Shuddering Dawn Religious Studies The Nuclear Age A:

A Shuddering Dawn Ira Chernus, Edward Tabor Linenthal, 1989-01-01 Exploring the symbolic meanings of the Bomb this book excavates the depth dimension of the nuclear age Rather than adding to the many ethical commentaries asking whether or not there should be nuclear weapons the authors ask why there are nuclear weapons and a continuing arms race They also address the kinds of symbolic changes that must occur in order to reverse the build up of nuclear weapons The authors approach these questions from the perspective of academic research not from particular faith commitments asking the reader to envision different human responses to this technology human stances that can be illuminated by the creative insight of religious studies

Nuclear Madness Ira Chernus, 1991-01-01 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor It shows that public perceptions of the Bomb are a kaleidoscope of ever changing ideas and images Recent changes in public awareness only signal new symptoms of this public madness symptoms unwittingly fostered by the antinuclear movement Since the newest nuclear images follow the same psychological pattern as their predecessors they are likely to lead us deeper into nuclear madness Chernus offers new interpretations of four major theorists in the psychology of religion Paul Tillich R D Laing Mircea Eliade and James Hillman to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security The author develops an interpretation of Lifton's own thought as an ontological and religious psychology Drawing on the work of Eliade and Hillman he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation

Living with the Bomb: American and Japanese Cultural Conflicts in the Nuclear Age Laura E. Hein, Mark Selden, 2015-02-18 The development and use of the atomic bombs at Hiroshima and Nagasaki number among the formative national experiences for both Japanese and Americans as well as for 20th century Japan US relations This volume explores the way in which the bomb has shaped the self image of both peoples

American Sacred Space David Chidester, Edward T. Linenthal, 1995-11-22 In a series of pioneering studies this book examines the creation and the conflict

behind the creation of sacred space in America The essays in this volume visit places in America where economic political and social forces clash over the sacred and the profane from wilderness areas in the American West to the Mall in Washington D C and they investigate visions of America as sacred space at home and abroad Here are the beginnings of a new American religious history told as the story of the contested spaces it has inhabited The contributors are David Chidester Matthew Glass Edward T Linenthal Colleen McDannell Robert S Michaelsen Rowland A Sherrill and Bron Taylor

Clear and Definite Words Ronald G. Goetz, 2010-01-01 Clear and Definite Words is a lucid exposure of the present confusion within theological discourse It charges and proves that avoiding or equivocating on the question of ontology is impossible It thus undermines the premise of much theological discourse today and lays the way for greater theological clarity and commitment This book goes head to head with great forcefulness and passion against anyone and anything that has served to impede the right of theology to speak with clear and definite words

Pilgrimage through a Burning World Ken Butigan, 2012-02-01 For two decades the Nevada Desert Experience has organized nonviolent action at the Nevada Test Site as part of the global movement to end nuclear testing Pilgrimage through a Burning World illuminates how the Franciscan based group has crafted a contemporary desert spirituality that integrates religious ritual and political action to grapple with the challenges of an institutionalized and internalized nuclear world Ken Butigan shows how the annual pilgrimage to the test site has contributed to the personal transformation of people on both sides of the fence at the test site and to the worldwide emergence of the Comprehensive Test Ban Treaty

Orthodox Christianity and Gender Helena Kupari, Elina Vuola, 2019-10-17 The Orthodox Christian tradition has all too often been sidelined in conversations around contemporary religion Despite being distinct from Protestantism and Catholicism in both theology and practice it remains an underused setting for academic

inquiry into current lived religious practice This collection therefore seeks to redress this imbalance by investigating modern manifestations of Orthodox Christianity through an explicitly gender sensitive gaze By addressing attitudes to gender in this context it fills major gaps in the literature on both religion and gender Starting with the traditional teachings and discourses around gender in the Orthodox Church the book moves on to demonstrate the diversity of responses to those narratives that can be found among Orthodox populations in Europe and North America Using case studies from several countries with both large and small Orthodox populations contributors use an interdisciplinary approach to address how gender and religion interact in contexts such as iconography conversion social activism and ecumenical relations among others From Greece and Russia to Finland and the USA this volume sheds new light on the myriad ways in which gender is manifested performed and engaged within contemporary Orthodoxy Furthermore it also demonstrates that employing the analytical lens of gender enables new insights into Orthodox Christianity as a lived tradition It will therefore be of great interest to scholars of both Religious Studies and Gender Studies

The Atomic West Bruce William Hevly, John M Findlay, 1998 The Manhattan Project transformed the entire country in myriad ways but it did not affect each region in the same way Atomic West tells the story of how the U S government acting on an enduring perception of the American West as an empty place located a disproportionate number of nuclear facilities in the western states especially the ones most likely to spread pollution

Maps Monsters to Destroy Ira Chernus, 2015-12-03 This book takes an incisive look at the stories we are told and tell ourselves about evil forces and American responses Chernus pushes beyond political rhetoric and media cliches to examine psychological mechanisms that freeze our concepts of the world

Norman Solomon author **War Made Easy How Presidents and Pundits Keep Spinning Us to Death** In his new book **Monsters to Destroy The Neoconservative War on Terror and Sin** Ira Chernus tackles the question of why U S foreign policy aimed at building national security has the paradoxical effect of making the country less safe and secure His answer The war on terror is based not on realistic appraisals of the causes of conflict but rather on stories that neoconservative policymakers tell about human nature and a world divided between absolute good and absolute evil The root of the stories is these policymakers' terror of the social and cultural changes that swept through U S society in the 1960s George W Bush and the neoconservatives cast the agents of change not simply as political opponents but as enemies or sinners acting with evil intent to destroy U S values and morals that is as monsters rather than human beings The war on terror transfers that plot from a domestic to a foreign stage making it more appealing even to those who reject the neoconservative agenda at home Because it does not deal with the real causes of global conflict it harms rather than helps the goal of greater national security

History Wars Edward T. Linenthal, Tom Engelhardt, 1996-08-15 From the taming of the West to the dropping of the atomic bomb on Hiroshima the portrayal of the past has become a battleground at the heart of American politics What kind of history Americans should read see or fund is no longer merely a matter of professional interest to teachers historians and museum curators Everywhere now history is

increasingly being held hostage but to what end and why In History Wars eight prominent historians consider the angry swirl of emotions that now surrounds public memory Included are trenchant essays by Paul Boyer John W Dower Tom Engelhardt Richard H Kohn Edward Linenthal Micahel S Sherry Marilyn B Young and Mike Wallace **In the Shadow of War** Michael S. Sherry,1995-01-01 Prize winning historian Michael S Sherry shows how war has defined modern America and argues that militarization has reshaped every facet of American life its politics economics culture social relations and place in the world 17 illustrations **A Thorn in Transatlantic Relations** M. Hampton,2013-07-31 Americans and Europeans perceive threat differently Americans remain more religious than Europeans and generally still believe their nation is providentially blessed American security culture is relatively stable and includes the deeply held belief that existential threat in the world emanates from the work of evil doers The US must therefore sometimes intervene militarily against evil The European Union EU security culture model differs from traditional European iterations and from the American variant The concept of threat as evil lost salience as Western Europe became more secularist Threats became problems to manage and resolve The upsurge in anti immigrant and anti foreigner sentiment in the midst of economic crisis undermines this model *Gossips, Gorgons and Crones* Jane Caputi,1993-10 *Gossips Gorgons Crones* is the first comprehensive analysis of nuclear age culture and the accompanying return of female Powers Based in feminist pre patriarchal and Native American philosophies this book provides a biting critique of patriarchal practices myths and values including family values [The Columbia Guide to Religion in American History](#) Paul Harvey,Edward Blum,2012-02-14 The first guide to American religious history from colonial times to the present this anthology features twenty two leading scholars speaking on major themes and topics in the development of the diverse religious traditions of the United States These include the growth and spread of evangelical culture the mutual influence of religion and politics the rise of fundamentalism the role of gender and popular culture and the problems and possibilities of pluralism Geared toward general readers students researchers and scholars *The Columbia Guide to Religion in American History* provides concise yet broad surveys of specific fields with an extensive glossary and bibliographies listing relevant books films articles music and media resources for navigating different streams of religious thought and culture The collection opens with a thematic exploration of American religious history and culture and follows with twenty topical chapters each of which illuminates the dominant questions and lines of inquiry that have determined scholarship within that chapter s chosen theme Contributors also outline areas in need of further more sophisticated study and identify critical resources for additional research The glossary *American Religious History A Z* lists crucial people movements groups concepts and historical events enhanced by extensive statistical data **Ideas of Social Order in the Ancient World** Vilho Harle,1998-03-25 Harle focuses on the perennial issue of social order by providing a comparative analysis of ideas on social order in the classical Chinese political philosophy the Indian epic and political literature Zoroastrianism Judaism the classical Greek and Roman political thought and early Christianity His analysis is based on the

religious political and literary texts that represent their respective civilizations as both their major achievements and sources of shared values Harle maintains that two major approaches to establishing and maintaining social order exist in all levels and types of social relations moral principles and political power According to the principle oriented approaches social order will prevail if and when people follow strict moral principles According to the contending power oriented approach orderly relations can only be based on the application of power by the ruler over the ruled The principle oriented approaches introduce a comprehensive civil society of individuals the power oriented approaches give major roles to the city state its government and relationships between them The question of morality can be recognized also within the power oriented approaches which either submit politics to morality or maintain that politics must be taken as nothing else than politics This book is a contribution to peace and international studies as well as political theory and international relations Guru English Srinivas Aravamudan, 2011-06-27 Guru English is a bold reconceptualization of the scope and meaning of cosmopolitanism examining the language of South Asian religiosity as it has flourished both inside and outside of its original context for the past two hundred years The book surveys a specific set of religious vocabularies from South Asia that Aravamudan argues launches a different kind of cosmopolitanism into global use Using Guru English as a tagline for the globalizing idiom that has grown up around these religions Aravamudan traces the diffusion and transformation of South Asian religious discourses as they shuttled between East and West through English language use The book demonstrates that cosmopolitanism is not just a secular Western discourse that results from a disenchantment with religion but something that can also be refashioned from South Asian religion when these materials are put into dialogue with contemporary social movements and literary texts Aravamudan looks at religious forms of neoclassicism nationalism Romanticism postmodernism and nuclear millenarianism bringing together figures such as Swami Vivekananda Sri Aurobindo Mahatma Gandhi and Deepak Chopra with Rudyard Kipling James Joyce Robert Oppenheimer and Salman Rushdie Guru English analyzes writers and gurus literary texts and religious movements and the political uses of religion alongside the literary expressions of religious teachers showing the cosmopolitan interconnections between the Indian subcontinent the British Empire and the American New Age
