On April 20, 2018, Priyankar Khandelwal was furious as he watched the stock value from his fund seemingly evaporate right in front of his eyes. Khandelwal, the fund manager at Principal First, had been managing the mid-sized information technology (IT) fund for the previous five years.

Khandelwal asked his assistant to put in a sell order to cover his long position² in Vakrangee Limited (Vakrangee) at a substantial loss. He had bought the stock in the beginning of October 2017. The stock hit a high in January 2018 but had subsequently been sliding (see Exhibit 1). In his fund, Khandelwal had allocated a substantial amount to Vakrangee in the initial investment. Based on the current market price of the stock, there was a net loss of ₹169 million³ and a loss of ₹592 million unrealized from the top for the fund.⁴ This loss caused the net asset value of the fund to fall by 35 per cent year to date, because Khandelwal had not hedged his position.

Khandelwal's clients were irate, and more than 25 per cent of his firm's investors had withdrawn their money from the fund. Principal First had also reprimanded him and put him on notice.

Khandelwal wondered where he went wrong in his analysis of Vakrangee. He had done the valuation exercise himself, checked and cross-checked his assumptions, looked at industry and credit reports, and had found it to be a good stock with good future prospects. What had he missed? What could he have done better?

PRINCIPAL FIRST

Principal First was a Mumbai-based boutique investment management and investment advisory firm. The investment objective of the firm was to deliver notable risk-adjusted returns consistently while ensuring capital preservation. The firm was founded in 2005 and had been an early investor in the Indian alternative

Tech Stock Valuation Mark Hirschey, 2003-06-17 The contribution of research and development to a company's market value has grown considerably in recent years. In the mid 1970s accountants were able to capture on their ledgers 90-95% of a firm's book value but by 2000 the importance of intangible assets had grown to the point where they could account for only 13-15%. Financial economists and accountants have investigated the link between a firm's market value and its R D spending and various factions advocate a variety of positions on the amount and rate of investment, investors' ability to capture returns on that investment and ways to measure value, investment and returns. *Tech Stock Valuation* extends the R D literature by providing detailed direct evidence on the market value implications of inventive and innovative output. Specifically, the book demonstrates that stock price effects of patent output are most pronounced in the case of high quality patents where patent quality is measured by scientific merit. Scientific measures of patent quality give tech stock investors and R D managers a valuable new tool that can be used to measure R D program effectiveness. At the same time it gives investors a new tool to help them assess the value of hard to measure intangible assets. Provides detailed direct evidence on the market value implications of inventive and innovative output. Based on recent research, much of which Dr Hirschey has pioneered. Gives financial professionals a new tool for assessing R D quality and its relation to market valuation.

Valuing Professional Practices and Licenses Ronald L. Brown, 2013-12-19 For anyone representing lawyers, doctors and other professionals or their spouses, one of the thorniest problems in divorce cases continues to be assessing the worth of the professional practice. *Valuing Professional Practices and Licenses* has been used nationwide as the essential practice guide in this area of matrimonial law. Over 45 chapters, newly revised by a team of savvy matrimonial practitioners, offer complete and current information on the valuation of professional practices, degrees and licenses. There is also coverage of difficult topics such as merger, double dipping, celebrity goodwill and how to best represent clients in these complex cases. Plus, the updated Fourth Edition has been expanded and revised with new chapters on key topics such as the difficulties of representing lawyers in divorces, the various factors included in the sale of a law practice relevant to valuation for divorce litigation, the effective use of financial experts and the bankruptcy aspects of awards of professional assets. With *Valuing Professional Practices and Licenses*, legal analysis and expert commentary, valuation examples, explanations, sample reports, checklists and forms to use for discovery and sample question and answer sequences, you'll be fully prepared to represent your professional clients efficiently and successfully.
