### **The Role of Community in**

**Restorative Justice** Fernanda Rosenblatt, 2015-04-17 Although restorative justice is probably one of the most talked about topics in contemporary criminology little has been written about how community involvement in restorative justice translates into practice While advocates have presented the community as an essential pillar of restorative justice the rationale for why and how this is the case remains underdeveloped and largely unchallenged This book offers an empirical and theoretical explanation of what community involvement means and what work it does in restorative justice Drawing on an empirical case study and the wider sociological literature The Role of Community in Restorative Justice examines the involvement of the community in one selected practice of restorative justice and also considers the implications of the English and Welsh experience for development of a more coherent framework for operationalizing community involvement in restorative justice practices It is argued that restorative justice programmes need to start from a more concrete and up to date notion of community While operationalizing community involvement they need to acknowledge all at once the importance of place the importance of family links friendship and other social ties and the importance of similar social traits and identities This book is essential reading for students researchers and academics in the fields of criminology criminal justice sociology community studies policy studies social policy and socio legal studies This book will also be valuable reading for a variety of practitioners and policymakers particularly working with restorative justice and youth justice

J. van de Donk, 1998 This book is a joint effort of researchers who have been involved in research projects and programmes that have been trying to chart and reflect upon the implications of Information and Communication Technologies ICTs for Public Administration Tilburg Rotterdam Kassel Irvine Nottingham Glasgow Since the fifties computers had largely facilitated and the transformation of the minimal Night Watch state into the modern Welfare state through their contribution to their effectivity productivity and efficiency In most Handbooks of Public Administration computers are seen as neutral instruments and most of the time the role of computer technologies in the transformation of public administration is completely neglected This deafening silence is a great contrast with the way ICT s are actually changing public administration The faster the developments in a field of study are the more difficult it is to let the theories related to that field of study mature In such circumstances most statements will remain provsial and context dependent 25 years of research in Irvine California and Kassel Germany and more than 10 years of research in Tilburg Rotterdam The Netherlands and about seven years of research in Glasgow Nottingham the United Kingdom nonetheless enables the presentation of a modest image of public administration as it is entering the information age Researchers in each of these groups have nevertheless not stopped trying to phrase theories about the implications of informatization for public administration with a more or less larges scope that are robust in different contexts and over longer periods of time These results and theories covering a broad set of elements of the body of knowledge of public administration are presented in this volume As the authors try to demonstrate in this book informatization developments in public administration do not only challenge the

existing body of knowledge of the public administration discipline but they are also opening up new perspectives and paradigms for the study of public administration      **Domestic Violence and Criminal Justice** Nicola Groves,2013-12-04

King,2013-10-01 Moving away from criminal behaviour can be fraught with difficulties Often it can involve leaving behind old habits customs and even friends while at the same time adopting a new way of life How do individuals go about making a decision to give up crime How do they plan to sustain this decision And in what ways does probation help This book explores these questions Based on in depth interviews with a group of men under probation supervision Sam King investigates the factors associated with making a decision to desist from crime The book examines strategies for desistance and explores the factors that individuals consider when they are thinking about how they will desist In doing so the book sheds new light on existing understandings of desistance from crime and helps to develop our understandings of the role that individuals play in constructing their own desistance journeys This book also highlights the role of probation in this process offering a timely and critical review of the nature of probation under the New Labour government in the UK between 1997 2010 The findings indicate that we should allow Probation Officers greater autonomy and discretion within their roles and that we should free them from the bureaucracy of risk assessment and targets Moreover the book warns against the potential fragmentation of community supervision As such the book will be of interest to criminology students researchers academics policymakers and practitioners particularly those who work with ex offenders in the community      *Policing Domestic Abuse* Katy
