

Officiating Philosophy

1. A clear, thorough understanding of one's overall responsibility is a must for every first-class official.
2. Rules give meaning to the game. **Their purpose is to prevent a player from taking an unfair or illegal advantage of an opponent, from causing injury to an opponent, and from acting in a manner detrimental to the game.**
3. A good official must be concerned with not only the action (foul), but also its **effect upon the play.** Good example: Hand contact by defensive player covering a pass.
4. With rules applied literally, a foul occurs on nearly every play. Result - a hopeless situation for all concerned.
5. **If a player is placed at a disadvantage by an opponent's foul, the opponent should be penalized.** However, if the foul has not affected the game, it likely should be ignored. **The unfair act was merely incidental.**
6. Put another way: If a foul does not affect the progress of the game, the game should not be spoiled by a penalty. To accept this philosophy, an official must have a complete understanding of the game, including the effect of his/her decisions upon players and coaches.

The New World Government-Structure and Constitution Prof. Dr. D. Swaminadhan,2019-03-24 Two issues are bothering the humanity at present Firstly the contemporary national and international scenarios in socioeconomic political ethnic and cultural domains are throwing up many issues problems and challenges relating to development environment human rights human security communal harmony peaceful coexistence among nations and world peace and security Secondly existing global institutions are proving to be wanting in their structures and authorities in solving these problems Alternatively a new global independent organization with enforcing authority is needed to act upon and solve these issues The need for replacement of UNO seems to be justified because of failure to solve global problems The nineteenth and twentieth centuries witnessed revivals of proposals for world government that were fueled by positive developments such as technological progress in travel and communications that enabled rapid economic globalization as well as negative developments such as the devastating impact of wars fought with modern technology The author s approach of the formation of the world parliament is through proportional representation of nation s parliaments thus avoids direct election process for its formation All the nations and their people s representatives are involved in the formation of the World Parliament and the world government Based on this line of thinking the structure for a new federal world government and the new federal world constitution are presented in this book

Ending Big Government Michael Dahlen,2016-02 Statism denotes any system of big government a government that gains power at the expense of individual freedom a government that uses its power to redistribute wealth and regulate the economy Laissez faire capitalism by contrast is the system of limited government the system of economic and political freedom It is a system that has created more wealth and lifted more people out of poverty than any other system Yet it is relentlessly demonized We are told that the free market is impractical prone to crises

depressions and coercive monopolies Michael Dahlen dispels these and many other myths He shows that a laissez faire capitalist system is not only practical he shows that it is moral as it is the only system that recognizes each individual's inalienable right to his own life A provocative weave of history philosophy and political economy Ending Big Government The Essential Case for Capitalism and Freedom shows that capitalism is incontestably superior to statism *General Government Matters, Department of Commerce, and Related Agencies Appropriations for 1962* United States.
