The Equations of Life Charles S. Cockell, 2018-06-19 A groundbreaking argument for why alien life will evolve to be much like life here on Earth We are all familiar with the popular idea of strange alien life wildly different from life on earth inhabiting other planets Maybe it's made of silicon Maybe it has wheels Or maybe it doesn't In The Equations of Life biologist Charles S Cockell makes the forceful argument that the laws of physics narrowly constrain how life can evolve making evolution's outcomes predictable If we were to find on a distant planet something very much like a lady bug eating something like an aphid we shouldn't be surprised The forms of life are guided by a limited set of rules and as a result there is a narrow set of solutions to the challenges of existence A remarkable scientific contribution breathing new life into Darwin's theory of evolution The Equations of Life makes a radical argument about what life can and can't be

Shelley and the Apprehension of Life Ross Wilson, 2013-08-15 Percy Bysshe Shelley in the essay On Life 1819 stated We live on and in living we lose the apprehension of

life Ross Wilson uses this statement as a starting point to explore Shelley's fundamental beliefs about life and the significance of poetry Drawing on a wide range of Shelley's own writing and on philosophical thinking from Plato to the present this book offers a timely intervention in the debate about what Romantic poets understood by life For Shelley it demonstrates poetry is emphatically living melody which stands in resolute contrast to a world in which life does not live Wilson argues that Shelley's concern with the opposition between living and the apprehension of life is fundamental to his work and lies at the heart of Romantic era thought
