Cities in Film explores for the first time in scholarship film representations of cities of the Ancient World from early cinema to the 21st century. The volume analyzes the different choices made by filmmakers, art designers and screen writers to recreate ancient urban spaces as more or less convincing settings of mythical and historical events. In looking behind and beyond intended archaeological accuracy, symbolic fantasy, primitivism, exoticism and Hollywood-esque monumentality, this volume pays particular attention to the depiction of cities as faces of ancient civilizations but also as containers of moral ideas and cultural fashions deeply rooted in the contemporary zeitgeist and in continuously revisited traditions. **The Epic Film** Derek Elley, 2013-12-04 As Charlton Heston put it There's a temptingly simple definition of the epic film: it's the easiest kind of picture to make badly. This book goes beyond that definition to show how the film epic has taken up one of the most ancient art forms and propelled it into the modern world covered in twentieth century ambitions, anxieties, hopes and fantasies. This survey of historical epic films dealing with periods up to the end of the Dark Ages looks at epic form and discusses the films by historical period showing how the cinema reworks history for the changing needs of its audience much as the ancient mythographers did. The form's main aim has always been to entertain and Derek Elley reminds us of the glee with which many epic films have worn their label and of the sheer fun of the genre. He shows the many levels on which these films can work from the most popular to the specialist each providing a considerable source of enjoyment. For instance, spectacle, the genre's most characteristic trademark is merely the cinema's own transformation of the literary epic's taste for the grandiose. Dramatically it can serve many purposes as a resolution of personal tensions (the chariot race in *Ben Hur*) of monotheism vs. idolatry (*Solomon and Sheba*) or of the triumph of a religious code (*The Ten Commandments*). Although to many people Epic equals Hollywood throughout the book Elley stresses debt to the Italian epics which often explored areas of history with which Hollywood could never have found sympathy. **Baker's Biographical Dictionary of Musicians** Theodore Baker, Alfred Remy, 1919 **The Concise Cinegraph** Hans-Michael Bock, im Bergfelder, 2009-09-01 This comprehensive guide is an ideal reference work for film specialists and enthusiasts. First published in 1984 but continuously updated ever since, CineGraph is the most authoritative and comprehensive encyclopedia on German speaking cinema in the German language. This condensed and substantially revised English language edition makes this important resource available to students and researchers for the first time outside its German context. It offers a representative historical overview through bio-filmographical entries on the main protagonists from the beginnings to the present day. Included are directors and actors, writers and cameramen, composers and production designers, film theorists and critics, producers and distributors, inventors and manufacturers. An appendix includes short introductory essays on specific periods and movements such as Early Film, Weimar Nazi Cinema, DEFA, New German Cinema and German film since unification, as well as on cinematic developments in Austria and Switzerland. Sections that crossreference names around specific professional groups and themes will prove equally invaluable to researchers. **Thrills Untapped 2** Michael R.
