*Adult Sibling Loss* Brenda Marshall, 2016-12-05 He was my best friend I feel like I've lost that one person I could always count on Siblings know each other in ways friends and other blood relatives do not They have shared bedrooms bathrooms holidays family milestones meals and a way of growing up that those outside the family can never fully understand The bond is intense complicated sometimes difficult often wonderful and absolutely irreplaceable When death interrupts what might have been a lovely lifelong connection the impact is tremendous And yet this loss is rarely the focus of research and is not well understood or recognised within society leaving many siblings searching for appropriate support and validation This book gives readers the opportunity to experience the intensity of this relationship through the eyes of three bereaved siblings Their experiences both before and after loss are powerfully presented using a narrative style that allows the complexity and depth of their individual relationships to shine brightly The author a bereaved sibling herself artfully weaves her story throughout adding to the richness of the text Through these collective stories readers are invited to explore their own reactions and reflect on the many ways siblings affect each other over the long term Bereaved siblings clinicians medical professionals therapists social workers funeral directors religious leaders bereavement groups and anyone who supports or knows a bereaved sibling will find benefit in this book This highly readable text will both touch and inform readers

Fanos,2014-02-04 Despite the rise of clinical interest in posttraumatic stress disorder and traumatic stress in children there has been little attention paid to the impact of sibling death as a traumatic event Although there is much evidence that children suffer long lasting consequences of such trauma as divorce or the loss of a parent the loss of a sibling has not been the topic of substantial clinical or research attention The sibling relationship has only begun to receive research and theoretical attention The complexities of the sibling bond as it changes and evolves over the life span have only begun to be explored The death of a child has generally been considered one of the most stressful events encountered by families in our society The chronicity of illnesses such as cystic fibrosis is in a sense new an outgrowth of recent advances in medical treatment which have considerably extended the lives of children stricken with leukemia cystic fibrosis HIV infection diabetes and others This book explores the long term consequences of chronic illness followed by the death of a sibling on adult adjustment The illness and loss of the child will have a direct impact on the siblings dependent upon their own capacity to give meaning to its occurrence and to mourn the loss effectively In addition the sibling s world will be inexorably shaped by the handling of the illness and loss by the parents

**When a Brother or Sister Dies** Claire Berman,2009-02-17 The trauma of losing a sibling when we are in our adult years is one of the most unrecognized and undertreated areas of psychology There is no other loss in adult life that appears to be so neglected as the death of a brother or sister says bereavement specialist and psychologist Therese Rando And Rando is just one expert author Berman interviews in this moving book about loss We see here how when an adult dies the parents spouse and children of that person become

the focus but brothers and sisters most often fall to the sidelines and are left to find a way to deal with the grief and recover alone Yet when a brother or sister dies we lose our longest lifetime companion someone with whom we have shared an intimate family history And in most cases that was someone for whom we had conflicted feelings shared identity yet competitive feelings pride yet jealousy love yet hate Most of us come to make peace with the relationship at some point How to make peace with the death of the sibling which can conjure up a well of feelings from wishing you were closer to wanting to change some past events you shared can haunt an adult But author Claire Berman who lost her own sister to heart disease in the week of September 11 2001 when America lost its innocence takes us into the emotional world of sibling loss showing us how to understand and navigate the aftermath of a loss that can leave adults feeling angry confused guilty empty or just like Berman wanting to hit that speed dial button still marked with her sister's name

Counseling Adolescents Through Loss, Grief, and Trauma Pamela A. Malone, 2016-02-19 Loss grief and trauma come into the lives of adolescents in many forms and with more frequency than the adults in their lives may realize Assessing the depth and nature of their emotions can be difficult adolescents are typically reluctant to show strong emotions and can be difficult to reach particularly when they experience the untimely death of a loved one How best to work with a young person who may have

trouble communicating their emotions even under the best of circumstances And what if he or she has learned about the death of a loved one or classmate from another peer rather than a family member What about gender differences and the influence of culture and family What role do cell phones text messaging and technologies such as Facebook play in the adolescent grief experience Adolescents use of technology creates unlimited access to friends support systems and information but news that spreads quickly without buffering effects can intensify the strength of the adolescent grief responses Counseling Adolescents Through Loss Grief and Trauma not only examines these issues it also provides clinicians with a wealth of resources and time tested therapeutic activities that are sure to become an indispensable part of any clinician s practice
