Parsons,Allen Carlson,2008-11-20 Glenn Parsons and Allen Carlson offer an in depth philosophical study of the relationship between function and aesthetic value breaking with the philosophical tradition of seeing the two as separate They begin by developing and defending in a general way the concept of Functional Beauty exploring how the role of function in aesthetic appreciation has been treated by some notable thinkers in the history of aesthetics They then consider the relationship to Functional Beauty of certain views in current aesthetic thought especially what we call cognitively rich approaches to the aesthetic appreciation of both art and nature Turning to work on the nature of function in the philosophy of science they argue that this line of enquiry can help solve certain philosophical problems that have been raised for the idea that knowledge of function plays an important role in aesthetic appreciation Although philosophical discussions of aesthetic appreciation tend to focus largely and sometimes almost exclusively on artworks the range of aesthetic appreciation is of course much larger Not simply art but also nature architecture and even more mundane everyday things cars tools clothing furniture and sports are objects of frequent and enthusiastic aesthetic appreciation Accordingly in the second half of the book Glen Parsons and Allen Carlson consider the place and importance of Functional Beauty in the aesthetic appreciation of

a broad range of different kinds of things The final chapters explore Functional Beauty in nature and the natural environment in architecture and the built environment in everyday artefacts events and activities and finally in art and the artworld In each case Parsons and Carlson argue that Functional Beauty illuminates our aesthetic experiences and helps to address various theoretical issues raised by these different objects of appreciation

Introduction To Chinese Aesthetics Chunshi Yang,2025-05-29 The purpose of this book is to systematize traditional Chinese aesthetic thought reveal its internal logic and carry out a dialogue with modern Western aesthetics so as to rebuild the Chinese aesthetic system Chinese aesthetics embodies the concept of inter subjectivity which has modern significance It is based on the idea of unity between heaven and humanity viewing aesthetic as the communication between the self subject and the world subject in contrast to the Western aesthetic epistemology that regards aesthetic as the sensory perception of the subject toward the object Additionally the methodology of intuitive perception is another characteristic of Chinese aesthetics that holds modern significance Chinese aesthetics emphasizes the emotionality of aesthetics from the perspective of value theory distinguishing itself from the epistemological tradition of Western aesthetics It differs from Western consciousness aesthetics as it embodies corporeality representing aesthetics of experience that integrates body and mind It posits that aesthetic is not purely a spiritual activity nor is it a form of contemplation but rather an experience that integrates body and mind and an idealized way of life Therefore aesthetic can nurture temperament and poeticize life Furthermore in Chinese aesthetics it is

emphasized that aesthetics serves as a mode of experiencing the Way The Way is discovered through aesthetic intuition and emotional experiences and it is actualized through imagery thereby laying the groundwork for an aesthetic phenomenology The reinterpretation and reconstruction of Chinese aesthetics is a product of the dialogue between Chinese and Western aesthetics Since its publication this book has garnered widespread attention and acclaim from the academic community in China It embodies professor Yang s Transcendental Aesthetic view with Inter subjectivity bridging ancient and modern perspectives and fostering communication between Chinese and Western Aesthetics
