*Ancient Maya* Arthur Demarest, 2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression

**War in the Land of True Peace** Brent K. S. Woodfill, 2019-05-23 For the ancient and modern Maya the landscape is ruled by powerful entities in the form of geographic features like caves mountains springs and abandoned cities spirits who must be entreated through visits and rituals for permission to plant harvest build or travel their territories Consequently such places have served as points of domination and resistance over the millennia and nowhere is this truer than in Guatemala's Northern Transversal Strip the subject of Brent K S Woodfill's *War in the Land of True Peace* This strategic region with its wealth of resources fertile soil petroleum and the only noncoastal salt in the Maya lowlands is the site of some of the most sacred Maya places and thus also the focus of some of the signal struggles for power in Maya history In *War in the Land of True Peace* Woodfill delves into archaeology epigraphy ethnohistory and ethnography to write the biographies of several of these places covering their histories from the rise of the Preclassic Maya through the spread of transnational corporations in our time Again and again the region known since Spanish conquest as Vera Paz or True Peace has seen incursion by a foreign group including the great Maya cities of Tikal and Calakmul the Hapsburg Empire Guatemalan military dictatorships and contemporary corporations seeking to expand its power Each outsider intentionally or not used the Maya need for access to these places to ensure loyalty And each time local Maya pushed back to reclaim the sacred places for their own From early struggles to remove foreign influence to present day battles over land tenure and indigenous run ecotourism parks this book documents a continuity in Maya culture over several thousand years and illuminates the world view with its sense of personhood and religion so different from the West's that informs this enduring culture

Dumas, Heather McKillop, Marius Alexianu, 2025-09-26 This book explores the relationship between salt sodium chloride and the development of human societies from a cross cultural and global perspective Although it is not possible to discuss the importance of salt to all ancient and modern societies the geographically and temporally diverse examples highlighted here are used to examine a series of related topics critical to understanding the economic political social and religious impacts of salt through space and time These topics include among others the techniques used to produce salt the individuals responsible for its production its cultural uses and applications its role in cross cultural exchange and the impact of its circumscribed distribution on settlement patterns and developing complexity In exploring these topics the chapter authors rely on archaeological data to craft their interpretations however as salt itself is largely invisible in the archaeological record other avenues of investigation such as ethnoarchaeology ethnohistory and experimental archaeology are necessary to gain a more complete understanding of this mineral s influence on the development of human cultures Each chapter includes a summary of seminal research within a particular geographic region along with a discussion of recent or on going projects from that area This volume is intended for a professional audience but university students and graduates and readers with an interest in anthropology archaeology ethnoarchaeology or history will find the chapters comprehensible and informative

**The Memory of Bones** Stephen Houston, David Stuart, Karl Taube, 2006-06-01 All of human experience flows from bodies that feel express emotion and think about what such experiences mean But is it possible for us embodied as we are in a particular time and place to know how people of long ago thought about the body and its experiences In this groundbreaking book three leading experts on the Classic Maya ca AD 250 to 850 marshal a vast array of evidence from Maya iconography and hieroglyphic writing as well as archaeological findings to argue that the Classic Maya developed a coherent approach to the human body that we can recover and understand today The authors open with a cartography of the Maya body its parts and their meanings as depicted in imagery and texts They go on to explore such issues as how the body was replicated in portraiture how it experienced the world through ingestion the senses and the emotions how the body experienced war and sacrifice and the pain and sexuality that were intimately bound up in these domains how words often heaven sent could be embodied and how bodies could be blurred through spirit possession From these investigations the authors convincingly demonstrate that the Maya conceptualized the body in varying roles as a metaphor of time as a gendered sexualized being in

distinct stages of life as an instrument of honor and dishonor as a vehicle for communication and consumption as an exemplification of beauty and ugliness and as a dancer and song maker Their findings open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do through the body      **Practical Archaeology** Brian D.
