Murphy,1999 For centuries philosophers political scientists and jurists have struggled to understand the possibilities for justice and peace among a multiplicity of sovereign states Like Dante who sought to organize the world under the authority of the Holy Roman Empire many theorists have tried to explain how sovereign states should be

governed to ensure stability and peace in the absence of any established higher authority Theories of World Governance traces the various conceptual approaches to world harmony from the close of the Middle Ages to today Considering the immediate problems of order in a decentralized world community Cornelius F Murphy Jr outlines what he believes are the essential long term conditions for world peace Covering a wide range of disciplines from theology and philosophy to jurisprudence ethics and sociology Murphy explores how theorists have reflected upon the necessary components of an effective global order At the outset the thought of Christian Europe was shaped by a belief in a natural order established by the Creator of the universe However with the advent of the Enlightenment the connections between the human and the transcendent were severed There was a movement from a theocentric understanding of the powers of the human mind to an intellectual outlook that blurred the distinctions between the divine and human This study in the history of ideas examines the profound effects of the fundamental shift from transcendence to immanence upon the development of international theory Murphy discusses the thought of Leibniz Wolff Kant Hegel and Phillip Allott among others The study concludes with an extended reflection on the importance of a sound political philosophy to the future well being of the global community Possible improvements in the existing arrangements such as reform of the United Nations are discussed Murphy suggests that in order for a society of sovereign states to be transformed into a world political community human rights and self governance within states must first be strengthened and at the same time individuals of all states must begin to realize their responsibilities toward the whole human family

The Natural Law Tradition and Belief David Ardagh, 2019 For over twenty centuries from ancient Greece the ideal of natural law has been appealed to in Western moral and legal philosophy as a grounding for ethics and jurisprudence centered on capacities of a common human nature From the early medieval advent of Christendom it was embedded within theistic and religious systems for over a millennium during which time it was treated as incomplete and part of an enveloping divine law of ethics Modern agnosticism in theology religion and metaphysics then saw natural law unhitched from these associations but it is still suspect due to its lingering ties with these disciplines and practices It endured through its meta ethical capacity to integrate changes in science with ethics via its central notion of wellbeing as the perfection of human nature via access to the highest good however variously understood Today nature and human natures wellbeing are both endangered Ecological destruction arising from unbridled growth industrial pollution nuclear weapons and mass population displacement though poverty and wars threaten humanity But in terms of the meta ethics of wellbeing both the humanist normative ethics of natural law and some of its enveloping theistic and religious divine law addenda can be invoked to address such evils The book aims to reinvigorate natural law as a unifying ethical organon for this purpose showing that it can dialogue with its enveloping divine law overlays constructively uncovering its points of essential unity with them and

generating some unified solutions to the global threats mentioned like poverty These are largely due to global injustices like tax evasion the arms trade and political corruption which are better prevented by cooperatively agreed and enforced global ideals norms and laws based on natural and divine law grounding international laws rather than appealing to national norms and laws alone *Naturalism and the Frontiers of Legal Science* Tomasz Pietrzykowski, 2021-05-27 The essay discusses one of the challenges to the methodology of the law a new wave of naturalistic approaches The book aims to outline how these new developments affect studying and explaining the law It distinguishes two fundamentally different models of the scientific inquiry of the law and discusses the nature of its scientific status
