Introduction to Critical Theory David Held, 2013-06-26 The writings of the Frankfurt school in particular of Horkheimer Adorno Marcuse and Jurgen Habermas caught the imagination of the radical movements of the 1960s and 1970s and became a key element in the Marxism of the New Left Partly due to their rise to prominence during the political turmoil of the 1960s the work of these critical theorists has been the subject of continuing controversy in both political and academic circles However their ideas are frequently misunderstood In this major work now available from Polity Press David Held presents a much needed introduction to and evaluation of critical theory Some of the major themes he considers are critical theory's relation to Marx's critique of political economy Freudian psychoanalysis aesthetics and the philosophy of history There is also an extended discussion of critical theory's substantive contribution to the analysis of capitalism culture the family the individual as well as its contribution to epistemology and methodology

demands of civil government over the self reflective demands of dialectical social philosophies By proposing contextualist intellectual history as a form of critical theory Critical International Theory defends a mode of historical critique that refuses the normative temptations to project present conceptions onto an alien past and to abstract from the offices of civil government

International Relations' Last Synthesis? J. Samuel Barkin, Laura Sjoborg, 2019-02-12 Many scholars intentionally or unintentionally have entangled constructivisms and critical theories in problematic ways either by assigning a critical theoretical politics to constructivisms or by assuming the appropriateness of constructivist epistemology and methods for critical theorizing IR s Last Synthesis makes the argument that these connections mirror IR s grand theoretical syntheses of the 1980s and 1990s and have similar constraining effects

on the possibilities of IR theory They have been made without adequate reflection in contradiction to the base assumptions of each theoretical perspective and to the detriment of both knowledge accumulation about global politics and theoretical rigor in disciplinary IR It is not that constructivisms and critical theories have no common ground rather the fact that it has become routine for IR scholars to overstate their common ground is counterproductive to the discovery and utilization of their potential dialogues To that end IR s Last Synthesis argues that scholars using the two in conjunction should be cognizant of rather than gloss over the tensions between the approaches and the tools they have to offer Along these lines the book uses the concept of affordances to look at what each has to offer the other and to argue for a modest reflective specified return to constructivist and critical IR theorizing By rejecting its over simple syntheses this book hews a road toward reviving IR theorizing
