Short studies on Great Subjects James Anthony Froude, 1867 **Short Studies in Ethics: An Elementary Text-Book for Schools** John Ormsby Miller, 2022-09-16 In *Short Studies in Ethics: An Elementary Text Book for Schools*, John Ormsby Miller presents a comprehensive yet accessible exploration of ethical principles tailored for educational institutions. This text is characterized by its clear prose and structured format, allowing students to grapple with complex moral dilemmas through engaging discussion questions and relatable examples. Situated within the pedagogical movement of the late 19th and early 20th centuries, Miller's work reflects a burgeoning interest in instilling ethical reasoning within formal education, underscoring its importance in cultivating moral citizens. John Ormsby Miller, an advocate for moral philosophy in educational settings, drew inspiration from philosophical giants such as John Stuart Mill and Immanuel Kant. His scholarly background in both ethics and pedagogy informed his mission to provide a foundational understanding of ethical concepts to young minds. Miller's dedication reveals his belief that ethics is not merely an abstract philosophy but an essential component of a well-rounded education, preparing students for responsible decision-making in an increasingly complex world. This book is highly recommended for both educators and students seeking to navigate the challenging terrain of ethical thought. Miller's engaging and succinct analysis equips readers with the tools to ponder moral questions critically, fostering intellectual curiosity and ethical discernment that will endure beyond the classroom.

A Short Course in Literature John S. Hart, 2023-10-20 Reprint of the original first published in 1873

The Realist Short Story of the Powerful Glimpse Kerry McSweeney, 2007 An aesthetic perspective on the short fiction of Chekhov, Joyce, Hemingway, O'Connor, and Carver. Taking a distinctively aesthetic approach to the genre of realist short fiction, Kerry McSweeney clusters the work of five masters: Anton Chekhov, James Joyce, Ernest Hemingway, Flannery O'Connor, and Raymond Carver, to offer a poetics of the form for students and scholars. At the center of this argument is the notion that the realist short story is a glimpse, powerful and tightly focused, into a world that the writer must precisely craft and in which the

reader must fully invest. Selecting writers from different generational, national and cultural backgrounds, McSweeney chooses writers based on their commitment to the realist representation of experience and their shared belief in the importance and efficacy of the short story form. By considering their efforts in tandem, he develops a means to assess the strategies and claims of realist short fiction. McSweeney demonstrates that when the comments these writers have made about their work are assembled and critically scrutinized, the result is an aesthetic critical model as opposed to more interpretative models that focus attention on the determination or indetermination of meanings. He suggests that a fully adequate reading of a realist short story involves the integration of three components: the enjoyment and contemplation of the story in and of itself; affective receptivity or a response to the story's emotional content; and cognitive activity or the reflective consideration of the story's conceptual implications. In individual chapters on Chekov, Joyce, Hemingway, O'Connor, and Carver, this presentational model is applied to widely known and often anthologized readings from each writer. McSweeney brings into sharp focus the distinctive features of each piece, makes qualitative discriminations, and assesses the profitability of other critical models. He concludes with an invitation to test the mettle of his approach in reading other realist short story writers. **A Short**

Introduction to Social Research Matt Henn, Mark Weinstein, Nick Foard, 2005-12-15. This book introduces students and researchers to the key ideas and issues that inform research practice. Authors Matt Henn, Mark Weinstein, and Nick Foard provide a clear and easy-to-understand roadmap to help the reader plan their research project from beginning to end. This book is perfect for use on introductory methods courses and is also an invaluable guide for the first-time researcher embarking on their own small-scale research project. It is the intention of this book to prepare students and new researchers for their research project. Brilliantly written throughout, this is your essential guide to the theory of research, the practice of research, and the best ways to plan and manage your research. *Air Force History Publications*, Air Force History and Museums Program (U.S.), 2008. *Short Answer Questions and MCQs in Anaesthesia and Intensive Care*, 2nd Ed. Peter Murphy, Adrian Dashfield, 2004-08-27. Following on from the success of the first edition, *Short Answer Questions and MCQs in Anaesthesia and Intensive Care* has been completely rewritten to reflect the changes to the final FRCA exam from a long essay-based examination to compulsory short answer questions (SAQs). This guide aims to introduce methods and systems of answering questions succinctly and accurately. Almost all of the questions have been asked in the final FRCA since 1996, and most chapters carry more detail than required to reach a pass standard. The new edition takes a question-orientated approach and provides guidance for the final exam. Given the short time allowed for answering the SAQs, previous practice prior to sitting the examination is essential. Each of the twelve sections has a comprehensive set of multiple-choice questions (MCQ) to the same standard as those set by the Royal College of Anaesthetists. It is vital that candidates practice MCQs as well as SAQs, and the ninety multiple-choice questions that follow the SAQ paper carry just as much weight as the SAQ paper. The book has been structured as topic-based sections and chapters, each of which can be followed and used to enable self-testing.

This book is an invaluable revision aid during preparation for the final FRCA exam and due to the breadth of content also forms a useful ready reference throughout anaesthetic training *The Complete Short Stories* Nathaniel

Chivers,2013-12-20 The primates that provide the central theme of these studies by David Chivers and his colleagues are the dominant large herbivores of the tropical evergreen rain forest To this extent they are the ecological counterparts of the great herds of ungulates in habiting the savannahs of tropical Africa and the monsoonal plains of Asia in their pristine state Both groups comprise the chief primary consumers of living vegetable tissue in their respective environments Members of each show appropriate anatomical adaptations for such a diet As efficient exploiters of a dispersed but generally abundant food source each group collectively forms the main vertebrate component of animal biomass in the environment Yet despite superficial convergence there are

important differences in the biology and behaviour of members of these two groups of herbivores Of greatest practical moment to the enquiring biologist are the ready visibility of most plains dwelling ungulates the ease with which the researcher can travel over or above their habitat by motor transport or light aircraft and the facility for near approach without causing disturbance that a closed vehicle has proved to offer Given the additional attractions of wide open views and stupendous scenery generally invigorating climate and easy life style it is perhaps not surprising that in past decades much research effort has focussed on the larger herbivorous mammals of the tropical savannahs
