Off on a Comet Jules Verne, 2020-03-20 Nothing sir can induce me to surrender my claim I am sorry count but in such a matter your views cannot modify mine But allow me to point out that my seniority unquestionably gives me a prior right Mere seniority I assert in an affair of this kind cannot possibly entitle you to any prior claim whatever Then captain no alternative is left but for me to compel you to yield at the sword s point As you please count but neither sword nor pistol can force me to forego my pretensions Here is my card And mine This rapid altercation was thus brought to an end by the formal interchange of the names of the disputants On one of the cards was inscribed _Captain Hector Servadac Staff Officer Mostaganem _On the other was the title _Count Wassili Timascheff On board the Schooner Dobryna _It did not take long to arrange that seconds should be appointed who would meet in Mostaganem at two o clock that day and the captain and the count were on the point of parting from each other with a salute of punctilious courtesy when Timascheff as if struck by a sudden thought said abruptly Perhaps it would be better captain not to allow the real cause of this to transpire

Off on a Comet! Jules Verne, 2019-03-19 Among so many effective and artistic tales it is difficult to give a preference to one over all the rest Yet certainly even amid Verne s remarkable works his Off on a Comet must be given high rank Perhaps this story will be remembered when even Round the World in Eighty Days and Michael Strogoff have been obliterated by centuries of time At least of the many books since written upon the same theme as Verne s no one has yet succeeded in equaling or even approaching it In one way Off on a Comet shows a marked contrast to Verne s earlier books Not only does it invade a region more remote than even the Trip to the Moon but the author here abandons his usual scrupulously scientific attitude In order that he may escort us through the depths of immeasurable space show us what astronomy really knows of conditions there and upon the other planets Verne asks us to accept a situation frankly impossible The earth and a comet are brought twice into collision without mankind in general or even our astronomers becoming conscious of the fact Moreover several people from widely scattered places are carried off by the comet and returned uninjured Yet further the comet snatches for the convenience of its travelers both air and water Little useful tracts of earth are picked up and as it were turned over and clapped down right side up again upon the comet s surface Even ships pass uninjured through this remarkable somersault These events all belong frankly to the realm of fairyland
