Off The Shelf De Rijke Marsh Morgan:

Off the Shelf DRMM (Firm), 2001 The intention of this book is to reveal the links between practice and theory as demonstrated by the work of de Rijke Marsh Morgan dRMM and their students at the AA Back cover **British Built** Lucy Bullivant, 2005-09-22 For a while now the Young British Artists have been soaking up the international limelight thanks to a sensibility that is at once outrageous and thoughtful Architecture of course always takes a while to catch up to the other arts but now finally Britain has emerged as one of the world's most fertile breeding grounds for international design talent Catalyzed by such leading international architecture schools as the Architectural Association and the Bartlett a new wave of architects from home and abroad is combining local and global styles in exciting new buildings and projects Post Imperial British designers are indeed synthesizing foreign cultures with Western conditions in an entirely original way Profiling Britain's most dynamic and intriguing practices **British Built** features projects by S333 Caruso St John Alison Brooks Foreign Office Architects FOA muf Allford Hall Monaghan Morris Gollifer Langston de Rijke Marsh Morgan dRMM Kathryn Findlay FAT Adjaye Associates Sergison Bates Klein Dytham Architects KDa and Deborah Saunt David Hills Architects **British Built** the sequel to our successful *SuperDutch* includes studio profiles and essays outlining the unique characteristics of the British architect working today and presenting an even younger generation of architects whose stars are only just appearing on the horizon including atopia softroom dECOi and Tonkin Liu among many others **Auf der Suche nach dem verlorenen Raum** Gerhard Mack, 2002 The house of stone is the kind of project that happens only rarely a house built to the highest standards of craftsmanship with the full support of the client who acted as a patron of architecture in almost a Renaissance sense This publication documents in full its making It covers the initial phase of the project the invited competition between Meili Peter and Peter Zumthor and contains a detailed description of the concepts underlying the design A particular focus is the relation between the structural and the technical aspects of the project which is described through engineering and working drawings as well as photographs of the house under construction **AA Files**, 2001 **Le Corbusier & the Architecture of Reinvention** Tim Benton, Peter Carl, Hilde Heynen, Charles Jencks, Le Corbusier, 2003 Charles Edouard Jeanneret set about the task of reinventing everything he had touched from himself to architecture Famously he began with his own name His resonant pseudonym Le Corbusier meant crow like and he spent most of his career observing the wide horizon of worldwide developments **Sub-urbanism and the Art of Memory** Sébastien Marot, 2003 Challenging the dominant role of the programme in regulating the design project Marot argues that instead attention should be redirected towards the site *Projects Review*, 2001 **RIBA Journal**, 2001-07 *Architecture Today*, 2001 *The Architects' Journal*, 2004-07 **Chroma** Barbara Glasner, Petra Schmidt, 2009-10-16 Designers and architects have to make decisions regarding color every day But how does one find the necessary inspiration The appropriate color How do other designers and artists deal with the issue With *Chroma* the Greek word for color as its title this illustrated book provides answers to these

questions and makes it clear that color is much more than mere decoration it is one of the central problems of creative work In the process Chroma embraces the sensuous experience of color inspiring and seducing the reader with unusual projects from industrial products to color field painting The book presents works by younger designers like Stefan Diez and Arik Levy as well as famous artists like Ellsworth Kelly All of the works are presented in large scale reproductions and also in a kind of color gradient in which they are assigned to the chapters monochromatic multichromatic and achromatic The spectrum encompasses all conceivable shades and combinations from brilliant and colorful through tasteful and subdued all the way to black and white contrasts An additional chapter analyzes the work of outstanding artists architects and designers like Gerhard Richter Konstantin Grcic and Sauerbruch Hutton who grapple with color to an unusual degree and have formulated characteristic chromatic worlds An alphabetical index provides background information on the artists and studios selected
