Should We Worry About Family Change:

Should We Worry about Family Change? Jane E. Lewis, Barnett Professor of Social Policy Jane Lewis, 2003-01-01 Over the past quarter century the pace of family change in most Western countries has been extremely rapid we have witnessed the substantial erosion of the traditional male breadwinner two parent family form This change inherently makes obsolete those laws and policies that assume the breadwinner homemaker family structure Should We Worry about Family Change unpacks the current controversies and larger issues surrounding family change the nature of family change the impact of family change on the lives of women and the need for amendment to our social policies and laws to reflect today s diverse family patterns Drawing on her vast understanding of the historical development of the family and the social policies that have attempted to meet familial concerns Lewis comments on such pivotal topics as absent fathers the increasing economic independence of women and the effects of the rise of cohabitation Lewis ultimately suggests that there are policy options available to increase the choices men and women make about their contributions to family life and to promote family responsibility Drawing on a wide range of literature cross national data and policy approaches Lewis engages her readers in a highly public and timely debate

The Changing Canadian Population Barry Edmonston, Eric Fong, 2011-01-10 Current social and economic changes in Canada raise many questions Will Canada s education system be able to maintain its competitiveness when faced with increasing globalization Will the growing numbers of immigrants and their children be successfully integrated How will Canada s social institutions respond to a rapidly aging population The Changing Canadian

Population assembles answers from many of Canada's most distinguished scholars who reassess the current state of society and Canada's preparedness for the challenges of the future Restructuring Family Policies Maureen Baker, 2006-01-01

Recent years have seen significant changes in the social policies of many liberal welfare states this is especially true of social programs for families with children Increasingly governments are making family policy trade offs reducing support for some families but improving it for others Why are such trade offs occurring and how do governments differ in their approach to family social policy This study addresses these questions by examining the political demographic and socio economic factors influencing the restructuring of family related programs in OECD countries Adopting a feminist political economy approach Maureen Baker shows that while some governments encourage their citizens to see children as future resources and promote strong support for reproductive health programs child welfare services women's refuges subsidized childcare and pay equity others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on income support Ultimately Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports which are increasingly important as global markets reduce economic security for some families while improving the financial situation of others This study also explores strategies employed by states to incorporate or resist international pressures and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines Drawing from nation based research cross national studies and international data bases Restructuring Family Policies successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns A Life in Balance? Catherine

Krull, 2011-02-28 Magazine articles talk shows and commercials advise us that our happiness and well being rest on striking a balance between work and family It goes unsaid however that the advice is based on an outmoded and unrealistic ideal This provocative volume challenges the notion often offered in support of neo liberal agendas that paid work employment and unpaid work caregiving and housework are separate and competing spheres rather than overlapping aspects of a single existence Alternative approaches to integrating work and family must be taken into account if we hope to build truly equitable family and childcare policies **Handbook of Quality of Life in the Enlarged European Union** Jens

Alber, Tony Fahey, Chiara Saraceno, 2007-10-15 This is a comparative handbook and analysis of the social conditions and institutional contexts in the new and old member states of the enlarged EU 28 **Family Policy Paradoxes** Åsa

Lundqvist, 2011 This book looks at political attempts to create a modern family and the aspiration to regulate the family and establish gender equality examining the regulation of the family in Sweden between 1930 and today *The Process of Change* Peggy Papp, 1994-04-01 A guide for students and practitioners interested in exploring paradoxical and strategic interventions from a systems perspective this book provides first hand documentation of Papps rich repertoire of clinical interventions the results she has achieved with them and step by step process by which the implementations are

implemented Her work is vividly illustrated by candid and detailed case studies that reveal not only how the technique is applied but also how it was arrived at and why it is particularly suited to the situation at hand

The Future of the Family Daniel Patrick Moynihan, Timothy Smeeding, Lee Rainwater, 2004-10-06 High rates of divorce single parenthood and nonmarital cohabitation are forcing Americans to reexamine their definition of family This evolving social reality requires public policy to evolve as well The Future of the Family brings together the top scholars of family policy headlined by editors Lee Rainwater Tim Smeeding and in his last published work the late Senator Daniel Patrick Moynihan to take stock of the state of the family in the United States today and address the ways in which public policy affects the family and vice versa The volume opens with an assessment of new forms of family discussing how reduced family income and lower parental involvement can disadvantage children who grow up outside of two parent households The book then presents three vastly dissimilar recommendations each representing a different segment of the political spectrum for how family policy should adapt to these changes Child psychologist Wade Horn argues the case of political conservatives that healthy two parent families are the best way to raise children and therefore should be actively promoted by government initiatives Conversely economist Nancy Folbre argues that government's role lies not in prescribing family arrangements but rather in recognizing and fostering the importance of caregivers within all families conventional or otherwise Will Marshall and Isabel Sawhill borrow policy prescriptions from the left and the right arguing for more initiatives that demand personal responsibility from parents as well as for an increase in workplace flexibility and the establishment of universal preschool programs The book follows with commentary by leading policy analysts Samuel Preston Frank Furstenberg Jr and Irwin Garfinkel on the merits of the conservative and liberal arguments Each suggests that marriage promotion alone is not enough to ensure a happy healthy and prosperous future for American children who are caught up in the vortex of family change They agree that government investments in children however can promote superior developmental outcomes and even potentially encourage traditional families by enlarging the pool of marriageable individuals for the next generation No government action can reverse trends in family formation or return America to the historic nuclear family model But understanding social change is an essential step in fashioning effective policy for today's families With authoritative insight The Future of the Family broadens and updates our knowledge of how public policy and demography shape one another

up they begin to think more carefully about their future Jane Lewis is showing them how best to do so This stellar collection of articles by top European scholars combines creative thinking about the new social investment state with impressive empirical research on specific forms of public support for family work Nancy Folbre University of Massachusetts Amherst US The nature of the relationship between children parents and the state has been central to the growth of the modern welfare state and has long been a problem for western liberal democracies Welfare states have undergone profound restructuring over the past two decades and families also have changed in terms of their form and the nature of the contributions that men and women make to them More attention is being paid to children by policymakers but often because of their importance as future citizen workers The book explores the implications of changes to the welfare state for children in a range of countries Children Changing Families and Welfare States examines the implications of social policies for children sets the discussion in the broader context of both family change and welfare state change exploring the nature of the policy debate that has allowed the welfare of the child to come to the fore tackles policies to do with both the care and financial support of children looks at the household level and how children fare when both adult men and women must seek to combine paid and unpaid work and what support is offered by welfare states endeavours to provide a comparative perspective on these issues The contributors have written a book that will be warmly welcomed by scholars and researchers of social policy social work and sociology and students at both the advanced undergraduate and post graduate level
