## **Naturalism And Ontology:**

Naturalism and Ontology Wilfrid Sellars, 1979      *Naturalism, Reference, and Ontology* Chase B. Wrenn, 2008 *Naturalism Reference and Ontology* is a collection of twelve original essays honoring Roger F. Gibson who has been a leading proponent and defender of W. V. Quine's philosophy for nearly thirty years. The essays address a wide range of topics including normativity and naturalized epistemology, holism, consciousness, the philosophy of logic, perception, value theory, and the arts. The contributors are an international group of prominent philosophers as well as rising scholars including Robert Barrett, Lars Bergström, Richard Creath, David Henderson, Terence Horgan, Ernest Lepore, Pete Mandik, Alex Orenstein, Kenneth Shockley, J. Robert Thompson, Josefa Toribio, Joseph Ullian, Josh Weisberg, and Chase B. Wrenn.

**World Without Design** Michael Cannon Rea, 2002      **World Without Design** Michael Cannon Rea, 2002. Philosophical naturalism has dominated the Western academy for well over a century. According to Michael Rea, however, there is an important sense in which naturalism's status as orthodoxy is without rational foundation and the costs of embracing it are surprisingly high. The goal of *World without Design* is to defend these two claims with special attention to the second. The first part of the book aims to provide a fair and historically informed characterization of naturalism. The second part argues for the striking thesis that naturalists are committed to rejecting realism about material objects, materialism, and perhaps realism about other minds. Rea concludes by examining two alternative research programs: intuitionism and supernaturalism, and argues for the conclusion that under certain circumstances intuitionism is self-defeating.

**Naturalism and Normativity** Mario De Caro, David Macarthur, 2010. Normativity concerns what we ought to think or do and the evaluations we make. For scientific naturalists, the moral is reached by reducing the normative to the nonnormative. For orthodox nonnaturalists, the moral is found in the transcendent realm of norms. This book challenges both sides of this debate.

*Stoic Pragmatism* John Lachs, 2012-05-09. John Lachs, one of American philosophy's most distinguished interpreters, turns to William James, Josiah Royce, Charles S. Peirce, John Dewey, and George Santayana to elaborate stoic pragmatism or a way to live life within reasonable limits. Stoic pragmatism makes sense of our moral obligations in a world driven by perfectionist human ambition and unreachable standards of achievement. Lachs proposes a corrective to pragmatist amelioration and stoic acquiescence by being satisfied with what is good enough. This personal yet modest philosophy offers penetrating insights into the American way of life and our human character.

**The Routledge Handbook of Liberal Naturalism** Mario De Caro, David Macarthur, 2022-03-14. The central question of naturalism, the relation of philosophy to science, was one of the defining strands of twentieth-century thought and remains a major source of debate and controversy. Today many argue that philosophy should fold itself into the sciences, especially the natural sciences. Liberal naturalists argue that such scientific naturalism demands reductive and Procrustean conceptions of knowledge and reality. Moreover, many philosophical problems are beyond the scope of the sciences, such as the nature of persons, the normativity of the space of reasons, and how best to understand the peculiar mix of

objectivity and subjectivity of ethics and art The Routledge Handbook of Liberal Naturalism is the first collection to present a comprehensive overview of liberal naturalism a philosophical outlook that lies between scientific naturalism and supernaturalism Comprising 37 chapters by an international team of contributors it examines important cutting edge topics including what is liberal naturalism is metaphysics a viable project naturalism in the history of philosophy including Hume Dewey and Quine contemporary liberal naturalists such as P F Strawson John McDowell Hilary Putnam and John Rawls related kinds of naturalism including subject naturalism common sense naturalism and biological naturalism the bearing of liberal naturalism on contemporary debates in epistemology philosophy of mind ethics and aesthetics Essential reading for students and researchers in all areas of philosophy this volume will be of particular interest for those studying philosophical naturalism philosophy of science metaphysics epistemology philosophy of mind ethics and aesthetics Philosophy of the Brain Georg Northoff,2004 What is the mind What is the relationship between brain and mind These are common questions But What is the brain is a rare question in both the neurosciences and philosophy The reason for this may lie in the brain itself Is there a brain problem In this fresh and innovative book Georg Northoff demonstrates that there is in fact a brain problem He argues that our brain can only be understood when its empirical functions are directly related to the modes of acquiring knowledge our epistemic abilities and inabilities Drawing on the latest neuroscientific data and philosophical theories he provides an empirical epistemic definition of the brain Northoff reveals the basic conceptual confusion about the relationship between mind and brain that has so obstinately been lingering in both neuroscience and philosophy He subsequently develops an alternative framework where the integration of the brain within body and environment is central This novel approach plunges the reader into the depths of our own brain The Philosophy of the Brain that emerges opens the door to a fascinating world of new findings that explore the mind and its relationship to our very human brain Series A

**Freedom and Limits** John Lachs, 2014-03-03 Freedom and Limits is a defense of the value of freedom in the context of human finitude A contribution to the American tradition of philosophy it focuses attention on moral problems as we encounter them in daily life where the search for perfection and the incessant drive to meet obligations make it difficult to attain satisfaction The book argues that uniformity is unproductive Human natures are varied and changeable making the effort to impose a unitary good on everyone futile Moreover we don't need to strive for more than what is good enough Finite achievements should be adequate to satisfy finite people The ultimate aim of the book is to reclaim the role of philosophy as a guide to life In doing so it presents discussions of such important philosophers as Fichte Hegel Peirce Dewey James and above all Santayana

**Mathematics and Reality** Mary Leng, 2010-04-22 Mary Leng defends a philosophical account of the nature of mathematics which views it as a kind of fiction albeit an extremely useful fiction On this view the claims of our ordinary mathematical theories are more closely analogous to utterances made in the context of storytelling than to utterances whose aim is to assert literal truths

**New Realism and Contemporary Philosophy** Gregor Kroupa, Jure Simoniti, 2020-06-25 This open access book advances the current debate in continental realism In the field of contemporary continental ontology Speculative Realist thinkers are now grappling with the genealogy of their ideas in the history of modern philosophy The Speculative Realism movement prompted a debate criticizing the predominant postmodernist orientation in philosophy which located its origins in Kantian correlationism which supposedly ended the period of early modern naive realist metaphysics by showing that the mind and the outside world can only ever be understood as correlates The debate over a new kind of realism has attracted many supporters and critics In order to refocus its specific interpretation of modern philosophy in general and of the Kantian gesture in particular this volume brings together major authors working on contemporary ontology and historians of ideas It underlines and illustrates the fact that contemporary continental philosophy is rediscovering its past in original ways by productively reinterpreting some of the key concepts of modern philosophy The perspectives and accounts of the key concepts of the history of philosophy are different in the views of individual contributors and sometimes radically so yet the discussion between contemporary realists and their critics shows that the real battleground of new ideas lies not in developing the philosophical motifs of the end of the 20th century but rather in rethinking the milestones of modern philosophy The eBook editions of this book are available open access under a CC BY NC ND 3.0 licence on [www.bloomsburycollections.com](http://www.bloomsburycollections.com)

**The Cambridge Companion to Husserl** Barry Smith, David Woodruff Smith, 1995-05-26 The essays in this volume explore the full range of Husserl's work and reveal just how systematic his philosophy is There are treatments of his most important contributions to phenomenology intentionality and the philosophy of mind epistemology the philosophy of language ontology and mathematics An underlying theme of the volume is a resistance to the idea current in much intellectual history of a radical break between modern and postmodern

philosophy with Husserl as the last of the great Cartesians Husserl is seen in this volume as a philosopher constantly revising his system in order to be able to integrate philosophy with ideas emanating from science and culture The so called rift between analytic and continental philosophy emerges as an artificial construct *Metaphysics and Scientific Realism*

Francesco Federico Calemi, 2016-01-15 David Malet Armstrong 8 July 1926 13 May 2014 has been one of the most influential contemporary metaphysicians working in the analytic tradition and surely the greatest 20th century Australian philosopher His main merit is to have reestablished metaphysics as a respectable branch of philosophy placing it at the centre of the philosophical debate and giving it the status of an authoritative and competent interlocutor of both rational and empirical sciences By means of a rigorously argumentative approach and a sharp prose Armstrong has built a whole metaphysical system that is a comprehensive and unified picture of the fundamental structure of the world The various chapters of the book address the key issues concerning Armstrong view about the problem of universals the nature of states of affairs the ontological ground of possibility nomic necessity and dispositions the truthmaker theory and the theory of mind This volume aims to celebrate Armstrong s memory bringing new understanding and hopefully stimulating more work on his philosophy with the conviction that it constitutes an invaluable heritage for contemporary research in metaphysics **French Studies**
