Catalogue of the Lizards in the British Museum (Natural History) British Museum (Natural History), George Albert Boulenger, 1887 **Coastal Landscapes of South Australia** Robert P. Bourman, Colin V. Murray-Wallace, Nick Harvey, 2016-08-09 Geologically the South Australian coast is very young having evolved over only 1% of geological time during the past 43 million years since the separation of Australia and Antarctica It is also very dynamic with the current shoreline position having been established from only 7000 years ago The South Australian mainland coast is 3816 km long with islands providing an additional 1251 km of coast giving a total coastline of just over 5000 km South Australian coastal landforms include cliffs rocky outcrops and shore platforms mangrove woodlands mudflats estuaries extensive sandy beaches coastal dunes and coastal barrier systems as well as numerous near shore reefs and islands This book is a landmark study into the variable character of the South Australian coast and its long term evolution **Tettigoniidae of Australia Volume 2** DCF Rentz, 1993-01-01 This volume covers three subfamilies all endemic to Australia The Phasmodinae are a small group with one genus and four species living in the heath habitats of Western Australia The Zaprochilinae are represented in the literature by two genera each with a single species This volume reveals that four genera are present in Australia one with more than twelve species Like the Phasmodinae the Zaprochilinae feed on flowers but unlike that group where the flower is destroyed evidence suggests that only pollen and nectar are eaten and the flower remains intact **New Zealand Journal of Geology and Geophysics** ,1958-02 The South Australian Naturalist ,1922 **Geographical Guide to Floras of the World** Sidney Fay Blake, Alice Cary Atwood, 1942 Annotated selected list of floras and floristic works relating to vascular plants including bibliographies and publications dealing with useful plants and vernacular names **The Osprey** ,1900

Journals of Two Expeditions of Discovery in North-West and Western Australia Vol. 2 George Grey, 2022-09-15 In *Journals of Two Expeditions of Discovery in North West and Western Australia Vol 2* George Grey presents an articulate and

meticulously detailed account of his intrepid expeditions through the largely uncharted territories of Australia in the mid 19th century This volume showcases Grey s keen observational skills and his adept narrative style blending personal reflection with scientific inquiry The text serves not only as a travelogue but also contextualizes the intricate landscapes and cultures he encountered illuminating the profound connection between humanity and the Australian environment amidst the burgeoning colonial interest of the era George Grey a distinguished explorer and colonial administrator embarked on these journeys driven by a profound desire to document uncharted territories and engage with Indigenous cultures His experiences as a public servant and his academic background in natural history and ethnography provided a robust foundation for his explorations Grey s writings reflect a time of transition for Australia as European settlers began to assert dominion over its lands while he simultaneously advocated for a respectful understanding of the Indigenous populations This compelling volume is highly recommended for scholars and enthusiasts alike as it enriches the discourse on colonial exploration and Indigenous relations Grey s engaging prose infused with genuine curiosity and respect invites readers to appreciate the complexities of Australia s landscapes and cultures making it an invaluable addition to any collection on Australian history or exploration

The Action Plan for Australian Mammals 2012 Andrew Burbidge, John Woinarski, Peter Harrison, 2014-06-02

The Action Plan for Australian Mammals 2012 is the first review to assess the conservation status of all Australian mammals It complements The Action Plan for Australian Birds 2010 Garnett et al 2011 CSIRO Publishing and although the number of Australian mammal taxa is marginally fewer than for birds the proportion of endemic extinct and threatened mammal taxa is far greater These authoritative reviews represent an important foundation for understanding the current status fate and future of the nature of Australia This book considers all species and subspecies of Australian mammals including those of external territories and territorial seas For all the mammal taxa about 300 species and subspecies considered Extinct Threatened Near Threatened or Data Deficient the size and trend of their population is presented along with information on geographic range and trend and relevant biological and ecological data The book also presents the current conservation status of each taxon under Australian legislation what additional information is needed for managers and the required management actions Recovery plans where they exist are evaluated The voluntary participation of more than 200 mammal experts has ensured that the conservation status and information are as accurate as possible and allowed considerable unpublished data to be included All accounts include maps based on the latest data from Australian state and territory agencies from published scientific literature and other sources The Action Plan concludes that 29 Australian mammal species have become extinct and 63 species are threatened and require urgent conservation action However it also shows that where guided by sound knowledge management capability and resourcing and longer term commitment there have been some notable conservation success stories and the conservation status of some species has greatly improved over the past few decades The Action Plan for Australian Mammals 2012 makes a major contribution to the conservation of a wonderful legacy

that is a significant part of Australia's heritage For such a legacy to endure our society must be more aware of and empathetic with our distinctively Australian environment and particularly its marvellous mammal fauna relevant information must be readily accessible environmental policy and law must be based on sound evidence those with responsibility for environmental management must be aware of what priority actions they should take the urgency for action and consequences of inaction must be clear and the opportunity for hope and success must be recognised It is in this spirit that this account is offered
