Ian M. Burns, 2025-08-15 This book chronicles the operations of the French Navy's Aeronautique maritime and the British Royal Naval Air Service RNAS in the Middle East and Eastern Mediterranean between 1914 and 1918 Operating in what was considered a sideshow theatre far from the Western Front these pioneering airmen developed critical techniques for naval aviation performing vital intelligence gathering reconnaissance and bombing raids deep behind enemy lines Celebrating the resilience and ingenuity of the pilots observers and mechanics the book sheds light on their significant albeit often overlooked contribution to the Allied war effort Shorts Aircraft Since 1900 C. H. Barnes, 1969 **Science and Technology Annual Reference Review** , 1991 **The Birth of Military Aviation** Hugh Driver, 1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference ENGLISH HISTORICAL REVIEW This book aims to demonstrate how the crisis evident in British military aviation in the early years of the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough He shows how the resultant virtual state monopoly in design and procurement had disastrous consequences for aircraft innovation and development suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war The continuing dispute and its culmination in the Fokker Scourge controversy of 1915 1916 graphically characterise the strained development of military industrial relations in this area Dr HUGH DRIVER gained an MA in War Studies from King's College London and a D Phil in modern history at Oriel College Oxford *British Naval Aviation* Dr Tim Benbow, 2013-07-28 In 1909 the British Admiralty placed an order for a rigid airship marking the beginning of the Royal Navy's involvement with airpower This collection charts the Navy's involvement with aviation over the following century and the ways in which its rapid expansion and evolution radically altered the nature of maritime power and naval strategy Drawing on much new historical research the collection takes a broadly chronological approach which allows a scholarly examination of key themes from across the history of British naval aviation The subjects tackled include long standing controversies over the control of naval air power crucial turning points within British defence policy and strategy the role of naval aviation in limited war and discussion of campaigns such as the contribution of the Fleet Air Arm in the Mediterranean and Pacific theatres of the Second World War that have hitherto received relatively little attention The collection concludes with a discussion of recent debates surrounding the Royal Navy's acquisition of a new generation of carriers setting the arguments within an historical context Taken as a whole the volume offers fascinating insights into the development of a key aspect of naval

power as well as shedding new light on one of the most important aspects of Britain's defence policy and military history. By simultaneously addressing historical and current political debates, it is sure to find a ready audience and stimulate further discussion.

Northern Ireland, the BBC, and Censorship in Thatcher's Britain Robert J. Savage, 2022.
