Road Safety Campaigns Nurit Guttman, 2014-06-05 This book discusses the use of communication campaigns to promote road safety arguing that they need to elicit public discourse on issues pertaining to culture equity gender workplace norms environmental issues and social solidarity Increasingly new media channels and formats are employed in the dissemination process making road safety related messages ubiquitous and often controversial Policy makers educators researchers and the public continue to debate the utility and morality of some of the influence tactics employed in these messages such as the use of graphic images of injury or death stigmatization or blame and shame and the use of black humor Guttman argues that influencing road safety requires making changes in normative and cultural conceptions of broader issues in society yet the typical discourse on road safety tends to focus on individual attitudes and practices The book highlights the importance of social and behavioral theory in communication campaigns on road safety and critiques the tendency to focus on individual cognition affect and risk conceptions rather than on normative structural and cultural factors The volume positions the discourse on road safety as a social issue and treats road safety behavior as a social activity that directly relates to other public issues social values and social policy while discussing potential uses of social media and participatory approaches The discussion turns to the role of road safety communication campaigns as part of a democratic process of eliciting public discourse including how contemporary society could address broader issues of risk and safety

Social Media on the Road Oskar Juhlin, 2010-09-08 In the future everyday life in traffic will be intricately meshed with city life Today motorways cities and streets are places where we spend a considerable amount of time and where a large number of everyday encounters between people occur Any road user's journey coincides with hundreds or even thousands of others This book unpacks the details of the practical achievements involved in socially engaging with people at high speed Although generally speaking these encounters are brief and interaction is slight the recent emergence of mobile technologies offers opportunities to support drivers and passengers beyond just helping them to reach their destination New social media could enhance interaction in traffic making life on the road more interesting and meaningful Such innovative applications could include car stereos that share music amongst drivers digital games that interact with the landscape passing outside the car windows or with passengers in surrounding cars message systems that allow drivers to help each other and web applications that allow motorcyclists to socialize on the road Social Media on the Road The Future of Car Based Computing provides a bridge between research in transport planning and traffic technology and new media areas such as Computer Human Interaction and Computer Supported Cooperative Work Those studying and researching in the areas of human computer interaction in mobile use contexts and those interested in developing new forms of mobile applications and services will find this book an excellent resource Oskar Juhlin is Associate Professor and Director of the Mobile Life VinnExcellence Centre at Stockholm University and Interactive Institute This book represents a pioneering and key research work that examines the future of transportation being merged with communication and interactive media It also provides a glimpse of the future
