Safety Nets Politics And The Poor Transitions To Market Economies:

Safety Nets, Politics, and the Poor Carol L. Graham, 2010-12-01 Countries worldwide are attempting difficult transitions from state planned to market economies Most of these countries have fragile democratic regimes that are threatened by the high social and political costs of reform Governments and ultimately societies have to make hard choices about allocating scarce public resources as they undergo these transitions A central often controversial and most poignant question is how to protect vulnerable groups and the poor What compensation what safety net will be provided for them Carol Graham argues that safety nets can provide an environment in which economic reform is more politically sustainable and poverty can be permanently reduced However these two objectives frequently involve trade offs as vocal and organized opponents of reform for obvious political reasons often concern governments far more than the poor These organized and less vulnerable groups tend to place heavy demands on the scarce resources available to governments at times of economic crisis Governments that fail to address the social costs of reform meanwhile often face popular opposition that jeopardizes or even derails the entire market transition the results of the September 1993 elections in Poland are a case in point The author examines these trade offs in detail with a particular focus on how political and institutional contexts affect the kinds of safety nets that are implemented For example reaching the poor and vulnerable with safety nets tends to be more difficult in closed party systems such as in Senegal where entrenched interest groups have a monopoly on state benefits In contrast dramatic political change or rapid implementation of economic reform undermines the influence of such groups and therefore can provide unique political opportunities to redirect resources to the poor as in the case of Bolivia and Zambia Rather than focus their efforts on organized interest groups such as public sector

Economic Transition in Eastern Europe and Russia: Realities of Reform , An evaluation of the efficacy of different forms of liberalization since the fall of communism in Eastern Europe in the form of 13 essays on economic and political reforms Following an extensive introductory essay Economic Reform Appropriate Steps and Actual Policies the remaining essays are organized in three parts fundamental components of economic reform specific problems in reform and comparisons and evaluations Annotation copyright by Book News Inc Portland OR

Economies in Transition Wing Thyee Woo, Stephen Parker, Jeffrey Sachs, 1997 In 1994 the Asia Foundation's Center for Asian Pacific Affairs began a two year project to compare the transitions of selected East European and Asian economies from centrally planned communist systems to market economies The goal was to shed light on the transition process through an understanding of the underlying economic and institutional dynamics This volume is the culmination of that project The volume is divided into three parts In the first part an overview the editors review the authors findings and highlight major themes The second part looks closely at the transition process in seven Asian and East European economies China Vietnam Mongolia Russia Poland Hungary and the Czech Republic The third part contains six comparative studies that explore key elements of the transition process The papers incorporate feedback obtained from meetings with cabinet

The New Politics of Inequality in Latin America Douglas A. Chalmers, Carlos M. Vilas, Katherine Hite, Scott B. Martin, Kerianne Piester, Monique Segarra, 1997-01-30 Against a broader backdrop of globalization and worldwide moves toward political democracy The New Politics of Inequality in Latin America examines the unfolding relationships among social change equity and the democratic representation of the poor in Latin America Recent Latin American governments have turned away from redistributive policies at the same time popular political and social organizations have been generally weakened inequality has increased and the gap between rich and poor has grown Hanging in the balance is the consolidation and the quality of new or would be democracies this volume suggests that governments must find not just short term programmes to alleviate poverty but long term means to ensure the effective integration of the poor into political life The New Politics of Inequality in Latin America bridges the intellectual chasm between on the one hand studies of grassroots politics and on the other explorations of elite politics and formal institution building It will be of interest to students and scholars of contemporary Latin American politics and society and more generally in the vicissitudes of democracy and citizenship in the late twentieth century global system

Gender, Politics and the State Vicky Randall, Georgina Waylen, 2012-09-10 Over the last two decades our understanding of the relationship of gender politics and the state has been transformed almost beyond recognition by the mutual interrogation of feminism and political science This volume provides an overview of this dynamic and growing field which reflects both its expanding empirical scope and the accompanying theoretical development and debate The first three essays focus primarily on conceptual and theoretical issues the meaning of gender the state s role in the construction of gender within the public and private sphere and the political representation of gender differences within liberal democracy The remaining six provide analyses of more concrete issues of state policy and participation in differing national political contexts abortion politics in Ireland the local politics of prostitution in Britain the impact on women s political participation of economic change in China Latin America and political change in Russia and the gender impact of state programmes of land reform

Political Economy in Macroeconomics Allan Drazen, 2018-06-05 Originally economics was called political economy and those studying it readily accepted that economic decisions are made in a political world But economics eventually separated itself from politics to pursue rigorous methods of analyzing individual behavior and markets Recently an increasing number of economists have turned their attention to the old question of how politics shape economic outcomes To date however this growing literature has lacked a cogent organization and a unified approach Here in the first full length examination of how

political forces affect economic policy decisions Allan Drazen provides a systematic treatment organizing the increasingly influential new political economy as a more established field at the highly productive intersection of economics and political science Although he provides an extraordinarily helpful guide to the recent explosion of papers on political economy in macroeconomics Drazen moves far beyond survey giving definition and structure to the field He proposes that conflict or heterogeneity of interests should be the field's essential organizing principle because political questions arise only when people disagree over which economic policies should be enacted or how economic costs and benefits should be distributed Further he illustrates how heterogeneity of interests is crucial in every part of political economy Drazen's approach allows innovative treatment using rigorous economic models of public goods and finance economic growth the open economy economic transition political business cycles and all of the traditional topics of macroeconomics This major text will have an enormous impact on students and professionals in political science as well as economics redefining how decision makers on several continents think about the full range of macroeconomic issues and informing the approaches of the next generation of economists

Social Development in Latin America Joseph S. Tulchin, Allison M. Garland, 2000 This volume provides a wide ranging analysis of social welfare reform in Latin America examining in particular the politics involved in implementing difficult and controversial social policies that often pit the middle strata of society represented by powerful stakeholders against the poor

Market Economics and Political Change Juan D. Lindau, 2000-01-01 Does market liberalization promote democracy The accepted answer from scholars pundits and politicians alike has been yes However the contributors to this innovative study of market reforms and political change in Mexico and the People's Republic of China argue that this easy equation is not only empirically uncertain but methodologically flawed Using comparative contextual analysis the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy particularly law as the rudder of democracy and the role of political culture in civil society

Politics, Public Policy and Social Protection in Africa Nicholas Awortwi, Emmanuel Aiyede, 2017-05-08 Africa is now in a much improved position to support its poor and vulnerable people It has more money more policy commitment and abundant intervention programmes Yet the number of citizens living lives of desperation or at risk of destitution is at an all time high and still rising What is turning such positive prospects into such a disappointing result This book reveals key answers drawing on empirical studies of cash transfer programmes in Botswana Ghana Kenya Nigeria and Uganda The studies uncover the motives of donors politicians and the poor themselves and why governments are not expanding the donor driven pilot programmes as expected

The Political Economy of Reform Federico Sturzenegger, Mariano Tommasi, 1998 In this book Federico Sturzenegger and Mariano Tommasi propose formal models to

answer some of the questions raised by the recent reform experience of many Latin American and eastern European countries *Citizenship, Labour Markets and Democratization* L. Haagh, 2002-01-15 This book presents a re-examination of classical issues in the relationship between different forms of democratization: civil, political and social and examines Chile's transition to democracy during the 1990s as a typical case of the modern sequence. It highlights the lasting institutional limits to social democratization in countries that are democratizing in the context of radical market reforms and provides an account of the politics of limiting social deepening in the crucial early years of Chile's transition, including a detailed examination of the influence of local union history and labour relations. Routledge Handbook of Brazilian Politics Barry Ames, 2018-10-25 With contributions from leading international scholars, this Handbook offers the most rigorous and up-to-date analyses of virtually every aspect of Brazilian politics, including inequality, environmental politics, foreign policy, economic policy making, social policy and human rights. The Handbook is divided into three major sections: Part 1 focuses on mass behavior while Part 2 moves to representation and Part 3 treats political economy and policy. The Handbook proffers five chapters on mass politics focusing on corruption, participation, gender, race and religion; three chapters on civil society assessing social movements, grass roots participation and lobbying; seven chapters focusing on money and campaigns, federalism, retrospective voting, partisanship, ideology, the political right and negative partisanship; five chapters on coalitional presidentialism, participatory institutions, judicial politics and the political character of the bureaucracy; and eight chapters on inequality, the environment, foreign policy, economic and industrial policy, social programs and human rights. This Handbook is an essential resource for students, researchers and all those looking to understand contemporary Brazilian politics.

Economic Policy and Equity Mr. Ke-young Chu, Mr. Sanjeev Gupta, Mr. Vito Tanzi, 1999-05-04 This book brings together the views not only of policymakers and academics but also of religious leaders and labor leaders from around the world, including the 1998 Nobel Laureate in Economics, Amartya Sen, who participated in an IMF conference on this topic. Contributors discuss the causes of growing inequality and the complex question of how to use policy to make economic systems more equitable under five headings: perspectives on economic policy and equity; globalization and equitable growth; country experiences in equity-oriented policymaking; design and implementation of policy; and a roundtable discussion on lessons for countries and the IMF. Edited by Vito Tanzi, director of the Fiscal Affairs Department of the IMF; Ke-young Chu, a senior advisor; and Sanjeev Gupta, a division chief in the department. Models of Economic Liberalization Sebastián Etchemendy, 2011-09-26 This book aims to explain the variation in the models of economic liberalization across Ibero-America in the last quarter of the twentieth century and the legacies they produced for the current organization of the political economies. Although the macroeconomics of effective market adjustment evolved in a similar way, the patterns of compensation delivered by neoliberal governments and the type of actors in business and the working class that benefited from them were remarkably different. Etchemendy argues that the most decisive factors that shape adjustment paths are the

type of regime and the economic and organizational power with which business and labor emerged from the inward oriented model The analysis spans from the origins of state business and labor industrial actors in the 1930s and 1940s to the politics of compensation under neoliberalism across the Ibero American world combined with extensive field work material on Spain Argentina and Chile

At War's End Roland Paris,2004-05-24 All fourteen major peacebuilding missions launched between 1989 and 1999 shared a common strategy for consolidating peace after internal conflicts immediate democratization and marketization Transforming war shattered states into market democracies is basically sound but pushing this process too quickly can have damaging and destabilizing effects The process of liberalization is inherently tumultuous and can undermine the prospects for stable peace A more sensible approach to post conflict peacebuilding would seek first to establish a system of domestic institutions that are capable of managing the destabilizing effects of democratization and marketization within peaceful bounds and only then phase in political and economic reforms slowly as conditions warrant Peacebuilders should establish the foundations of effective governmental institutions prior to launching wholesale liberalization programs Avoiding the problems that marred many peacebuilding operations in the 1990s will require longer lasting and ultimately more intrusive forms of intervention in the domestic affairs of these states This book was first published in 2004

The Puzzle of Latin American Economic Development Patrice M. Franko,2007 Provides the basic economic tools for students to understand the problems in the countries of Latin America This third edition analyzes challenges to the neoliberal model of development and highlights macroeconomic changes in the region It explores the contradictions of growth and focuses on factors of competitiveness

Pathways Out of Poverty Gary S. Fields,2013-12-01 Until recently development economists tended to assume a role for private enterprises in reducing poverty without articulating it explicitly How private firms contribute to economic mobility and poverty reduction and what governments can do to enhance their contribution is the theme of this book In developing countries private enterprise is far and away the largest source of employment and investment and a significant source of government revenue In addition to these tangible contributions private enterprise is an important source of less tangible but critically important factors such as openness to ideas innovation and opportunity The book presents new evidence which demonstrates the essential role which private firms are playing in the course of economic development Throughout the focus is on economic mobility Regional case studies ranging from the Far East to Sub Saharan Africa hone in on the role of entrepreneurship in development Drawing on the rich materials of the World Bank s Worldwide Business Environment Survey key policy factors are identified Special attention is paid to obstacles facing small and medium sized enterprises The concluding chapters focus on practical ways in which governments of developing and transition countries can encourage the capacity of poor people to move up the economic ladder

Microcredit Meltdown Crystal Murphy,2018-12-03 Established to help people jumpstart their lives and economy after over a half century of conflict the South Sudanese microcredit sector collapsed in 2012 six years after its takeoff to the detriment of some 80 000 participants

Microcredit Meltdown is an account of the ambitious launch and premature downfall of the Southern Sudanese microcredit industry. Through a mixed methods ethnographic approach, the book charts the state and non-state actors that embarked upon economic development after war, the assumptions built into microlending, and the impact of ideologies and social norms on economic practice. The text compares industry theories with the experiences of borrowers and finds that microcredit failed in South Sudan due to false assumptions that were inapplicable to this post-conflict environment. Yet the over-promising and under-delivering of commercial microcredit was not isolated to South Sudan or even post-conflict settings. The Juba microcredit story is an instance of the broader global shift toward the commercial microcredit model. Initiated to get badly needed capital into the hands of poor people, instead the focus became sustaining a lending program. The text shows how the ideological and material constraints of the commercial microcredit paradigm were woefully misaligned with local socio-cultural realities and created the collapse in South Sudan.
