relationships among poets patrons and printers which led to a new conception of authorship Examining such paratextual
elements of manuscripts as title pages colophons and illustrations as well as such literary strategies as experimentation with
narrative voice Brown traces authors attempts to underscore their narrative presence in their works and to displace patrons
from their role as sponsors and protectors of the book Her accounts of the struggles of poets including Jean Lemaire Jean
Bouchet Jean Molinet and Pierre Gringore over the design printing and sale of their books demonstrate how authors secured
the status of literary proprietor during the transition from the culture of script and courtly patronage to that of print

Empirical Analysis of the German Market Justyna Dietrich, 2012-03 Underpricing refers to the phenomenon of abnormal
first day returns from initial public offerings IPOs Without doubt any US investor would agree that one day returns of 11 4%
on average are exceptional and a worthwhile investment Since then many studies have proven that it is a persistent

phenomenon and also occurs on markets all over the world The most puzzling question for scientists is why companies are leaving this money on the table and do not set an offering price that reflects the market demand at the offering date The main focus of this paper is whether and how the findings of past research primarily conducted for the US market apply to the German IPO market As a result both investors and issuers shall receive practical implications for their decision making within the IPO process This study comprises a brief description of some important theoretical aspects that shape the price setting of an IPO It focuses on business valuation as it is the basis for setting the price of an IPO Furthermore the most common price setting mechanisms are explained Past research results and theories with regard to IPO underpricing will be outlined and put into relation to the upcoming analysis This also includes the long run performance of IPOs and deals especially with the question of whether IPOs are systematically overvalued by investors and if so why The empirical analysis consists of a deduction of influencing variables and an applying theoretical model Finally OLS results will be presented and interpreted which also includes practical implications for both issuers and investors
