emerging realization that protecting and restoring biodiversity and maintaining and revitalizing cultural diversity and cultural vitality are intimately indeed inextricably interrelated Published with Terralingua and IUCN      **Stitching the West Back Together** Susan Charnley, Thomas E. Sheridan, Gary P. Nabhan, 2014-09-10 News headlines would often have us believe that conservationists are inevitably locked in conflict with the people who live and work on the lands they seek to protect Not so Across the western expanses of the United States conservationists ranchers and forest workers are bucking preconceptions to establish common ground As they join together to protect the wide open spaces diverse habitats and working landscapes upon which people plants and animals depend a new vision of management is emerging in which the conservation of biodiversity ecosystem integrity and sustainable resource use are seen not as antithetical but as compatible even symbiotic goals Featuring contributions from an impressive array of scientists conservationists scholars ranchers and foresters *Stitching the West Back Together* explores that expanded inclusive vision of environmentalism as it delves into the history and evolution of Western land use policy and of the working landscapes themselves Chapters include detailed case studies of efforts to promote both environmental and economic sustainability with lessons learned descriptions of emerging institutional frameworks for conserving Western working landscapes and implications for best practices and policies crucial to the future of the West's working forests and rangelands As economic and demographic forces threaten these lands with fragmentation and destruction this book encourages a hopeful balance between production and conservation on the large interconnected landscapes required for maintaining cultural and biological diversity over the longterm      **Ethnobotany and Conservation of Biocultural Diversity** Thomas J. S. Carlson, Luisa Maffi, 2004 The field of ethnobotany and more generally ethnobiology traces its roots to two distinct research traditions a long standing interest in how human societies around the world make use of plants and animals in their local environments and a more recent mid 1950's onward interest in how humans perceive classify and name the natural world *Ethnobotany and Conservation of Biocultural Diversity* is based in part on a symposium by the same title held at the Sixteenth International Botanical Congress in Saint Louis Missouri August 1-7 1999 This volume showcases recent ethnobotanical research conducted by members of a new generation of ethnobiologists including case studies from the tropical environments of the Amazon Basin Africa and Asia Part 1 focuses on the contributions of traditional ecological knowledge and sustainable use of traditional plant resources Part 3 deals with ethical issues in ethnobiology      **A Walk in the Park** Kevin Fedarko, 2024-05-28 A New York Times Bestseller Winner of the 2024 National Outdoor Book Award in Outdoor Literature Winner of the 2025 Andrew Carnegie Medal for Excellence in Nonfiction Named a Best Book of the Year by the New York Times Air Mail Smithsonian Magazine and Financial Times A triumph Fedarko doesn't describe awe he induces it The New York Times Book Review Passionate memorable life affirming The Wall Street Journal From the author of the beloved bestseller *The Emerald Mile* a rollicking and poignant account of an epic 750 mile odyssey on foot through the heart of America's most magnificent national park and the grandest wilderness on

earth Two friends zero preparation one dream A few years after quitting his job to follow an ill advised dream of becoming a guide on the Colorado River Kevin Fedarko was approached by his best friend National Geographic photographer Pete McBride with a vision as bold as it was harebrained Together they would embark on an end to end traverse of the Grand Canyon a journey that McBride promised would be a walk in the park Against his better judgment Fedarko agreed unaware that the small cluster of experts who had completed the crossing billed it as the toughest hike in the world The ensuing ordeal which lasted more than a year revealed a place that was deeper richer and far more complex than anything the two men had imagined and came within a hair s breadth of killing them both They struggled to make their way through a vertical labyrinth of thousand foot cliffs and crumbling ledges where water is measured out by the teaspoon and every step is fraught with peril and where even today there is still no trail along the length of the country s best known and most iconic park Along the way veteran long distance hikers ushered them into secret pockets invisible to the millions of tourists gathered on the rim where only a handful of humans have ever laid eyes Members of the canyon s eleven Native American tribes brought them face to face with layers of history that forced them to reconsider myths at the center of our national parks and exposed them to the threats of commercial tourism Even Fedarko s dying father who had first pointed him toward the canyon more than forty years earlier but had never set foot there himself opened him to a new way of seeing the landscape And always there was the great gorge itself austere and unforgiving but suffused with magic drenched in wonder and redeemed by its own transcendent beauty A singular portrait of a sublime place A Walk in the Park is a deeply moving plea for the preservation of America s greatest natural treasure

**The Vanishing Languages of the Pacific Rim** Osahito Miyaoka, Osamu Sakiyama, Michael E. Krauss, 2007-04-12 This book presents the first comprehensive survey of the languages of the Pacific rim a vast region containing the greatest typological and genetic diversity in the world It includes the littoral regions of North and South America Australasia east and south east Asia and Japan as well as the Pacific itself As its languages decline and disappear sometimes without trace this rich linguistic heritage is rapidly eroding In The Vanishing Languages of the Pacific Rim distinguished scholars report on the current state of the region s languages and provides a critical survey of the current state of the region s languages They show what is currently known and recorded and what remains to be examined and documented They consider which languages are the most vulnerable to extinction and what steps that can be taken to save them Their analyses range from the regional to the local and focus on languages in a wide variety of social and ecological settings Together they make a compelling case for research throughout the region and show how and where this needs to be done

Counting Species Rafi Youatt, 2015-02-14 Three decades of biodiversity governance has largely failed to stop the ongoing environmental crisis of global species loss Yet that governance has resulted in undeniably important political outcomes In Counting Species Rafi Youatt argues that the understanding of global biodiversity has produced a distinct vision and politics of nature one that is bound up with ideas about species norms of efficiency and apolitical forms of

technical management Since its inception in the 1980s biodiversity's political power has also hinged on its affiliation with a series of political concepts Biodiversity was initially articulated as a moral crime against the intrinsic value of all species In the 1990s and early 2000s biodiversity shifted toward an association with service provision in a globalizing world economy before attaching itself more recently to the discourses of security and resilience Even as species extinctions continue biodiversity's role in environmental governance has become increasingly abstract Yet the power of global biodiversity is eventually always localized and material when it encounters nonhuman life In these encounters Youatt finds reasons for optimism tracing some of the ways that nonhuman life has escaped human social means Counting Species compellingly offers both a political account of global biodiversity and a unique approach to political agency across the human nonhuman divide
