## Shot On Location A Novel:

**Hollywood on Location** Joshua Gleich, Lawrence Webb, 2019-01-14 Location shooting has always been a vital counterpart to soundstage production and at times the primary form of Hollywood filmmaking But until now the industrial and artistic development of this production practice has been scattered across the margins of larger American film histories Hollywood on Location is the first comprehensive history of location shooting in the American film industry showing how this mode of filmmaking changed Hollywood business practices production strategies and visual style from the silent era to the present The contributors explore how location filmmaking supplemented and later supplanted production on the studio lots Drawing on archival research and in depth case studies the seven contributors show how location shooting expanded the geography of American film production from city streets and rural landscapes to far flung territories overseas invoking a new set of creative financial technical and logistical challenges Whereas studio filmmaking sought to recreate nature location shooting sought to master it finding new production values and production economies that reshaped Hollywood's modus operandi

**Imagined Landscapes** Jane Stadler, Peta Mitchell, Stephen Carleton, 2015-12-21 An analysis of the depiction of Australia's landscape in its films and literature Imagined Landscapes teams geocritical analysis with digital visualization techniques to map and interrogate films novels and plays in which space and place figure prominently Drawing upon A Cultural Atlas of Australia a database driven interactive digital map that can be used to identify patterns of representation in Australia's cultural landscape the book presents an integrated perspective on the translation of space across narrative forms and pioneers new ways of seeing and understanding landscape It offers fresh insights on cultural topography and spatial history by examining the technical and conceptual challenges of georeferencing fictional and fictionalized places in narratives Among the items discussed are Wake in Fright a novel by Kenneth Cook adapted iconically to the screen and recently onto the stage the Australian North as a mythic space spatial and temporal narrative shifts in retellings of the story of Alexander Pearce a convict who gained notoriety for resorting to cannibalism after escaping from a remote Tasmanian penal colony travel narratives and road movies set in Western Australia and the challenges and spatial politics of mapping spaces for which there are no coordinates It will likely be the indispensable touchstone for any future work in these areas with respect to Australian cultural studies Robert T Tally Texas State University Definitely original in its

approach since it combines a conceptual approach with a more applied one The book is a serious contribution to the field of mapping spatial narratives and to a better understanding of the production and spatial structure of fictional places S bastien Caquard Concordia University

**The Authorship of Place** Dennis Lo,2020-09-14 The Authorship of Place is the first monograph dedicated to the study of the politics history aesthetics and practices of location shooting for Taiwanese Mainland Chinese and coproduced art cinemas shot in rural communities since the late 1970s Dennis Lo argues that rural location shooting beyond serving aesthetic and technical needs constitutes practices of cultural survival in a region beset with disruptive and disorienting social changes including rapid urbanization geopolitical shifts and ecological crises In response to these social changes auteurs like Hou Xiaoxian Jia Zhangke Chen Kaige and Li Xing engaged in location shooting to transform sites of film production into symbolically meaningful places of collective memories and aspirations These production practices ultimately enabled auteurs to experiment with imagining Taiwanese Mainland Chinese and cross strait communities in novel and contentious ways Deftly guiding readers on a cross strait tour of prominent shooting locations for the New Chinese Cinemas this book shows how auteurs sought out their disappearing cultural heritage by reenacting lived experiences of nation building homecoming and cultural salvage while shooting on location This was an especially daunting task when auteurs encountered the shooting locations as spaces of unresolved historical social and geopolitical contestations tensions which were only intensified by the impact of filmmaking on rural communities This book demonstrates how these complex circumstances surrounding location shooting were pivotal in shaping both representations of the rural on screen as well as the production communities institutions and industries off screen Informed by cutting edge perspectives in cultural geography and media anthropology The Authorship of Place both revises Chinese language film history and theorizes groundbreaking approaches for investigating the cultural politics of film authorship and production This extraordinary book discusses the uses of location shooting in films by contemporary Taiwanese and Mainland Chinese directors ranging from Li Xing to Jia Zhangke It highlights the ways in which place memory and identity stances respond to social changes and geopolitical disparities In a world full of uncertainty the argument about the imaginary homeland as an experienced cinematic reality only renders it more urgent and universally relatable Ping hui Liao University of California San Diego The Authorship of Place is certainly a welcome intervention into the study of Chinese cinemas and their auteurs that further contributes to the wider study of location shooting as well as cultural geographies and place based imaginaries of film It is rare to find a book dealing with space place in and around cinema that is this inventive and nuanced in its methodologies Stephanie DeBoer Indiana University

Telotte,Gerald Duchovnay,2011-08-05 While film and television seem to be closely allied screen media our feature films and television series have seldom been successfully adapted across those screens In fact rather than functioning as portals those allied media often seem quite literally screens that filter out something that made the source work so popular in its original form Differences in budget running times cast viewing habits screen size and shape all come into play and this volume s aim is to track a number of popular texts in the course of their adaptive journeys across the screens in order to sketch the workings of that cross media adaptation For its specific examples the volume draws on a single genre science fiction not only because it is one of the most popular today in either film or television but also because it is arguably the most self conscious of contemporary genres and thus one that most obviously frames the terms of these technological adaptations The essays included here mine that reflexive character in both highly successful and in failed efforts at cross media adaption to help us understand what film and television achieve in screening science fiction and to reveal some of the key issues involved in all of our efforts to navigate the various screens that have become part of contemporary culture **The Book of Science and Antiquities** Thomas Keneally,2019-12-10 Thomas Keneally the bestselling author of The Daughters of Mars and Schindler s
