Automated Web Site Evaluation M.Y. Ivory, 2013-06-29 Among all information systems that are nowadays available web sites are definitely the ones having the widest potential audience and the most significant impact on the everyday life of people Web sites contribute largely to the information society they provide visitors with a large array of services and information and allow them to perform various tasks without prior assumptions about their computer literacy Web sites are assumed to be accessible and usable to the widest possible audience Consequently usability has been recognized as a critical success factor for web sites of every kind Beyond this universal recognition usability still remains a notion that is hard to grasp Summative evaluation methods have been introduced to identify potential usability problems to assess the quality of web sites However summative evaluation remains limited in impact as it does not necessarily deliver constructive comments to web site designers and developers on how to solve the usability problems Formative evaluation methods have been introduced to address this issue Evaluation remains a process that is hard to drive and perform while its potential impact is probably maximal for the benefit of the final user This complexity is exacerbated when web sites are very large potentially up to several hundreds of thousands of pages thus leading to a situation where evaluating the web site is almost impossible to conduct manually Therefore many attempts have been made to support evaluation with Models that capture some characteristics of the web site of interest

Teaching Expertise in Three Countries Akiko Hayashi, 2022-05-06 A comparison of the development of expertise in preschool teaching in China Japan and the United States In Teaching Expertise in Three Countries Akiko Hayashi shows how teachers from Japan China and the United States think about what it means to be an expert teacher Based on interviews with teachers conducted over the span of fifteen years and videos taken in their classrooms Hayashi gives us a valuable portrait of expert teachers in the making While Hayashi's research uncovered cultural variations in the different national contexts her analysis of how teachers adapted their pedagogy throughout their careers also revealed many cross national similarities Younger teachers often describe themselves as being in a rush following scripts and talking too much while experienced teachers describe themselves as being quieter knowing children better and being more present Including a foreword by scholar of early childhood education Joseph Tobin Teaching Expertise in Three Countries provides a foundation for understanding the sequence and pathways of development over the first decade of teaching in three national contexts demonstrating the value of the field of comparative education in the process

Discourse and Affect in Foreign Policy Jakub Eberle, 2019-05-01 Foreign and security policy have long been removed from the political pressures that influence other areas of policymaking This has led to a tendency to separate the analytical levels of the individual and the collective Using Lacanian theory which views the subject as ontologically incomplete and desiring a perfect identity which is realised in fantasies or narrative scenarios this book shows that the making of foreign policy is a much more complex process Emotions and affect play an important role even where hard security issues such as the use of military force are concerned Eberle constructs a new theoretical framework for analysing foreign policy by capturing the interweaving of both discursive and affective aspects in policymaking He uses this framework to explain Germany's often contradictory foreign policy towards the Iraq crisis of 2002 2003 and the emotional even existential public debate that accompanied it This book adds to ongoing theoretical debates in International Political Sociology and Critical Security Studies and will be required reading for all scholars working in these areas
