Secrets of the Sicilian Dragon Édouard Efimovich Gufel'd, Eduard Gufeld, Eric Schiller, 1998 The mighty Dragon

Variation of the Sicilian Defense is one of the most exciting openings in chess and one of the most popular for action players. The authors introduce the Dragon by tracing its history and then providing strategies and tactics with detailed examples of the most brilliant games of the most famous Dragoneers. Louis Paulsen Hans Renette, 2025-01-31 Louis Paulsen 1833-1891 was one of the 19th century's strongest chess players and a world record holder in blindfold chess. He maintained an unbeaten record in matches, created several opening systems, and was an originator of the positional approach to the game. This extensive biography, the first in English, explores Paulsen's life and career and includes 719 of his games presented here with both contemporary and modern comments. *Russian Silhouettes* Genna Sosonko, 2014-06-06 As a respected trainer who became a world class chess grandmaster after leaving Leningrad and moving to Holland in 1972, Genna Sosonko observes the golden age Soviet chess from a privileged dual perspective. Combining an insider's nostalgia with the detachment of a critical observer, he has produced unforgettable portraits of the heroes of this bygone era: Tal, Botvinnik, Geller, Polugaevsky, and the legendary trainer Zak are some of his subjects. This New Edition has two brand new stories. Delightful! The Washington Post. *The Italian Gambit (and) A Guiding Repertoire For White - E4!* George Laven, 2003-12-16 New ideas, technical novelties, and more on the age-old Italian game with 4 d4, allowing the sharp and forcing Italian Gambit to emerge. This move, a surprising one to many, transforms the classic Giouco Piano or, literally, the quiet game into anything but its revered and somewhat sedate namesake. Black's third move 3 Bc5 seems safe and allows the second player plenty of time to develop quietly for positional play. This will occur on White playing almost any reasonable move except for the center-assaulting initiative, gaining 4 d4 being the main focus of this endeavor. 4 d4 is clearly a forcing move; Black must react. Whatever unfolds from this point, White will have central control, lead in development, the initiative, and it is White, not Black, who will get the first emerging opportunities. Accurate play by Black is necessary to hold and neutralize the initial gains of opposition, and it will be difficult to demonstrate anything better than equality or that White cannot claim real compensation for the gambit pawn. This book involves no less than three 3 years of study. Master analysis including complete computer verification of all important variations. Volume II. This masterful work is short yet concise and to the point, guiding the 1 e4 player in handling and management of all of Black's classing opening responses: 1 Nf6, Alekhine's 1 e6, French 1 d6, Pirc 1 d5, Scandinavian 1 c6, Caro-Kann 1 c5, Sicilian 1 Nc6, Nimzowitsch. These lines have been studied and developed over many years by the venerable Chess Master and teacher Jude Acers; they are the essential and recommended lines for all play that commences 1 e4 but are especially effective for the new limited time controls in present and future tournament play. All levels, whether they be the first or second side of the board, will discover fresh arsenals for both attack and defense. As White, once you embrace and you will these to the point openings, this book will take you via clear reference to the sources of future study. As Black, you must be prepared. The reader will not be overwhelmed by masses of theory or endless analytical variations but shall discover how and where to find such material. A clear opening guide for the newer player. A no-nonsense opening
