

SICK BUILDING SYNDROME

VOCs are a large group of carbon based toxins that are invisible and often have no odour. They are found in a number of everyday household products and furnishings including synthetic carpets and cannot be eradicated by traditional cleaning methods. VOCs are responsible for sick building syndrome and have a number of negative effects on our health, causing skin allergies including eczema, respiratory problems and even cancer.

Wool is the only fibre able to naturally absorb VOCs and reduce their presence in the home, eradicating the risks to health and boosting wellness. These effects are observed just through the presence of wool bedding or carpets in the home. Not only does wool neutralise contaminants more quickly and completely than synthetic fibres, wool does not re-emit them, even when heated. Wool beds, bedding, mattresses and 100% wool carpets can continue to purify the air for up to 30 years.
