An Essay in Natural Philosophy *Contemporary Natural Philosophy and Philosophies - Part 1* Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances, making the world globally interdependent, but this spatial globalization has not eliminated cultural fragmentation. The Two Cultures of C. P. Snow, that of science/technology and that of humanities, are drifting apart even faster than before, and they themselves crumble into increasingly specialized domains. Disintegrated knowledge has become subservient to the competition in technological and economic race, leading in the direction chosen not by reason, intellect, and shared value-based judgement, but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance. If we want to restore the authority of our best available knowledge and democratic values in guiding humanity, first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology. This collection of articles responds to the call from the journal *Philosophies* to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values, producing and knowledge and values consuming communities in an inclusive, extended, contemporary, natural philosophical manner. In this process of synthesis, scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world, both natural and human-made, while philosophies scrutinize the ontological, epistemological, and methodological foundations of sciences, providing scientists with questions and conceptual analyses. This is all directed at extending and deepening our existing comprehension of the world, including ourselves, both as humans and as societies and humankind.

Philosophical Foundations for a Christian Worldview J. P. Moreland, William Lane Craig, 2003-03-31 Arguments are clearly presented and rival theories are presented with fairness and accuracy. **BOOK JACKET** **Handbook of Medieval Culture. Volume 3** Albrecht Classen, 2015-08-31 A follow-up publication to the *Handbook of Medieval Studies*, this new

reference work turns to a different focus medieval culture Medieval research has grown tremendously in depth and breadth over the last decades Particularly our understanding of medieval culture of the basic living conditions and the specific value system prevalent at that time has considerably expanded to a point where we are in danger of no longer seeing the proverbial forest for the trees The present innovative handbook offers compact articles on essential topics ideals specific knowledge and concepts defining the medieval world as comprehensively as possible The topics covered in this new handbook pertain to issues such as love and marriage belief in God hell and the devil education lordship and servitude Christianity versus Judaism and Islam health medicine the rural world the rise of the urban class travel roads and bridges entertainment games and sport activities numbers measuring the education system the papacy saints the senses death and money
