The Hagiographer and the Avatar Antonio Rigopoulos,2021-04-01 In this biographical study Antonio Rigopoulos explores the fundamental role of a hagiographer within a charismatic religious movement in this case the postsectarian cosmopolitan community of the Indian guru Sathya Sai Baba The guru s hagiographer Narayan Kasturi was already a distinguished litterateur by the time he first met Sathya Sai Baba in 1948 The two lived together at the guru s hermitage more or less continuously from 1954 up until Kasturi s death in 1987 Despite Kasturi s influential hagiography Sathyam Sivam Sundaram little scholarly attention has been paid to the hagiographer himself and his importance to the movement In detailing Kasturi s relationship to Sathya Sai Baba Rigopoulos

emphasizes that the hagiographer's work was not subordinate to the guru's definition of himself. Rather, his discourses with the holy man had a reciprocal and reinforcing influence resulting in the construction of a unified canon. Furthermore, Kasturi's ability to perform a variety of functions as a hagiographer successfully mediated the relationship between the guru and his followers. Drawing on years of research on the movement as well as interviews with Kasturi himself, this book deepens our understanding of this important pan-Indian figure and his charismatic religious movement.

Ontology of Consciousness
 Helmut Wautischer, 2008-04-11

Scholars from many different disciplines examine consciousness through the lens of intellectual approaches and cultures ranging from cosmology research and cell biophysics laboratories to pre-Columbian Mesoamerica and Tibetan Tantric Buddhism in a volume that extends consciousness studies beyond the limits of current neuroscience research. The hard problem of today's consciousness studies is subjective experience: understanding why some brain processing is accompanied by an experienced inner life. Recent scientific advances offer insights for understanding the physiological and chemical phenomenology of consciousness. But by leaving aside the internal experiential nature of consciousness in favor of mapping neural activity, such science leaves many questions unanswered. In *Ontology of Consciousness*, scholars from a range of disciplines from neurophysiology to parapsychology, from mathematics to anthropology and indigenous non-Western modes of thought go beyond these limits of current neuroscience research to explore insights offered by other intellectual approaches to consciousness. These scholars focus their attention on such philosophical approaches to consciousness as Tibetan Tantric Buddhism, North American Indian insights, pre-Columbian Mesoamerican civilization and the Byzantine Empire. Some draw on artifacts and ethnographic data to make their point. Others translate cultural concepts of consciousness into modern scientific language using models and mathematical mappings. Many consider individual experiences of sentience and existence as seen in African communalism, Hindi psychology, Zen Buddhism, Indian vibhuti phenomena, existentialism, philosophical realism, and modern psychiatry. Some reveal current views and conundrums in neurobiology to comprehend sentient intellection.
