On the Genealogy of Color Zed Adams,2015-10-16 In *On the Genealogy of Color* Zed Adams argues for a historicized approach to conceptual analysis by exploring the relevance of the history of color science for contemporary philosophical debates about color realism Adams contends that two prominent positions in these debates Cartesian anti realism and Oxford realism are both predicated on the assumption that the concept of color is ahistorical and unrevisable Adams takes issue with this premise by offering a philosophical genealogy of the concept of color This book makes a significant contribution to recent debates on philosophical methodology by demonstrating the efficacy of using the genealogical method to explore philosophical concepts and will appeal to philosophers of perception philosophers of mind and metaphysicians

A Cultural History of Color in Antiquity David Wharton,2022-08-31 *A Cultural History of Color in Antiquity* covers the period 3000 BCE to 500 CE Although the smooth white marbles of Classical sculpture and architecture lull us into thinking that the color world of the ancient Greeks and Romans was restrained and monochromatic nothing could be further from the truth Classical archaeologists are rapidly uncovering and restoring the vivid polychrome nature of the ancient built environment At the same time new understandings of ancient color cognition and language have unlocked insights into the ways often unfamiliar and strange to us that ancient peoples thought and spoke about color Color shapes an individual s experience of the world and also how society gives particular spaces objects and moments meaning The 6 volume set of the *Cultural History of Color* examines how color has been created traded used and interpreted over the last 5000 years The themes covered in each volume are color philosophy and science color technology and trade power and identity religion and ritual body and clothing language and psychology literature and the performing arts art architecture and interiors and artefacts David Wharton is Associate Professor of Classical Studies at the University of North Carolina at Greensboro USA Volume 1 in the *Cultural History of Color* set General Editors Carole P Biggam and Kirsten Wolf

Readings on Color: The philosophy of color Alex Byrne,David R. Hilbert,1997 **Myth and Metaphysics in Plato's *Phaedo*** David A. White,1989 This study intends principally to isolate and describe the function of myth in the *Phaedo* in order to show its effect on the complex metaphysics developed throughout the dialogue It further illustrates how these metaphysical concepts structure the dialogue s concluding eschatological myth

Our Knowledge of the Internal World Robert Stalnaker,2010-07 Starting in the middle Epistemic possibilities and the knowledge argument Locating ourselves in the world Notes on models of self locating belief Phenomenal and epistemic indistinguishability Acquaintance and essence Knowing what one is thinking After the fall Phenomenology of Perception Carmelo Cali,2017-03-06 *Phenomenology of Perception* Theories and Experimental Evidence reconstructs and reviews the phenomenological research of the Brentano

School Edgar Rubin David Katz Albert Michotte and Gestalt psychology Phenomenology is commonly considered a philosophy of subjective experience but this book presents it instead as a set of commitments for philosophy and science to discover the immanent grammar underlying the objective meaning of perception Pioneering experimental results on the qualitative and quantitative structures of the perceptual world are collected to show that contrary to the received assumption phenomenology can be embedded in standard science This book will therefore be of interest not only to phenomenologists but also to anyone concerned with epistemological and empirical issues in contemporary psychology and the cognitive sciences

Abstraction in Art and Nature Nathan Cabot Hale, 2012-06-19 In this stimulating thought provoking guide a noted sculptor and teacher demonstrates how to discover a rich new design source in the abstractions inherent in natural forms Through systematic study of such properties as line form shape mass pattern light and dark space proportion scale perspective and color as they appear in nature students can learn to utilize the infinite variety and diversity of those elements as a wellspring of creative abstraction The author invites students to learn the necessary techniques through a series of projects devoted to exploring and drawing plants animals birds landscapes seascapes skies and more Lines of growth and structure water and liquid forms weather and atmospheric patterns luminosity in plants and animals earth colors and lightning are among the sources of abstraction available to the artist who is aware of them This book will train you to see and use these elements and many more An intriguing blend of art psychology and the natural sciences Abstraction in Art and Nature is profusely illustrated with over 370 photographs scientific illustrations diagrams and reproductions of works by the great masters It not only offers a mind stretching new way of learning and teaching basic design but deepens our awareness of the natural environment In short Mr Hale s book is an indispensable guide that artists teachers and students will want to have close at hand for instruction inspiration and practical guidance

The Structure of Appearance Nelson Goodman, 2012-12-06 With this third edition of Nelson Goodman s The Structure of Appearance we are pleased to make available once more one of the most influential and important works in the philosophy of our times Professor Geoffrey Hellman s introduction gives a sustained analysis and appreciation of the major themes and the thrust of the book as well as an account of the ways in which many of Goodman s problems and projects have been picked up and developed by others Hellman also suggests how The Structure of Appearance introduces issues which Goodman later continues in his essays and in the Languages of Art There remains the task of understanding Goodman s project as a whole to see the deep continuities of his thought as it ranges from logic to epistemology to science and art to see it therefore as a complex yet coherent theory of human cognition and practice What we can only hope to suggest in this note is the broad Significance of Goodman s apparently technical work for philosophers scientists and humanists One may say of Nelson Goodman that his bite is worse than his bark Behind what appears as a cool and methodical analysis of the conditions of the construction of systems there lurks a radical and disturbing thesis that the world is in itself no more one way than another nor are we It depends on the

Creating Art for All Ages Frances Flicker, Jacqueline G. Van Schooneveld, Jeanne Richins, 2020-10-23 This is the third book in the series Creating Art for All Ages The series takes students on an interdisciplinary cross content journey Each book provides experiences in language arts social studies math and art as the students investigate ancient and modern civilizations Industry and Imagination in Ancient and Modern Civilizations is the third book of the series and examines the generations of the Industrial Revolution society during WWI and WWII Modern and Contemporary times During the era of the Industrial Revolution the role of the artist transformed as the patronage changed and advancements in photography were able to portray likenesses The artist sought new avenues by using art as an expressive tool As time progressed artistic expression navigated the art into innovative imaginative and unique styles Art became whatever the artist intended it to be

The Aesthetics of Atmospheres Gernot Böhme, 2016-09-13 Interest in sensory atmospheres and architectural and urban ambiances has been growing for over 30 years A key figure in this field is acclaimed German philosopher Gernot Böhme whose influential conception of what atmospheres are and how they function has been only partially available to the English speaking public This translation of key essays along with an original introduction charts the development of Gernot Böhme's philosophy of atmospheres and how it can be applied in various contexts such as scenography commodity aesthetics advertising architecture design and art The phenomenological analysis of atmospheres has proved very fruitful and its most important and successful application has been within aesthetics The material background of this success may be seen in the ubiquitous aestheticization of our lifeworld or from another perspective of the staging of everything every event and performance The theory of atmospheres becoming an aesthetic theory thus reveals the theatrical not to say manipulative character of politics commerce of the event society But taken as a positive theory of certain phenomena it offers new perspectives on architecture design and art It made the spatial and the experience of space and places a central subject and

hence rehabilitated the ephemeral in the arts Taking its numerous impacts in many fields together it initiated a new humanism the individual as a living person and his or her perspective are taken seriously and this fosters the ongoing democratization of culture in particular the possibility for everybody to participate in art and its works Color Psychology
