Short Story And Photography 1880s 1980s:

The Short Story and Photography, 1880's-1980's Jane Marjorie Rabb, 1998 For over a hundred years stories about photographs and photography have reflected the profound uncertainties and inconclusive endings of the modern world For many writers photography supposedly the most realistic of the arts turns out to be the most ambiguous As Jane Rabb observes in her introduction a number of the stories in this collection involve mysteries perhaps because photography has a capacity for both documentary reality and moral and psychological ambiguity Many nineteenth century writers represented here including Thomas Hardy and Sir Arthur Conan Doyle helped make short fiction as respectable as the novel Some of them were even serious photographers themselves The twentieth century is arguably a golden age for both the short story and photography This collection includes examples from a worldly group of writer Eug ne Ionesco Julio Cort zar Michel Tournier and Italo Calvino as well as the Chinese writer Bing Xin and John Updike Cynthia Ozick and Raymond Carver In this wide range of stories varying from sentimental to obsessive to sinister to tragic and even fatal the reader will find provocative examples of the confluence of the short story and photography both once considered the bastard stepchildren of literature and art *The short story and photography, 1880s - 1980s* Jane Rabb, Eugenia Parry, 1998 **Teaching the**

Cook, 2019-07-01 Victorian Negatives examines the intersection between Victorian photography and literary culture and argues that the development of the photographic negative played an instrumental role in their confluence The negative is a technology that facilitates photographic reproduction by way of image inversion and Susan E Cook argues that this particular photographic technology influenced the British realist novel and literary celebrity culture as authors grappled with the technology of inversion and reproduction in their lives and works The book analyzes literary works by Charles Dickens Arthur Conan Doyle E W Hornung Cyril Bennett Robert Louis Stevenson Oscar Wilde Thomas Hardy and Bram Stoker and puts readings of those works into conversations with distinct photographic forms including the daguerreotype solarization forensic photography common cabinet cards double exposures and postmortem portraiture In addition to literary texts the book analyzes photographic discourses from letters and public writings of photographers and the nineteenth century press as well as discussions and debates surrounding Victorian celebrity authorship The book's focus on the negative both illuminates an oft marginalized part of the history of photography and demonstrates the way in which this history is central to Victorian literary culture

Basic Critical Theory for Photographers Ashley la Grange, 2013-08-06 Basic Critical Theory for Photographers generates discussion thought and practical assignments around key debates in photography Ashley la Grange avoids the trap of an elitist and purely academic approach to critical theory taking a dual theoretical and practical approach when considering the issues Key critical theory texts such as Sontag's *On Photography* and Barthes' *Camera Lucida* are clarified and shortened La Grange avoids editorilising letting the arguments develop as the writers had intended it is the assignments which call into question each writer's approach and promote debate This is the ideal book if you want to understand key debates in photography and have a ready made structure within which to discuss and explore these fascinating issues It is accessible to students from high school to university level

but will also be of interest to the general reader and to those photographers whose training and work is concerned with the practical aspects of photography Also includes invaluable glossary of terms and a substantial index that incorporates the classic texts helping you to navigate your way through these un indexed works The book also contains useful information on photo mechanical processes explaining how a photograph can appear very differently and as a result be interpreted in a range of ways in a variety of books

The Synthetic Eye Fred Ritchin, 2025-03-25 A revelatory glimpse into the future of photography one where the very nature of how images are created is fundamentally transformed by artificial intelligence An invaluable roadmap in a new world The revolution caused by artificial intelligence in terms of what a photograph can and cannot do is profound This book looks at photography's strengths what it has meant for individuals and for society its massive transformations caused by a variety of factors in the digital age and the newer possibilities for image making These include old and new media with an emphasis on synthetic imaging as both a positive and terrifying development In 1840 a year after photography's invention the painter Paul Delaroche exclaimed From now on painting is dead Photography was quicker and cheaper as a representational medium and more realistic its invention also liberated painters to become much more adventurous embracing approaches that included impressionism cubism minimalism and abstract expressionism So too photographers are being challenged today Many have responded with new strategies but more innovation is needed Can photographers be as radically expansive and revolutionary as painters were Can they preserve or even expand the photograph's role in society as a credible witness Can the photographic image morph into forms previously unimagined The Synthetic Eye is about this transformative revolution How can synthetic imagery be utilized to amplify our understanding of ourselves and our worlds Can an alternative photography deepen and expand the medium's previous reach What are the pitfalls How will our senses of the real the possible and the actual be affected
