*Entrepreneurial Science* Robert F. Johnston, 1987-09-22 Johnston and Edwards propose that high technology will be at the heart of the United States economy as it enters the 21st century They also state that small business will be the key to the expansion of the United States economy in the year 2000 In this volume the authors analyze some significant trends that tend to support their proposals Drawing upon case studies from the bio technology and microelectronics industries they discuss how changing the relationship between industry universities and the government is encouraging an entrepreneurial way of thinking Business Library Newsletter Management strategy now is the management of continuous change and this timely book provides an in depth view of the remarkable opportunities that will be present for those who understand its message D Bruce Merrifield Assistant Secretary for Productivity Technology and Innovation U S Department of Commerce *Entrepreneurial Science* is a provocative analysis of some of the most significant new trends in the high technology based economy Authors Johnston and Edwards use case studies from the biotechnology and microelectronics industries to illustrate how the traditional relationships between industry universities and the government are shifting towards new entrepreneurial relationships that will have significant and lasting effects on the U S economy Demonstrating that the entrepreneurial firm is better equipped to develop the early stages of technology than the large company they contend that both individuals and corporations must adapt to an entrepreneurial way of thinking if they are to compete successfully in the marketplace over the next decade Drawing heavily upon their own considerable experience in the biotechnology industry Johnston and Edwards fully discuss such emerging trends as the commercialization of the university innovative regional technology development programs the links between small entrepreneurial firms and university laboratories and the collaboration between large research based corporations and startup companies As they clearly illustrate each of these
