Steyermark's Flora of Missouri Julian Alfred Steyermark,George Alfred Yatskievych,1999 The *Flora of Missouri* project directed by Garden Curator Dr George Yatskievych is an ongoing effort to update and compile information on the state s flora

It began in 1987 as a joint effort of the Missouri Botanical Garden and the Missouri Department of Conservation. One of its main goals is a three volume revision of former Missouri Botanical Garden curator Julian A. Steyermark's *Flora of Missouri*, first published in 1963. Missouri's ever changing plant diversity, the shifting distributions of its plant species, and the many new records of plants in the state have necessitated an expansion of Steyermark's original publication into three volumes.

Taxonomy and Ecology of Woody Plants in North American Forests James S. Fralish, Scott B. Franklin, 2002-02-08

Thorough detailed dendrological coverage of North American trees, shrubs, and vines. This comprehensive field guide/procedural handbook provides extraordinarily detailed descriptions of trees, shrubs, and vines of North American forests. Written at a more detailed level than most field guides, it introduces basic taxonomic concepts and methods and explains the rationale behind taxonomic classification systems. Entries include Latin and common names for each species, as well as physical descriptions at various levels of maturity and for different seasons. Also noted are regional and state distributions, soil conditions, cover types, shade tolerances, and common diseases and pests. This remarkably thorough and reliable reference includes detailed descriptions of more than 800 species, hundreds of additional varieties and cultivars, 550 exquisitely detailed line drawings of leaves, bark, fruit, and seeds. Broad coverage of commercial and noncommercial species. An emphasis on the silvical features of each species. A unique section on forest community ecology and cover types. The new North American Classification System. Well organized and practical, this authoritative guide is an immensely useful resource for foresters, wildlife, and field biologists, naturalists, environmental scientists, and land managers.
