Social Bonds as Freedom Paul Dumouchel, Reiko Gotoh, 2015-08-01 Central to discussions of multiculturalism and minority rights in modern liberal societies is the idea that the particular demands of minority groups contradict the requirements of equality anonymity and universality for citizenship and belonging The contributors to this volume question the significance of this dichotomy between the universal and the particular arguing that it reflects how the modern state has instituted the basic rights and obligations of its members and that these institutions are undergoing fundamental transformations under the pressure of globalization They show that the social bonds uniting groups constitute the means of our freedom rather than obstacles to achieving the universal

Shupe, 1989 **On Human Nature** Jonathan H. Turner, 2020-11-24 In this book Jonathan H Turner combines sociology evolutionary biology cladistic analysis from biology and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present day great apes Selection pressures altered this inherited legacy for the ancestors of humans termed hominins for being bipedal and forced greater organization than extant great apes when the hominins moved into open country terrestrial habitats The effects of these selection pressures increased hominin ancestors emotional capacities

through greater social and group orientation This shift in turn enabled further selection for a larger brain articulated speech and culture along the human line Turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain speech and culture These complexes he shows can be understood as the cognitive complex the psychological complex the emotions complex the interaction complex and the community complex **Anatomy of Love** Helen E. Capacity Nigel Rapport,2010 What is it to be human What are our specifically human attributes our capacities and liabilities Such questions gave birth to anthropology as an Enlightenment science This book argues that it is again appropriate to bring the human to the fore to reclaim the singularity of the word as central to the anthropological endeavor not on the basis of the substance of a human nature To be human is to act like this and react like this to feel this and want this but in terms of species wide capacities capabilities for action and imagination liabilities for suffering and cruelty The contributors approach the human with an awareness of these complexities and particularities rendering this volume unique in its ability to build on anthropology s ethnographic expertise *The Oxford Handbook of Evolutionary Family Psychology* Catherine Salmon,Todd K. Shackelford,2011-05-27 The Oxford Handbook of Evolutionary Family Psychology focuses on the psychology behind people s familial behavior an understanding of which can illuminate our understanding of modern ancient and animal families
