Pregnancy And Medical Radiation:

Medical Radiation Exposure of Pregnant and Potentially Pregnant Women National Council on Radiation Protection and Measurements, 1977 **ICRP Publication 84** ICRP, 2000-12-01 ICRP Publication 84 concerns the management of pregnant patients as well as pregnant workers in medical establishments where ionising radiation is used. Thousands of pregnant patients and medical radiation workers are exposed to radiation each year. Lack of knowledge is responsible for great anxiety and probably unnecessary termination of many pregnancies. This report discusses how to deal with these problems. It is written primarily for physicians but will also be useful for medical and health physicists, nurses, technologists, and administrators. It is not intended as a complete reference work but rather to provide a practical approach that can be used in varying situations. Medical Care of the Pregnant Patient Karen Rosene-Montella, 2008. This fully updated New Edition gives physicians the practical knowledge they need to manage medically complicated pregnant patients. Inside readers will find guidance on preparing for pregnancy, obstetric monitoring, renal disease, cardiovascular and pulmonary diseases, rheumatic disorders, gastrointestinal and liver disease, cancer, nervous system disorders, infectious diseases, diseases of the skin and postpartum disorders. Chapters include tables of normal values and appropriate drugs by indication to put key information at the reader's fingertips.

Cancer and Reproductive Health Sean Kehoe, Eric Jauniaux, Pierre Martin-Hirsch, Philip Savage, 2008-11. This book connects the complexity of cancer with fertility, conception, and pregnancy.
