Shrinking Cities Karina Pallagst, Thorsten Wiechmann, Cristina Martinez-Fernandez, 2013-08-15 The shrinking city phenomenon is a multidimensional process that affects cities parts of cities or metropolitan areas around the world that have experienced dramatic decline in their economic and social bases Shrinkage is not a new phenomenon in the study of cities However shrinking cities lack the precision of systemic analysis where other factors now at work are analyzed the new economy globalization aging population a new population transition and other factors related to the search for quality of life or a safer environment This volume places shrinking cities in a global perspective setting the context for in depth case studies of cities within Mexico Brazil Indonesia Germany France Great Britain South Korea Australia and the USA which consider specific economic social environmental cultural and land use issues Shrinking Cities Harry W.

Richardson, Chang Woon Nam, 2014-03-14 This book examines a rapidly emerging new topic in urban settlement patterns the role of shrinking cities Much coverage is given to declining fertility rates ageing populations and economic restructuring as the factors behind shrinking cities but there is also reference to resource depletion the demise of single company towns and the micro location of environmental hazards The contributions show that shrinkage can occur at any scale from neighbourhood to macro region and they consider whether shrinkage of metropolitan areas as a whole may be a future trend Also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective The book comprises four parts world or regional issues with reference to the European Union and Latin America national case studies the United States India China Korea Taiwan Germany Romania and Estonia city case studies Detroit Buffalo Cleveland Naples Belfast and Halle and broad issues such as the environmental consequences of shrinking cities This book will be of interest to scholars and practitioners working in the fields of urban studies economic geography and public policy

Quietly Shrinking Cities Maxwell Hartt, 2021-04-01 At 5 percent Canada s population growth was the highest of all G7

countries when the most recent census was taken But only a handful of large cities drove that growth attracting human and monetary capital from across the country and leaving myriad social economic and environmental challenges behind Quietly Shrinking Cities investigates a trend that has been largely overlooked over 20 percent of Canadian cities shrank between 2011 and 2016 and twice that proportion grew more slowly than the national average Yet continuous ubiquitous growth is considered normal and policy and planning professionals have had little success in managing the practical challenges associated with population loss Declining birth rates and an aging population only compound the phenomenon This meticulous work demonstrates that shrinking cities need to rethink their planning and development strategies in response to a new demographic reality questioning whether population loss and prosperity are indeed mutually exclusive

Postsocialist Shrinking Cities Chung-Tong Wu, Maria Gunko, Tadeusz Strykiewicz, Kai Zhou, 2022-05-03 This book provides a comparative analysis of shrinking cities in a broad range of postsocialist countries within the so called Global East a liminal space between North and South While shrinking cities have received increased scholarly attention in the past decades theoretical and empirical research has remained predominantly centered on the Global North This volume brings to the fore a range of new perspectives on urban shrinkage identifying commonalities differences and policy experiences across a very diverse and vivid region with its various legacies and contemporary controversial developments With chapters written by leading experts in the field insider views assist in decolonizing urban theory Specifically the book includes chapters on shrinking cities in China Russia and postsocialist Europe presenting comparative discussions within countries and crossnational cases on theoretical and policy implications The book will be of interest to students and scholars researching urban studies urban geography urban planning urban politics and policy urban sociology and urban development

Handbook on Shrinking Cities Pallagst, Karina, Bontje, Marco, Cunningham Sabot, Emmanuèle, Fleschurz, René, 2022-10-18 Compelling and engaging this Handbook on Shrinking Cities addresses the fundamentals of shrinkage exploring its causal factors the ways in which planning strategies and policies are steered and innovative solutions for revitalising shrinking cities Chapters cover topics of governance greening and right sizing and regrowth laying the relevant groundwork for the Handbook s proposals for dealing with shrinkage in the age of COVID 19 and beyond Parallel Patterns of Shrinking Cities and Urban Growth Rocky Piro, 2016-05-06 Focussing particularly on urban fringe and rural areas this book addresses the parallel phenomena of growth and decline In doing so it not only broadens a debate which generally concentrates on urban municipalities especially inner city areas but also covers new ground by starting to build a new theoretical framework for the spatial planning related assessment of these phenomena Bringing together contributions from internationally renowned authors such as Sir Peter Hall Steve Ward and Johann Jessen the book compares international case studies and highlights their relationships with one another It concludes by emphasizing common themes that are addressed as well as showing applicability to other urban and rural regions Overall the book provides a timely and comprehensive

analysis of the spatial consequences and related spatial planning concepts in theory and practice which aim to further sustainable development of city regions urban fringe and rural areas experiencing growth and decline *A Research Agenda for Shrinking Cities* Justin Hollander, 2018-01-26 This prescient book presents the intellectual terrain of shrinking cities while exploring the key research questions in each of the field's sub domains and reviewing the range of methodologies within these topics *Governance and Leadership in Shrinking Cities* Stanisław Mazur, 2023-08-24 The aim of this publication is to look in depth at depopulation a trend that is affecting an increasing number of cities worldwide It has recently become a critical issue with a range of detrimental social economic spatial and financial consequences However attempts by central and local governments to combat depopulation have yet to yield satisfactory results Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions mobilizing resources and creating networks to address the problem has been underestimated Moreover according to the authors of this monograph there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation it is impossible to pursue effective public policies in this regard This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives Further the book provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists planners social geographers economists and architects *Shrinking Cities :: INTERNATIONAL RESEARCH ; V.2. INTERVENTIONS* Philipp Oswalt, 2005 **Local Economic and Employment Development (LEED) Demographic Change and Local Development Shrinkage, Regeneration and Social Dynamics** Martinez-Fernandez Cristina, Kubo Naoko, Noya Antonella, Weyman Tamara, 2012-11-28 This report highlights the issues faced by local areas against the backdrop of policies or planning models that have directed local development in the past decades **The Routledge Handbook of Urban Resilience** Michael A. Burayidi, Adriana Allen, John Twigg, Christine Wamsler, 2019-11-27 This volume provides a comprehensive discussion and overview of urban resilience including socio ecological and economic hazard and disaster resilience It provides a summary of state of the art thinking on resilience the different approaches tools and methodologies for understanding the subject in urban contexts and brings together related reflections and initiatives

Throughout the different chapters the handbook critically examines and reviews the resilience concept from various disciplinary and professional perspectives. It also discusses major urban crises past and recent and the generic lessons they provide for resilience. In this context the authors provide case studies from different places and times including historical material and contemporary examples and studies that offer concrete guidance on how to approach urban resilience. Other chapters focus on how current understanding of urban systems such as shrinking cities, green infrastructure, disaster volunteerism and urban energy systems are affecting the capacity of urban citizens, settlements and nation states to respond to different forms and levels of stressors and shocks. The handbook concludes with a synthesis of the state of the art knowledge on resilience and points the way forward in refining the conceptualization and application of urban resilience. The book is intended for scholars and graduate students in urban studies, environmental and sustainability studies, geography, planning, architecture, urban design, political science and sociology for whom it will provide an invaluable and up to date guide to current approaches across these disciplines that converge in the study of urban resilience. The book also provides important direction to practitioners and civic leaders who are engaged in supporting cities and regions to position themselves for resilience in the face of climate change, unpredictable socioenvironmental shocks and incremental risk accumulation.

Dealing with Deindustrialization Margaret Cowell, 2014-09-25 The late 1970s and 1980s saw a process of mass factory closures in cities and regions across the Midwest of the United States. What happened next as leaders reacted to the news of each plant closure and to the broader deindustrialization trend that emerged during this time period is the main subject of this book. It shows how leaders in eight metropolitan areas facing deindustrialization strived for adaptive resilience by using economic development policy. The unique attributes of each region, asset bases, modes of governance, civic capacity, leadership qualities and external factors influenced the responses employed and the outcomes achieved. Using adaptive resilience as a lens, Margaret Cowell provides a thorough understanding of how and why regions varied in their abilities to respond to deindustrialization.

Many Urbanisms Martin J. Murray, 2022-02-15 Winner 2023 Choice Outstanding Academic Title Now for the first time in history the majority of the world's population lives in cities But urbanization is accelerating in some places and slowing down in others The sprawling megacities of Asia and Africa as well as many other smaller and medium sized cities throughout the Global South are expected to continue growing At the same time older industrial cities in wealthier countries are experiencing protracted socioeconomic decline Nonetheless mainstream urban studies continues to treat a handful of superstar cities in Europe and North America as the exemplars of world urbanism even though current global growth and development represent a dramatic break with past patterns Martin J Murray offers a groundbreaking guide to the multiplicity heterogeneity and complexity of contemporary global urbanism He identifies and traces four distinct pathways that characterize cities today tourist entertainment cities with world class aspirations struggling postindustrial cities megacities experiencing hypergrowth and instant cities or master planned cities built from scratch Murray shows how these different types of cities respond to different pressures and logics rather than progressing through the stages of a predetermined linear path He highlights new spatial patterns of urbanization that have undermined conventional understandings of the city exploring the emergence of polycentric fragmented haphazard and unbounded metropolises Such cities he argues should not be seen as deviations from a norm but rather as alternatives within a constellation of urban possibility Innovative and wide ranging *Many Urbanisms* offers ways to understand the disparate forms of global cities today on their own terms

The SAGE Handbook of New Urban Studies John Hannigan, Greg Richards, 2017-05-01 The last two decades have been an exciting and richly productive period for debate and academic research on the city The SAGE Handbook of New Urban Studies offers comprehensive coverage of this modern re thinking of urban theory both gathering together the best of what has been achieved so far and signalling the way to future theoretical insights and empirically grounded research Featuring many of the top international names in the field the handbook is divided into nine key sections SECTION 1 THE GLOBALIZED CITY SECTION 2 URBAN ENTREPRENEURIALISM BRANDING GOVERNANCE SECTION 3 MARGINALITY RISK AND RESILIENCE SECTION 4 SUBURBS AND SUBURBANIZATION STRATIFICATION SPRAWL SUSTAINABILITY SECTION 5 DISTINCTIVE AND VISIBLE CITIES SECTION 6 CREATIVE CITIES SECTION 7 URBANIZATION URBANITY AND URBAN LIFESTYLES SECTION 8 NEW DIRECTIONS IN URBAN THEORY SECTION 9 URBAN FUTURES This is a central resource for researchers and students of Sociology Cultural Geography and Urban Studies

Human Rights and Social Equality: Challenges for Social Work Sven Hessel, 2016-05-13 The mission of the social work profession and the development of social policy are rooted in a set of core values and are the foundation of social work's unique purpose and perspective Human rights offer a normative base for social work and for the

formation of inclusive social policies This informative and incisively written edited collection brings together experts from around the world to explore the tension between a normative and a political base of social work and social development and therefore to address the question How can social work and social policies contribute in the endeavor to respect protect and fulfill human rights This volume will show that there is no straightforward answer to this question owing to the clash between different sociocultural and local conditions and demands for universal human rights **Growth and Change in**

Post-socialist Cities of Central Europe Waldemar Cudny, Josef Kunc, 2021-12-29 This book presents multidimensional socio economic transformations taking place in the post socialist cities located in selected countries of the Central European region The analysis includes case studies from the Eastern part of Germany Chemnitz Leipzig Poland d Kielce Katowice conurbation and peripheral urban centres from Eastern Poland Slovakia Bratislava Nitra the Czech Republic Olomouc Brno and from Hungary P cs The analysed urban areas have undergone far reaching political and socio economic changes in the last 30 years These changes began with the collapse of communism and the centrally planned economy system in the region of Central Europe The beginning of this period often referred to as post socialist transformation dates back to 1989 The consequence of the aforementioned political processes was the multifaceted socio economic and demographic changes that significantly affected urban areas in Central Europe This book presents an attempt to summarize the main long term processes of changes taking place in these urban areas and to identify contemporary and future trends in their socio economic development The book will be valuable to undergraduate and postgraduate students in human geography urban studies economy and city marketing especially with an interest in Central Europe
