometimes strengthen global order The volume concludes by proposing a research agenda to reconcile the complex and often counter intuitive impacts of drone warfare for global order This book will be of considerable interest to students of security studies global governance and International Relations

Theorising Future Conflict Mark Lacy, 2023-12-15 This book explores the changing tactics technologies and terrains of twenty first century war It argues that the world in 2049 is unlikely to look like the climate change artificial intelligence AI dystopia depicted in Blade Runner 2049 but nor will it be a world where conflict and war has been transformed by a civilising process that eradicates violence and conflict from the human condition 2049 is also the year that the US Department of Defense has suggested China will become a world shaping military power All states will be engaged in arms races across a variety of new tools and technologies from drones robotics AI and quantum computing that will transform politics economy society and war Drawing on thinkers such as Zygmunt Bauman and Paul Virilio the book suggests that future war will be shaped by three broad tendencies that include a broad range of tactics technologies and trends the impure the granular and the machinic Through discussions of cybersecurity urban war robotics AI climate change science fiction and new strategic concepts it examines how these tendencies might evolve in the different geopolitical futures and types of war ahead of us The book provides a thought provoking and distinctive framework through which to think about the changing character of war It concludes that for all the novel and dangerous challenges ahead the futuristic possibilities of warfare will likely continue to be shaped by problems familiar to students of international relations and the history of war albeit problems that will play out in geopolitical and technological contexts that we have never encountered before This book will be of much interest to students of critical war studies security studies science and technology studies and International Relations in general
