Wilde's Other Worlds Michael F. Davis, Petra Dierkes-Thrun, 2018-05-16 Taking its cue from Baudelaire's important essay *The Painter of Modern Life* in which Baudelaire imagines the modern artist as a man of the world this collection of essays presents Oscar Wilde as a man of the world who eschewed provincial concerns cultural conventions and narrow national interests in favor of the wider world and other worlds both real and imaginary geographical and historical physical and intellectual which provided alternative sites for exploration and experience often including alternative gender expression or sexual alterity Wilde had an unlimited curiosity and a cosmopolitan spirit of inquiry that traveled widely across borders ranging freely over space and time He entered easily and wholly into other countries other cultures other national literatures other periods other mythologies other religions other disciplines and other modes of representation and was able to fully inhabit and navigate them quickly apprehending the conventions by which they operate The fourteen essays in this volume offer fresh critical theoretical and historical perspectives not just on key connections and aspects of Wilde's oeuvre itself but on the development of Wilde's remarkable worldliness in dialogue with many other worlds contemporary developments in art science and culture as well as with other national literatures and cultures Perhaps as a direct result of this cosmopolitan spirit Wilde and Wilde's works have been taken up across the globe as the essays on Wilde's reception in India Japan and Hollywood illustrate Many of the essays gathered here are based on groundbreaking archival research including some never seen before illustrations Together they have the potential to open up important new comparative transnational and historical perspectives on Wilde that can shape and sharpen our future understanding of his work and impact

The Modern Stage and Other Worlds (Routledge Revivals) Austin E. Quigley, 2015-08-11 Modern plays are strikingly diverse and as a result any attempt to locate an underlying unity between them encounters difficulties to focus on what they have in common is often to overlook what is of primary importance in particular plays to focus on their differences

is to note the novelty of the plays without increasing their accessibility. In this study first published in 1985, Austin E. Quigley takes as his paradigm case the relationship between the world of the stage and the world of the audience and explores various modes of communication between domains. He asks how changes in the structure of the drama relate to changes in the structure of the theatre and changes in the role of the audience. Detailed interpretations of plays by Pinero, Ibsen, Strindberg, Brecht, Ionesco, Beckett, and Pinter question principles about the modern theatre and establish links between drama structure and theatre structure, theme and performance space. *Other Worlds, Other Bodies* Emily Pierini, Alberto Groisman, Diana Espírito Santo, 2023-02-10. When approaching the multiplicity of the spiritual experiences of healing, ethnographers are often presented with ideas of the existence of other worlds that may intersect with the so-called material or physical worlds. This book proposes a sensory ethnography of healing with a focus on ethnographic knowing as embedded in an embodied epistemology of healing. Epistemological embodiment signals that personal scholarly experience of the unknown, be it in the form of trance or as the embodiment of an other, shapes the concepts of healing, body, trance, self, and matter by which ethnographers craft out analysis. *Otherworlds* Aisling Nora Byrne, 2016. This book offers a new perspective on the otherworlds of medieval literature. These fantastical realms are among the most memorable places in medieval writing by turns beautiful and monstrous, alluring and terrifying. Passing over a river or sea or entering into a hollow hill, heroes come upon strange and magical realms. These places are often very beautiful, filled with sweet music and adorned with precious stones and rich materials. There is often no darkness; time may pass at a different pace, and the people who dwell there are usually supernatural. Sometimes such a place is exactly what it appears to be, the land of heart's desire, but the otherworld can also have a sinister side, trapping humans and keeping them there against their will. *Otherworlds: Fantasy and History in Medieval Literature* takes a fresh look at how medieval writers understood these places and why they found them so compelling. It focuses on texts from England but places this material in the broader context of literary production in medieval Britain and Ireland. The narratives examined in this book tell a rather surprising story about medieval notions of these fantastical places. Otherworlds are actually a lot less other than they might initially seem. Authors often use the idea of the otherworld to comment on very serious topics. It is not unusual for otherworld depictions to address political issues in the historical world. Most intriguing of all are those texts where locations in the real world are reimagined as otherworlds. The regions on which this book focuses, Britain, Ireland, and the surrounding islands, prove particularly susceptible to this characterization. **Fantastic Metamorphoses, Other Worlds** Marina Warner, 2002-10-10. Metamorphosis is a dynamic principle of creation vital to natural processes of generation and evolution, growth and decay, yet it also threatens personal identity if human beings are subject to a continual process of bodily transformation. Shape-shifting also belongs in the landscape of magic, witchcraft, and wonder and enlivens classical mythology, early modern fairy tales, and uncanny fictions of the nineteenth and twentieth centuries. This collection of essays, given as the Clarendon Lectures in English, 2001, takes four

dominant processes of metamorphosis Mutating Hatching Splitting and Doubling and explores their metaphorical power in the evocation of human personality Marina Warner traces this story against a background of historical encounters with different cultures especially with the Caribbean Beginning with Ovid's great poem *The Metamorphoses* as the founding text of the metamorphic tradition she takes us on a journey of exploration into the fantastic art of Hieronymous Bosch the legends of the Taino people the life cycle of the butterfly the myth of Leda and the Swan the genealogy of the Zombie the pantomime of Aladdin the haunting of doppelgangers the coming of photography and the late fiction of Lewis Carroll **Other Worlds and Their Relation to This World** Tobias Nicklas, Joseph Verheyden, Erik M.M. Eynikel, Florentino Garcia Martinez, 2010-09-06
