technology and by the intellectual upheavals associated with the ideas of Darwin Marx Nietzsche and Freud This book is an account of naturalism perhaps the strongest and most influential intellectual tradition or as Harold Kaplan would argue mythology to affect modern American literature and culture Kaplan approaches the naturalist writers through a study of Henry Adams He sees in Adams the paradigmatic intelligence of his time a prophetic mind though not a seminal one and a man absorbed with the twin notions of power and order Adams s major work illustrates the joining of a literary imagination and moral temperament with an almost obsessive response to the science economic life and politics of his world Adams s work exemplifies what Kaplan calls the myth of metapolitics a view of human struggle and fate profoundly dominated by naturalist concepts of power Kaplan then turns to the fascination that power in its various manifestations material moral social political held for writers such as Dreiser Norris Crane and others Their dramatic plots characters and allegorical images are examined in detail In wider reference this book should concern those who are interested in problems of modern ethics and politics in the effort to harmonize concepts of value with images of power and natural order

Victorian Scientific Naturalism Gowan Dawson,Bernard Lightman,2014-04-28 Victorian Scientific Naturalism examines the secular creeds of the generation of intellectuals who in the wake of The Origin of Species wrested cultural authority from the old Anglican establishment while installing themselves as a new professional scientific elite These scientific naturalists led by biologists physicists and mathematicians such as William Kingdon Clifford Joseph Dalton Hooker Thomas Henry Huxley and John Tyndall sought to persuade both the state and the public that scientists not theologians should be granted cultural authority since their expertise gave them special insight into society politics and even ethics In Victorian Scientific Naturalism Gowan Dawson and Bernard Lightman bring together new essays by leading historians of science and literary critics that recall these scientific naturalists in light of recent scholarship that has tended to sideline them and that reevaluate their place in the broader landscape of nineteenth century Britain Ranging in topic from daring climbing expeditions in the Alps to the maintenance of aristocratic protocols of conduct at Kew Gardens these essays offer a series of new perspectives on Victorian scientific naturalism as well as its
